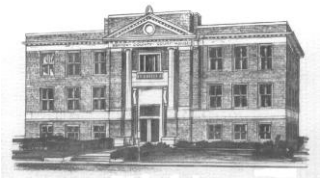
BENTON COUNTY, WASHINGTON



REQUEST FOR PROPOSALS (RFP)

RFP 201405-Assessment Taxation System

PROJECT TITLE: Assessment and Taxation System (ATS)

PROPOSAL DUE DATE: June xx, 2014 5:00 PM – Pacific Daylight Time
Prosser, Washington. USA

Instructions for submitting proposals are contained in this document

VENDOR ELIGIBILITY: This procurement is open to those vendors who satisfy the minimum qualifications stated herein and are available for work in Washington State.

CONTENTS OF THE REQUEST FOR PROPOSALS:

Section 1. Introduction

Section 2. Administration

Section 3. Functional Requirements

Section 4. Technical Requirements

Section 5. Company Information

Section 6. Cost Proposal

Section 1
Introduction

INTRODUCTION

Benton County, a political subdivision of the State of Washington, invites you to respond to this Request for Proposal (RFP) with a sealed proposal for an Assessment and Taxation System (ATS) to be purchased for Benton County.

For the purposes of this document, the words “response” or “proposal” shall mean the vendor’s submitted response to Benton County’s RFP, inclusive of any materials identified as exhibits.

The term RFP shall be used to identify this document.

All hardware, training and services provided by supplier and all software licensed by the supplier hereunder and referenced with all the functionality represented within the supplier's response to this RFP will herein be called and referred to as the "Benton County Assessment and Taxation System", hereinafter, denoted ATS.

In order to support reuse of this proposal for other projects, the term “The System” shall mean the Benton County Assessment and Taxation System.

1.1 Definitions

User – Employees, contractors, volunteers, or outside companies that have a unique account to access a computing system operated by Benton County Government.

Server Class Computer- Typically a multiprocessor computer with built in hardware/software fault tolerance, scalable architecture, and high input output capacity as compared to a workstation.

Workstation – Any computer used by Benton County employees to perform work on Benton County’s network. This includes workstations, laptops and tablets.

Client Software – Any software required to be loaded and run on a workstation in order for the ATS to function correctly. In a Client Server environment, the ATS Client software interacts with the User’s environment and the ATS server side services. The client’s environment may be a windows workstation, laptop, or tablet.

Server Software – Any software required to be loaded and run on a server class computer in order for the ATS to function correctly. In a Client Server environment, the ATS Server software is used to manage and control the services that process the ATS Client request and manage the ATS database. These Server services are typically run on one or more server class computers.

ATS System – This encompasses both the client and server side ATS environments.

CAMA – Computer Assisted Mass Appraisal

1.2 General Information

Benton County seeks to acquire and implement a comprehensive, state-of-the-art automated ATS software product to provide efficient data entry, reliable internal processing and record retention, document assembly and reports, and an intuitive user interface that is easy to learn and use. ATS software will replace the current system as it is now either as an upgraded version or a new software package.

1.3 Objective

The ATS is intended to replace the current Assessment and Taxation system here in Benton County with a fully featured state of technology Assessment and Taxation system.

1.4 Project Expectations

The ATS shall be of an expandable modular design to readily incorporate additional future enhancements. All modules should already be fully developed, tested, and maintained using a high-quality software development methodology for long-term reliability and technical efficiency.

Vendors should have substantial knowledge of assessment and taxation operation, function and legal requirements in the State of Washington. Vendors shall have a demonstrable expertise developing, implementing, and maintaining Assessment and Taxation system software products.

Successful vendor is required to monitor Assessment and Taxation laws for the State of Washington, develop and deploy any updates or changes to the software to meet the requirements and intent of the new laws.

The project will consist of the following project phases:

1) Procurement – Benton County will develop a request for proposal and select a software vendor for an automated assessment and taxation system. Procurement will follow state and local purchasing rules.

2) Contracting– Representatives of the selected vendor and representatives of Benton County will engage in negotiations to settle on terms and include those terms in any agreements needed by both entities. As a condition of a successful negotiation vendor will be required to sign the standard Benton County Technology and Professional Services Contract, available at http://www.co.walla-walla.wa.us/departments/ts/index.shtml. Payment benchmarks or performance periods will be identified in this agreement. No money will be due to the vendor at the time of contract signing. Benton County requires that 25% of the contract price be held until the project is accepted by the County as completed.

Commented [BS1]: Change the web address

3) Implementation and data conversion – The selected vender will work with Benton County to install the selected system, perform data conversion from the existing system, test all data and interfaces, and move into a production environment.

4) Training – The selected vendor will train the Benton County Assessor, Treasurer, and Information Technology staff on the operation of the selected system.

5) Support – The selected vendor shall support the system through the life cycle of the selected system or until the end of the paid maintenance period, whichever is longer.

1.5 Project Goals

Benton County will acquire software from a prime contractor who can meet minimum standards, which are highlighted in this document. It is anticipated that system will:

- *Be functionally rich in capabilities to manage property assessment and taxation functions.*
- *Provide statistical information and enhance work flow*
- *Be capable of generating required forms for Assessment and Taxation*
- *Fully replace the current Assessment and Taxation system with no loss of system functionality including any mobile field checkout modules*
- *Be compliant with Benton County computer and networking standards*
- *Be able to provide software updates compliant with Washington State mandated changes*
- *Provide excellent security controls integrated into Windows Active Directory*
- *Be capable of operating in an enterprise networking environment*
- *Provide the capability of importing and exporting information (data)*
- *Provide a robust reporting tool to enable users to create or customize reports*
- *Be compliant with open standards*
- *Be compliant and supplement Benton County Geographic Information System capabilities*
- *Provide data import and export capabilities*
- *Provide a web enabled, publicly available information search engine that allows the public to search for standard public records information. Must have the ability to suppress confidential owners.*

Commented [ER2]: Discuss w/Teri

Minimum standards are defined as meeting at least 90% functionality as identified in Section 3, Functional Requirements. Of the remaining 10%, none of functional requirements can be critical components required to meet the intent of Washington State Statutes regarding assessment and taxation, or needed to produce accurate tax statements.

Commented [ER3]: Discuss w/Teri

1.6 SYSTEM REQUIREMENTS OVERVIEW

The ATS is required to provide assistance and reduce workloads for operational and administrative arenas within the Benton County Assessor's and Treasurer's Office. It is expected that the new system will provide the following minimum benefits:

- Eliminate duplicate and redundant entry of transactions
- Capture all events and information pertaining to the state of real property.
- Add and update name and address information. The system shall be able to manage both :laddress of the site of the property and the billing address.

- Provide the capability to update administration areas, such as adding code values, new users, etc.
- Be compliant in an Enterprise networking environment.
- Provide the capability for programmatic updates or extraction of information. Product must include a query and report writing module that allows for ad hoc query and report generation. Exporting into excel, word, pdf format (determine if indicated in another section)

In response to this RFP, the supplier must also present a full plan for the implementation of their system including environmental requirements, staff assistance required, time and cost figures, and operational requirements, in terms of personnel and time.

The County reserves the right to acquire standard office automation data processing components from its current approved provider. Standard components should be priced separately in the RFP in Section 5 - COSTS.

1.7 SYSTEM AND FUNCTIONAL REQUIREMENTS

Section 3 describes functional requirements of the ATS and section 4 describes the system hardware and software requirements, system sizing, and system configuration and performance requirements for Benton County. These are considered to be minimum requirements; suppliers are encouraged to identify areas in their proposal which exceed the requirements or add additional functionality otherwise not requested and associated costs where applicable. The additional functionality should be identified in Section 3 after the Functional Specifications.

1.8 TRANSACTION VOLUMES

According to the United States Census Bureau the 2012 estimated population of Benton County was 182,398. Benton County consists of 1,760 sq. miles. Benton County is situated along the Oregon State border in southwest Washington. To assist a ~~responder~~ vendor in understanding the size of Benton County, we have provided the following statistics (as of Date).

~~ACCOUNT~~	NUMBER
Mobile Home Only Accounts	0
Centrally Assessed (WADOR) Real Property Utility Accounts	0
Personal Property Accounts	0
Real Property Accounts	0

1.9 HARDWARE AND ACCESS REQUIREMENTS

1.9.1 Data Entry Device Requirements

Benton County currently has approximately 750 workstations. It is estimated that at least 30 to 40 workstations will connect with the ATS on average. All of the workstations will have connectivity through the Network and are currently running Microsoft Windows 7 Professional.

Commented [ER4]: Update info
Formatted: Highlight
Formatted: Highlight
Formatted: Highlight

Commented [BS5]: We need to get these numbers

Commented [ER6]: Verify w/Teri
Formatted: Highlight
Formatted: Highlight
Formatted: Highlight

There will be tablets connected to the ATS application via VPN/remote desktop connections using Microsoft Windows 7 & 8 Professional.

The Vendor shall provide license to Benton County for its employees, contractors and contracted outside vendors to access the ATS.

Vendors should indicate any features or supported technology which would give persons with certain disabilities the ability to use the application.

1.9.2 Printer Requirements

Benton County utilizes Hewlett-Packard business class networked printers for the majority of its printing needs. The ATS shall be compliant with all Hewlett-Packard business class networked printer models currently supported by Hewlett-Packard.

Commented [ER7]: Is this appropriate

Formatted: Highlight

1.9.3 Server Requirements

Benton County prefers to deploy the ATS on the version of the Microsoft Windows server operating system that is in production on the date that Benton County goes "live" with the system. Currently this is Windows 2008 R2 standard server. The vendor shall specify additional resource requirements as part of the RFP response.

Formatted: Highlight

Benton County prefers that the ATS utilize the Windows 2008 R2 Active Directory Network security for controlling access to its resources.

Benton County will install on Dell PowerEdge Enterprise servers with as many fault tolerant features as ~~possible~~feasible.

1.9.4 Other Technical and Vendor requirements

Section 4 contains additional information about Benton County's network environment and technical requirements. Section 4 is required to be fully filled out by the vendor.

All vendor responses MUST include a sample copy of your company contracts and End User Licensing Agreements for the proposed software and any third party software required by the application to remain functional that Benton County would be required to sign.

All contracts/agreements must include the vendors' response to this RFP as an appendix.

Acceptance of any response to the RFP should not be construed as a contract nor shall it indicate any commitment on the part of Benton County for any future action. The awarding of the RFP is not complete until successful contract negotiations have taken place and an agreement is signed by both parties.

The RFP does not commit Benton County to pay for any costs incurred in the submission of a response to this RFP or for any cost incurred prior to the execution of a formal agreement.

Benton County does not represent that any proposal will be implemented, or that any individual respondent will be the party contracted with. In the event Benton County selects a respondent's proposal, implementation of the proposal will be through separate written agreement. Proposals and all ideas contained therein shall not be deemed proprietary to the respondent and may be used by Benton County in any manner deemed in its best interest.

1.10 Confidentiality of Records

Respondents must identify each portion of their proposals which they deem confidential. Respondents must provide justification of what materials, upon request, should not be disclosed by Benton County. Nonetheless, Benton County is a governmental agency, and as such, its records may be subject to disclosure to the public under RCW 42.56.070. Benton County will not release proposals to any party until the County has negotiated a contract, or otherwise concluded this selection process.

Commented [ER8]: Review w/Reid

Formatted: Highlight

Section 2
Administration

2. ADMINISTRATION

This RFP contains sufficient information and instructions to enable qualified responders to prepare and submit proposals and supporting material. To be considered responsive, responders must submit a complete proposal that substantially satisfies the technical and functional requirements as stated in this RFP. This RFP contains system requirements, evaluation criteria, and responder's responsibilities if a contract is negotiated. This RFP also contains major terms and conditions that the successful responder will be expected to accept.

2.1 Proposal Response Date and Location

Responses must be received by the Benton County Commissioners, 620 Market Street, Prosser WA 99350, Second Floor, prior to 5:00 p.m. Pacific Daylight Time, June XX, 2014. LATE PROPOSALS WILL NOT BE ACCEPTED.

Benton County will ~~not~~ accept proposals via electronic mail services.-who

If applicable, ~~T~~two hard copies of the proposal should be delivered to the Benton County Commissioners at the above address and must have the phrase "Benton County Assessor/Treasurer System Proposal Response" written on it. We require that the proposal also ~~be delivered on a readable compact disk or USB storage drive in Microsoft operating system format~~, readable ~~using~~ in a PDF Format~~Microsoft Word~~. All submitted media shall be scanned by vendor and free of any viruses or malware.

All accepted proposals and accompanying documentation will become the property of Benton County and ~~may~~ will not be returned. Vendors should be aware that because of Public Records Laws, we ~~may~~ will not be able to hold information you provide in your responses as confidential. Language inserted into a response by any vendor attempting to protect information as confidential should be aware that confidentiality will be enforced to the extent allowed by Washington State Public Records laws.

No proposals will be accepted after the above due date and time. Failure to follow all proposal preparation instructions may be cause to disqualify the vendor and may result in the return of responder's proposal unevaluated. All expenses for the preparation of proposals are the responsibility of the responder.

Benton County assumes no responsibility for delays caused by any delivery service. Receipt of vendor response by Benton County must not exceed the date and time stated above. Postmarking by the due date will not substitute for actual proposal receipt.

2.2 RFP COMMUNICATION LIAISON

During the RFP process, the following Benton County individual will be responsible for official communication with responders with regards to questions, both written and oral, project status, and award announcements. No provision in this RFP will be considered modified unless a written amendment is officially issued specifying such changes.

Contact Person (Do not deliver responses to proposals to this address)

Teri Holmes, Manager
Benton County Information Technology
620 Market Street
Prosser, WA 99350
(509) 786-5603
E-MAIL: teri.holmes@co.benton.wa.us

Questions for clarification about items in the ATS RFP are to be submitted to the contact person. All questions must be in writing and may be submitted either by electronic mail to teri.holmes@co.benton.wa.us. Questions will be accepted until June XX, 2014, 5:00 p.m. Pacific Daylight Time. All questions will be reviewed and a response issued. The response to such questions will be issued to all vendors who have notified Benton County of their intent to submit a proposal. Benton County will use electronic mail and Benton County's web site to notify vendors of answers to proposal questions.

2.3 Letter of Intent

All vendors intending on submitting a proposal to this RFP are encouraged to submit a letter of intent as soon as possible. The letter should identify the following information:

- Company Name
- RFP Contact for Company
- Address for Company Contact
- Phone Number for Company Contact
- E-mail address for Company Contact.

The Letter of Intent may be issued via letter or electronically mailed to teri.holmes@co.benton.wa.us. It is highly recommended that vendors submit the Letter of Intent to ensure that all notification regarding this procurement is received. The letter does not commit the vendor to respond to the RFP. All vendors who have submitted a letter of intent will receive notification of proposal changes or responses to questions submitted by other competitors. Significant changes to the RFP will be posted at http://www.co.walla-walla.wa.us/Departments/TS/RFP.shtml no later than close of business June XX, 2014

Commented [ER12]: 2 weeks prior to RFP Issuance

Formatted: Highlight

2.4 Vendor Conference

Due to the size and scope of this procurement a vendor conference call may be held. Vendors who have submitted a letter of intent to respond will be informed of any information regarding scheduled conference calls. No conference calls will be scheduled before June XX, 2014.

2.5 Proposal Presentation and Format Requirements

All responding vendors shall submit 2 indexed, printed and bound copies of the proposals (If applicable). Electronic copies of the response as required above, will be furnished in the original Word or Excel document formats.

Vendors ~~may~~ will use Adobe Acrobat PDF ~~Microsoft Excel~~ to perform the vendor response to each requirement; however, each requirement must be numbered with the requirement number. As an example (Example vendor responses are given in red). An Excel version of the vendor response tables are available for download at http://www.co.walla-walla.wa.us/Departments/TS/RFP.shtml

Commented [ER13]: Discuss w/Teri the options

ID#		DEPT.	SUBJECT AREA	TITLE	DESCRIPTION	VENDOR RESPONSE	VENDOR NOTES
49		Assessor	Appraisal Real Property - Commercial	Cost, Market or Income Used to value different building segments	The Application shall allow users to build a total assessed value from multiple segments of a property using multiple methods for each segment (e.g., a portion of a building may have a single purpose use valued with the cost approach and a portion of the building adaptable to many uses which would typically be valued with the income approach).	YES	Other notes as you may need to include

Table 2.5.1-1 Example Vendor Response

Foldouts containing charts, spread sheets, computer and video media, and oversize exhibits are permissible. Manuals and other reference documentation should not be included in the main responses to this RFP but may be bound and included separately or referenced and included as a separate file on whatever media the electronic copy is sent to Benton County. All responses, as well as any reference material presented must be written in English. Benton County prefers that any additional materials sent with the proposal be in electronic format.

2.6 Proposal Certification

The vendor must certify that all vendor proposal terms, including prices, will remain in effect for a minimum of ninety (90) days after the Proposal Due Date, that all proposed software has been operational at a non-vendor owned customer site for a period of ninety (90) days prior to the Proposal Due Date, that all proposed capabilities can be demonstrated by the vendor, and that the proposed software is currently marketed and sold. The Proposal Certification is in Section 6 of this RFP.

2.7 Proposal Terms and Conditions

2.7.1 Multiple Proposals

Vendors interested in submitting more than one proposal may do so, provided each proposal stands alone, and independently complies with the instructions, conditions, and specifications of the RFP.

2.7.2 Waiver of Minor Administrative Irregularities

Benton County reserves the right, at its sole discretion, to waive minor administrative irregularities contained in any proposal.

2.7.3 Single Response

A single response to the RFP may be deemed a failure of competition, and in the best interest of Benton County, the RFP may be cancelled.

2.7.4 Proposal Rejections and Withdrawals

Benton County reserves the right to reject any and/or all proposals at any time without penalty.

Further, Benton County reserves the right to not make an award, if it is deemed that no single proposal fully meets the technical and functional requirements of this RFP, or to award the contract for only a portion of the functionality identified herein.

Vendors may withdraw a proposal, which has been submitted at any time up to the proposal closing date and time. To accomplish this, a written request signed by an authorized representative of the vendor must be submitted to the RFP communication liaison. After withdrawing a previously submitted proposal, the vendor may submit another proposal at any time up to the proposal closing date and time.

2.7.5 Non-endorsement

As a result of the selection of a vendor to supply products and/or services to Benton County, Benton County is neither endorsing nor suggesting that the vendor's product is the best or only solution. The vendor agrees to make no reference to Benton County in any literature, promotional material, brochures, sales presentation or the like without the express written consent of Benton County.

~~2.7.6 Intentionally Left Blank~~

~~2.7.7~~2.7.6 No Obligation to Buy

Benton County reserves the right to refrain from contracting with any vendor. The release of this RFP does not compel Benton County to purchase.

~~2.7.8~~2.7.7 Cost of Preparing Proposals

Benton County will not be liable for any costs incurred by vendors in the preparation and presentation of proposals and demonstrations in response to this RFP.

~~2.7.9~~2.7.8 Errors in Proposal

Benton County will not be liable for any errors in vendor proposals. Vendors will not be allowed to alter proposal documents after the deadline for proposal submission.

Benton County reserves the right to make corrections and amendments due to errors identified in proposals by Benton County or the vendor. This type of correction or amendment will only be allowed for such errors as typing, transposition or any other obvious error. Vendors are liable for all errors or omissions contained in their proposals.

2.8 Contract Terms and Conditions

The following Terms and Conditions in all or in part may be incorporated into any contractual agreement between the vendor and Benton County. Terms and conditions that use the word "shall", in this section, are considered requirements by Benton County and are intended to be incorporated into any agreement between the vendor and Benton County.

2.8.1 Benton County Rights to Award Contract

Benton County reserves the right to:

- Award the contract according to the evaluation criteria set forth in Section 2.15 which includes due regard to quality of services, experience, compliance with technical and functional requirements and other factors, in addition to price.
- To make the award to any responder or combination of responders whose proposal(s), in the opinion of the Benton County, is in the best interest of Benton County. This determination may be made with due regard to quality of services, experience, compliance with the specifications, and other such factors as may be necessary in the circumstances.
- Benton County reserves the right to use any information obtained through responder demonstrations, user surveys, site visits, or other means, inclusive of information obtained after the RFP submission, as criteria for proposal evaluation.

2.8.2 Configuration Adjustment with Contract

Benton County reserves the right to select and exclude any equipment or software for the actual acquisition regardless of the configuration proposed by the vendor. The vendor will be consulted on any such adjustments whenever it is determined that the configuration adjustment may adversely impact system performance.

2.8.3 Proposal Incorporated Into Contract

The responder chosen for award shall be prepared to have its proposal incorporated, along with all of its other written correspondence concerning this RFP, into the contract. Any false or misleading statements found in a proposal will be grounds for disqualification. The proposal shall be added as an exhibit to any contractual agreement between vendor and Benton County.

2.8.4 Cooperative Purchasing

The Washington State Inter local Cooperative Act RCW 39.34 provides a means for governmental agencies to cooperatively purchase goods and services. Responder shall agree that other Washington State municipalities may acquire the ATS software under terms equivalent to any resulting contract.

Commented [ER16]: Ask Reid if necessary

2.8.5 Graduated Payments Schedule

Contract payments will be made to the successful vendor upon installation of the ATS and successful completion of benchmarks or performance periods as agreed in the contracting phase. *See section 1.4*

Vendor charges for maintenance shall not overlap with the installation and deployment period of this project. Therefore maintenance charges will not begin to accrue until the product is accepted by Benton County. Any difference in projected maintenance charges in the RFP will be adjusted accordingly before invoicing Benton County.

The final payment of 25% of the contract price may be invoiced to Benton County upon notice by Benton County Treasurer and Assessor that the project is complete and the system is running as advertised or promised.

2.8.6 Source Code /Software

Copy of Software: To protect Benton County in the event the supplier chooses not to perform or is no longer able to perform the required services, a copy of the Software Source Code will be supplied to Benton County. Supplier will keep Software Source Code current with all customization and new release(s) of the product(s).

Escrow Account for Software: In lieu of providing a copy of software, Benton County requests the Software Source Codes will be held in escrow, with Benton County having full rights to all code in the event the Supplier ceases to perform required services. This includes all programs, libraries, and utilities required to build and maintain the software program. Supplier will keep the Software Source Code current with each new release of the product(s) and notify Benton County when new are submitted to escrow. Any charges to Benton County for escrow, must be included in the contract price. If the cost for escrow is absent, vendor will be responsible for escrow payments for the life of this contract.

2.8.7 Software Upgrades

The software license to be negotiated with the successful responder will include a provision for software upgrades for the life of the contract.

If vendor creates another software which substantially functions as the product purchased under this RFP, Benton County will be entitled to that software as long as;

a. Maintenance payments are current
b. Vendor plans to cease supporting the current version or no longer supports the current version.

Vendor may not sunset, abandon or plan to retire the current version of the software as a means to force a paid upgrade to a newer version or platform of a software that does substantially the same thing.

2.8.8 Compliance ~~With~~with Statutory Requirements

The successful responder shall monitor, develop and deploy software upgrades patches to guarantee continued software compliance with Washington statutes. Patches and upgrades will be included as part of normal maintenance for the life of the contract.

2.8.9 Right to make multiple copies of software

Benton County shall have the right to make multiple copies of the software for the explicit purpose of recovering from a system failure or other disaster. It is Benton County policy to back up all production systems each night and retain these backups for a period of three weeks or more. However, at the sole discretion of Benton County, this policy may be revised to meet current business needs.

2.8.10 Documentation

The vendor shall provide documentation for all proposed software.

If the vendor supplies documentation in paper form, then the successful vendor must provide at least two complete sets of operating manuals for the proposed software. One copy will be a reproduction Master for use by Benton County in producing operating manuals for internal usage. The vendor shall provide an unlimited license for Benton County to copy and distribute the documentation for internal use. Vendor should also provide price quotations for providing documentation manuals as an alternative to Benton County making its own copies.

If the Vendor supplies documentation in electronic form, then Vendor shall provide an unlimited license for Benton County to copy and distribute the documentation for internal use.

2.8.11 Software Licenses for Training Machines

Vendor shall allow licensing free of charge for workstations dedicated for training purposes. Benton County agrees that such a license would only be for training purposes only, and cannot be used for production work.

2.8.12 Third Party Software Compliance

Vendor shall agree to ensure that software produced by vendor shall be compliant with the most current release of any third party software or operating systems required to operate the software

within eighteen (18) months of official release of third party software by the manufacturer of that software. It is anticipated that Benton County will enter into a service agreement with the winning vendor to ensure third party software compliance standards are met.

Vendor will not create or update software which will force Benton County to install or upgrade other software, including but not limited to, Internet Explorer, Microsoft Office or a new Windows Operating System. Benton County upgrades operating systems as necessary, normally when workstations are purchased to refresh technology.

Vendor will not cease to support previous versions of their software to force Benton County to upgrade computers with newer operating systems. .

2.8.13 GENERAL CONDITION OF CONTRACT

Commented [ER17]: Stop of review

Formatted: Font color: Red

Formatted: Font color: Red

Formatted: Font color: Red

A sample contract titled Benton County Personal Service Contract is included in the RFP packet. All responders will be expected to agree to the substantive terms of this sample Agreement.

Performance and/or Payment periods will be negotiated with the successful vendor.

If a successful contract cannot be negotiated with the intended awardee, Benton County reserves the right to terminate negotiations and pursue an agreement with the next highest rated proposal, repeating this procedure until a successful contract can be reached or all proposals rejected.

2.9 General Terms and Conditions

2.9.1 Necessary Ancillary Software

Commented [ER18]: Teri: Sympro? Clemmer?

Unless specifically exempted by the terms of the RFP, all software, including language compilers, middleware, database interfaces, and system management tools, ordinarily furnished or prudently required to make the proposed software product a complete functioning system when installed on Benton County supplied computers and operating systems will be furnished by the vendor, at no additional cost to Benton County.

Benton County reserves the right to procure through its own means third party commercially available software and hardware specified by the vendor in order for the ATS to function correctly. Third party software will include all items identified in the preceding paragraph, as well as, operating systems, and database systems.

2.9.2 Contractor Relationship

Benton County intends to contract only with the responder of the winning proposal to be known as the Contractor. The responder selected will be solely responsible for performance of the entire system. Subcontracting assignments are allowed under this RFP and the accompanying Benton County Technology and Personal Services contract with the approval of Benton County. However, Benton County requires that information about any subcontracting relationship be provided as part of the proposal. In the event of a subcontracting arrangement, the contractor assumes all responsibility for delivery, installation, maintenance and any support service

including documentation that is supplied by the subcontractor. In no event will the Contractor subcontract for more than fifty percent (50%) of the total value of the contract. Maintenance of systems software, if provided by a third party acceptable to Benton County, is exempted from the requirements of this section.

Commented [ER19]: Ask Teri why would they be exempt?

Formatted: Highlight

Formatted: Highlight

Joint ventures between two or more responders will not be considered nor will any sharing of the performance obligation with a third party be considered. It is expected that the selected software be tightly integrated by a single vendor and contractor will be responsible for supporting the software in its entirety.

2.10 Delivery

The vendor assumes responsibility for the delivery, installation, maintenance, and initial adjustment of all vendor supplied equipment, software, and support services proposed.

2.11 Respondent Demonstration

At the option of Benton County and as a condition prior to contract award, respondents may be required to demonstrate the functionality of equipment/systems proposed. The demonstration must be conducted with the products proposed and must be able to demonstrate the functionality and speed as stated in the responder's proposal.

Failure to agree to the demonstration will disqualify the responder. Failure to use the products proposed or failure to achieve the performance proposed may disqualify the responder. If Benton County elects to have demonstrations conducted, it is ~~highly desirable~~required that these occur at facilities located in Benton, WA, as this will permit the greatest participation by the staff.

~~In addition, the Responder demonstration will enable Benton County to verify response to the RFP Functional and Technical Requirements. Should the demonstration reveal variations from the responses to the RFP, Benton County reserves the right to adjust the scoring to reflect actual conditions of the proposed system. Final scoring will be calculated taking into account any adjustments that need to be made.~~

Commented [ER20]:

It is understood that any associated costs for on-site responder demonstrations or benchmark test will be incidental to the contract and those costs will not be passed on to Benton County.

At the option of Benton County and as a precedent to contract award, Benton County employees may visit sites deemed similar to Benton County for the purpose of evaluating the fully installed product in an operational environment.

2.12 TIMELINES

2.12.1 Planned Project Schedule

It is the intent of Benton County to have the implementation completed by 12/31/13. The following schedule of events is anticipated. Dates after RFP receive date may change depending on the need for a vendor conference call or demonstrations.

Event	Anticipated Completion Date
Issue RFP	6/xx/2014
Vendor Conference	Not Scheduled / None will occur after 6/XX/201
Receive Intent to Respond	5/XX/14 / Recommended, not required
Receive RFP Responses	6/XX/14
Select Preferred Responder	6/XX/14 Latest
Sign Contracts/Begin Implementation	7/XX/14 Latest
Complete Implementation	06/XX/15

Benton County will conduct appropriate follow up with the finalist respondent(s) to select the preferred system. These activities may include: interviews, demonstrations, site visits, reference checks, and any other activities considered necessary to make an informed selection ~~for Benton~~for Benton County.

2.13 RESPONSE FORMAT AND CONTENT

Elaborate documentation, expensive binding, detailed artwork, or other embellishments are neither necessary nor desirable. The responder may include additional information, such as an Executive Summary, but this will not be used in the final evaluation.

2.13.1 Response Instructions

The responder is expected to respond to sections 3 through 6. The first area of the functional requirements, Section 3, contains a list of the functional requirements by module. The second area, Section 4, contains technical requirements for the ATS. The third area, Section 5, includes Responder Experience, Implementation Strategy, and Capability. The final area, Section 6, includes cost.

Each responder will be provided Microsoft Word and Microsoft Excel documents in order to complete the RFP response (submit in pdf). It is the expectation of Benton County that the vendor use these documents, in their electronic form. Use of these documents will help to ensure a consistent response to this RFP.

A standard response of **Yes**/**NCMod**/**Planned**/**No**/Fee" in the "Vendor Response" fields are to be completed by each submitter.

> **Yes** = Included in standard package. **NCMod** = No Cost Modification. (System does not contain this feature but will be furnished at no cost.) **Planned** = Not included but planned in a future update (Must estimate when the feature will be available). **Fee** = Not available but will develop and implement for and additional fee (Estimate fee if possible) **No** = Not available.

An example is included in the sample table below

ID#	P	DEPT.	SUBJECT AREA	TITLE	DESCRIPTION	VENDOR RESPONSE	VENDOR NOTES
1101	3	Assessor	Appraisal Real Property - Requirements for all Property Types	Building Permit Information	The Application shall (at a minimum) have the ability to store building permit information such as: - Date the permit was issued - Jurisdiction issuing the permit - Permit number - Permit type, and accept permitting information from the Tidemark Application.	Yes	
72	3	Assessor	Appraisal Real Property - Requirements for all Property Types	Built Up Cost Display	The Application shall allow user to display and print, line by line, a build-up of the cost approach.	Planned	3/1/2014
376	2	Assessor	Appraisal Real Property - Requirements for all Property Types	Control of online field edit logic	On-line field edit logic shall be under the control of the systems administrator. The administrator shall be able to set field-level security access based on user log-in. Administrator shall also be able to set required fields without extensive programming or vendor intervention.	Fee	Est. $12000

Table 2.13.1-2 Requirements Designation Definitions

The "VENDOR RESPONSE" area of the specification may be as long as required, in order for all responses to be adequately addressed. If the vendor needs additional pages for the response, this is acceptable as long as the vendor response indicates the ID# (Leftmost column) of the requirement the response is referring to.

2.14 User Definition for Software License

For purposes of the software licenses provided in this agreement, "user" for each component of the system is to be defined as follows:

1. An individual that is actively accessing the operating system environment (requires an account on the system and a login to the system).

2. Each concurrent access to the application software is considered as one user for the ATS application license. Multiple Sessions originating from the same "user" are not considered as uniquely different access to the application software.

2.15 Evaluation Process

The Benton County ATS project team will review the responses to this RFP. This team includes representatives from Benton County Assessor, Treasurer and Information Technology. The project team will make recommendations to the Benton County Board of County Commissioners based on the written RFP response(s), demos of applications modules, references, and other criteria.

Due to short timelines associated with the schedule for this project it is suggested that responders meet the requirements of this RFP with standard, currently available products and services. This approach will ensure that minimum time and effort is spent in developing new products and that the associated costs will be as low as possible.

Negotiation of this contract will commence with the responder submitting the best proposal which best meets the needs of Benton County.

2.15.1 Cost

Overall five year cost, including software, software warranty, software assurance and hardware/software maintenance, and initial implementation costs, data conversion costs, training costs, and all other associated costs required in response to this RFP will be required. Pricing will be checked for completeness and mathematical accuracy. Errors and inconsistencies shall be handled according to the severity of the error. Minor mathematical errors will be called to the attention of the responder and responder will make corrections. Substantial errors will be reviewed with the responder or, at Benton County's option, the proposal may be disqualified.

Commented [ER21]: Reid

Formatted: Highlight

Formatted: Highlight

2.15.2 Functional Requirements

All proposals will be evaluated to ensure that they meet all functional requirements that are listed in the RFP section 3. Benton County will evaluate the overall functionality of the proposed system giving special attention to functions which are required to meet Washington State laws regarding Assessment and Taxation.

2.15.3 Technical Requirements

All other requirements of the proposal, including implementation plans, system maintenance plans and options will be evaluated in this category. The following list provides an overview of significant technical areas of concern.

- *Upward compatibility and migration path*
- *Conformance with industry standards adopted by Benton County*
- *Compatibility with Benton County Information Technology direction*

- *Integration with other Benton County operated systems including data import/export capability*
- *System Architecture*
- *Scalability*
- *Performance*
- *Information work flow processing methodology*

2.15.4 Responder Experience and Capability

This section includes responder references, credentials, experience, similar installations, and commitment. The following list provides an overview of the areas of interest.

- *Application software development plan and development methodology*
- *Demonstration of expertise in application area*
- *Comprehensive maintenance plan*
- *Hardware and software technical support*
- *Comprehensive training plan*
- *Key personnel assigned to project and resources available to ensure corporate commitment*
- *Past relevant experience with this type of project and ability to demonstrate relevant experience.*
- *Corporate commitment to products and product lines*
- *Demonstrated financial stability and commitment*

The responder must provide references, which contain elements of all modules sought in this proposal. Questionnaires may be sent to customer references by Benton County or contacted by telephone. Secondary references may also be contacted. If necessary, multiple references can be used.

Responder's references will be contacted and interviewed. Basic areas of concern will be:

- *Quality and performance of recommend equipment required to operate the ATS.*
- *Verification that proposed system performs as presented by respondent*
- *Installation of hardware and software*
- *Effective maintenance and technical support*
- *Review of any problems and their resolution*
- *Overall opinion of responder's performance and personnel*
- *Projected vs. actual costs*
- *Stability and performance to specification of product line*

Responses by responder's customers will be evaluated individually and as a whole. At the option of Benton County, negative responses may be reviewed with the responder if they are considered a singularity. Consistent unfavorable responses will have a negative effect on the evaluation and may warrant disqualification of a proposal.

Commented [ER22]: Reid: unnecessary restriction being subject to?

Section 3
Application Requirements

Section 3 Application Requirements

Question Instructions:

Please provide concise yet complete answers to each of the questions. If you choose not to respond to a question, please type "Not Applicable" and explain why you are not answering. You may compose your answers to encompass more than one question; however, if you do so, you must make it clear which questions are being addressed. You may include diagrams, examples, charts, etc., to answer the question. The ID numbers for each question are for internal Benton County use—please include them in your response. Please rate using the following:

Yes = Included in standard package. . **NCMod** = No Cost Modification. (System does not contain this feature but will be furnished at no cost.) **Planned** = Not included but planned in a future update (Must estimate when the feature will be available). **Fee** = Not available but will develop and implement for and additional fee (Estimate fee if possible) **No** = Not available. *See Section 2.3.1 for an example.*

Vendor Note* Section numbers may seem to not make sense or may be out of place due to some renumbering/sequencing or other organization task that were done. The ID numbers should still be in order.**

1.1. Appraisal – Real Property

1.1.1. Requirements for all property types

ID#		DEPT.	SUBJECT AREA	TITLE	DESCRIPTION	VENDOR RESPONSE	VENDOR NOTES
1		Assessor	Appraisal Real Property - Requirements for all Property Types	Building Permit Information	The Application shall (at a minimum) have the ability to store building permit information such as: - Date the permit was issued - Jurisdiction issuing the permit - Permit number - Permit type, and accept permitting information from the Tidemark Application.		
2		Assessor	Appraisal Real Property - Requirements for all Property Types	Built Up Cost Display	The Application shall allow user to display and print, line by line, a build-up of the cost approach.		
3		Assessor	Appraisal Real Property - Requirements for all Property Types	Control of online field edit logic	On-line field edit logic shall be under the control of the systems administrator. The administrator shall be able to set field-level security access based on user log-in. Administrator shall also be able to set required fields without extensive programming or vendor intervention.		
4		Assessor	Appraisal Real Property - Requirements for all Property Types	Copy/move characteristics	The Application shall provide the ability to copy and/or move selected property characteristics from one property to one or more properties.		
5		Assessor	Appraisal Real Property - Requirements	Edit Building Permit Information	The user shall be able to add, change or delete building permit information in the CAMA application. Example: When a building permit update from the Tidemark		

			for all Property Types		Application flags a property incorrectly, the user must be able to correct the permit information in the CAMA application.		
6		Assessor	Appraisal Real Property - Requirements for all Property Types	Equity Check Tool	The Application shall provide an online search and listing of comparable properties to check for assessment uniformity and equity.		
7		Assessor	Appraisal Real Property - Requirements for all Property Types	Field-by-field data editing	When the focus of the Application moves from one field to another, the exited field shall immediately check for proper data format rather than waiting until the user saves the screen. For example, when the user types an alpha character into a numeric-only field, then tabs to the next field, the first field shall immediately flag the problem for correction. Alternately, when the record is saved, the cursor focus shall automatically go to the first problem field, then tab progressively through the other problem fields.		
8		Assessor	Appraisal Real Property - Requirements for all Property Types	IAAO Standards	The Application shall meet IAAO standards.		
9		Assessor	Appraisal Real Property - Requirements for all Property Types	Land Valuation Components for Tax Relief programs	The Application shall store all of the land valuation components required to administer Washington State's Senior Citizen Exemption Program and the Current Use Assessment Program. Example: The Senior Citizen Exemption applies for up to one acre of land only. Excess acres are not included in the exemption calculation and are taxed at full market value.		
10		Assessor	Appraisal Real Property - Requirements for all Property Types	Linking to Multiple Digital Photographs	The Application shall support links to multiple digital photographs.		
11		Assessor	Appraisal Real Property - Requirements for all Property Types	Location and Grouping Identifiers	The Application shall provide fields for the identification of appraisal areas, neighborhoods, and sub-neighborhoods.		
12		Assessor	Appraisal Real Property - Requirements for all Property Types	Move To Function	The Application shall enable users to move building characteristics from one PAN to a different PAN (pictures and sketches should follow building). In the case of multiple buildings on one account, user is able to move any one or all of the buildings from one PAN to another PAN. Various value approaches applicable to each moved building follow building to new PAN (pictures and sketches should follow building). PAN = Property Account Number		

13		Assessor	Appraisal Real Property - Requirements for all Property Types	Overrides for Value Calculations	When a user overrides an Application generated value, the override shall show the date, the user's name, reason for the override, assessment year applied, and a future date for override reviews.		
14		Assessor	Appraisal Real Property - Requirements for all Property Types	Property Characteristic Fields	The Application shall incorporate property characteristics needed to enable the development and maintenance of sophisticated cost, market, and income models.		
15		Assessor	Appraisal Real Property - Requirements for all Property Types	Property Types	The Application shall provide multiple fields to identify different property types, uses, and classifications.		
16		Assessor	Appraisal Real Property - Requirements for all Property Types	Simultaneous processing of multiple years' data	The Application shall support the simultaneous processing of multiple years data, both real property data and personal property data.		
17		Assessor	Appraisal Real Property - Requirements for all Property Types	System defaults	The Application shall allow user-definable defaults and limits for individual fields (e.g., Maximum house size = 25,000 s.f.) at the point of data entry.		
18		Assessor	Appraisal Real Property - Requirements for all Property Types	System Hard Copy Output - Forms / Mailings	The Application shall enable user to produce property record cards, standard forms and form letters for sales verifications, income/ expense data collection, and current use production questionnaires.		
19		Assessor	Appraisal Real Property - Requirements for all Property Types	Updates to main database and sales database	The Application shall provide the ability to update information on the main Application and sales module by entering the information only once. The user has the choice whether or not to update both simultaneously or just one.		
20		Assessor	Appraisal Real Property - Requirements for all Property Types	Value Exemption < $500.00 Real property	The Application shall accommodate Washington State's value exemption of certain properties that are exempt if the assessed value is < $500.00. See RCW 84.36.015.		
21		Assessor	Appraisal Real Property - Requirements for all Property Types	Value Summary Display	The Application shall display the detail of values per building component produced by the cost approach on a year-by- year basis.		

1.1.2. Appraisal Tables

This subject area includes any and all components leading to the assessed valuation (land and structures) that are put into tables for use in a mass appraisal application in order to maintain the uniformity of appraisals. We assume that these tables address individual components as well as lump sum adjustments. Examples include base rates, unit values, economic factors, etc.

ID#		DEPT.	SUBJECT AREA	TITLE	DESCRIPTION	VENDOR RESPONSE	VENDOR NOTES
22		Assessor	Appraisal Real Property - Appraisal Tables	A - Land Tables	The Application shall use land tables to value land.		
23		Assessor	Appraisal Real Property - Appraisal Tables	A - Land Tables	The Application shall provide an automated approach to valuing land, utilizing rate tables that can be set up on an acreage, square foot, front foot, or site value basis by year.		
24		Assessor	Appraisal Real Property - Appraisal Tables	Auto Update Cost Tables	The Application shall provide an automated process to update cost tables as needed.		
25		Assessor	Appraisal Real Property - Appraisal Tables	Cost Approach	The Application shall allow users to add new codes by updating cost schedules and data libraries without program modifications.		
26		Assessor	Appraisal Real Property - Appraisal Tables	Cost Approach	The Application shall store cost values for all fields and allow access through downloads. Examples: 1,000 s.f. main floor X $80.00/s.f. = $80,000 (stored value) 8 bath fixtures X $400/fixture = $ 3,200 (stored value) 2 fireplaces X $1800/fireplace = $ 3,600 (stored value)		
27		Assessor	Appraisal Real Property - Appraisal Tables	Cost Multipliers	The Application shall allow a user to apply cost multipliers and local multipliers by assessment year.		
28		Assessor	Appraisal Real Property - Appraisal Tables	Cost Tables	The Application shall allow users to create, store, modify, access and apply separate sets of cost tables from multiple sources for each property type. (Examples of sets of cost tables would include 1) Marshall & Swift, 2) User built table from local building costs, 3) NADA for mobile homes, 4) other nationally recognized cost table services.		
29		Assessor	Appraisal Real Property - Appraisal Tables	Cost Tables - Local Cost Modifiers	The Application shall provide a local cost modifier for each geographic area (Cycle, NH, City etc....) and for each property type.		
30		Assessor	Appraisal Real Property - Appraisal Tables	Cost Tables - Local Cost Modifiers	The Application shall allow the user to employ a current cost modifier for each building quality class.		
31		Assessor	Appraisal Real Property - Appraisal Tables	Cost Tables: Input/Output	The Applications cost tables shall allow for values per square foot, and/or linear foot and/or lump sum values by size, class, quality, style, (e.g., Avg Landscaping = Lump sum $5,000 / Good Landscaping = Lump sum $10,000 / Excellent Landscaping = Lump sum $25,000)		
32		Assessor	Appraisal Real Property - Appraisal Tables	Cost Tables: Input/Output	The Application shall allow users to enter cost data into land improvements tables (e.g., sewer lines, water lines, septic systems, tennis courts, landscaping, and asphalt).		

33		Assessor	Appraisal Real Property - Appraisal Tables	Cost Tables: Input/Output	The Application shall allow users to apply costs in any combination listed below: 1. Universally across all parcels in assessment jurisdiction 2. By specified property types 3. By specified Neighborhoods 4. By specified Cycles 5. By plat 6. By individual property account number		
34		Assessor	Appraisal Real Property - Appraisal Tables	Cost Tables: Input/Output	The Application shall allow the user to manually change individual cost data records for all cost tables.		
35		Assessor	Appraisal Real Property - Appraisal Tables	Cost Tables: Input/Output - Partial print out	Some cost tables are very large and would be hundreds of pages if printed in total. The Application shall allow users to print a hardcopy of a selected portion of a table.		
36		Assessor	Appraisal Real Property - Appraisal Tables	Depreciation Tables	The Application shall allow users to apply depreciation tables by Marshall & Swift OCCUPANCY codes.		
37		Assessor	Appraisal Real Property - Appraisal Tables	Depreciation Tables	The Application shall allow users to apply depreciation tables by user-defined ranges.		
38		Assessor	Appraisal Real Property - Appraisal Tables	Depreciation Tables	The Application shall allow for multiple depreciation tables.		
39		Assessor	Appraisal Real Property - Appraisal Tables	Depreciation Tables	The Application shall allow the user to enter an unlimited number of depreciation tables.		
40		Assessor	Appraisal Real Property - Appraisal Tables	History: Table Storage	The Application shall keep historical copies of all cost tables by assessment year in at least two formats: 1) Read Only 2) Active (For correcting prior years values)		
41		Assessor	Appraisal Real Property - Appraisal Tables	History: Table Storage	The Application shall keep a historical copy of all land value tables by assessment year in at least two formats: 1) Read Only 2) Active / Live (For correcting prior years values, segs etc….)		
42		Assessor	Appraisal Real Property - Appraisal Tables	Mobile Home Tables	The Application shall provide cost rate and depreciation tables for single-wide, double-wide and triple-wide mobile homes.		
43		Assessor	Appraisal Real Property - Appraisal Tables	Table Maintenance 1	After changes to any value related table have been made, the Application shall require the user to manually authorize its deployment to the database so that no value changes occur until approved by the user.		
44		Assessor	Appraisal Real Property - Appraisal Tables	Table Maintenance 2	Upon user authorization, table changes shall automatically recalculate all associated property records.		
45		Assessor	Appraisal Real Property - Appraisal Tables	Table Maintenance 3	The Application shall allow the user to override automatic recalculation and apply updates at specified time.		

46		Assessor	Appraisal Real Property - Appraisal Tables	Tables: Input/Output	The Application shall allow for batch import and export of data (using industry standard software such as .xls, .mdb or .dbf files) into or out of the CAMA Application, for all appraisal table data.		
47		Assessor	Appraisal Real Property - Appraisal Tables	Unlimited Table Versions	The Application shall allow unlimited versions of all tables in the same assessment year.		
48		Assessor	Appraisal Real Property - Appraisal Tables	View Appraisal Tables	The Application shall enable users to view all tables on-line (on screen), or in printed form (e.g., land rate tables, land add on tables, cost tables, etc.).		

1.1.3. Commercial

An acceptable replacement application will include the ability to build a value from multiple segments of a property using multiple methods for each.

ID#		DEPT.	SUBJECT AREA	TITLE	DESCRIPTION	VENDOR RESPONSE	VENDOR NOTES
49		Assessor	Appraisal Real Property - Commercial	Cost, Market or Income Used to value different building segments	The Application shall allow users to build a total assessed value from multiple segments of a property using multiple methods for each segment (e.g., a portion of a building may have a single purpose use valued with the cost approach and a portion of the building adaptable to many uses which would typically be valued with the income approach).		
50		Assessor	Appraisal Real Property - Commercial	Income Approach	The Application shall capture gross rent, vacancy and collection loss, miscellaneous income, and itemized expenses, for all property types.		
51		Assessor	Appraisal Real Property - Commercial	Income Approach	The Application shall calculate and display common value denominators (units of comparison) such as, Value per Unit, Value per Room, etc.		
52		Assessor	Appraisal Real Property - Commercial	Income Approach - Data Fields - Operating Expenses	The Application shall allow for a line-item listing of a parcel's operating expenses in the income approach record, both as a % of EGI or as a set dollar amount (as opposed to our current capability of one lump sum % adjustment) or as a dollar per s.f. value.		
53		Assessor	Appraisal Real Property - Commercial	Income Approach - Data Handling	The Application shall allow a user to store, view and print both an estimated and an actual income and expense statements. Actual income and expense information is confidential and must be treated accordingly.		
54		Assessor	Appraisal Real Property - Commercial	Income Approach - Data Handling	The Application shall prevent non authorized users from viewing, accessing, downloading and/or exporting confidential income and expense data.		

55		Assessor	Appraisal Real Property - Commercial	Income Approach - Direct Capitalization & Gross Rent Multiplier	The Application shall allow the valuation of income-producing property using the direct capitalization and gross rent multiplier method or gross income multiplier method.		
56		Assessor	Appraisal Real Property - Commercial	Income Approach - Discounted Cash Flow & Mortgage Equity	The Application shall allow the valuation of commercial property using other methods such as: 1) discounted cash flow and 2) the mortgage equity method.		
57		Assessor	Appraisal Real Property - Commercial	Income Approach – Display+	The Application shall enable the user to display and print, line by line, a build-up of the income approach including land values from other parcels, personal property deductions, market indexes, and adjustment factors used. (This specification is intended to replace our current income approach screen, as shown in Appendix H, Income Screen Sample)		
58		Assessor	Appraisal Real Property - Commercial	Income Approach - Income and Expense Data Maintenance	The Application shall allow a user to update valuation components by applying a multiplicative factor to the following: rent tables, vacancy tables, expense tables and cap rate tables.		
59		Assessor	Appraisal Real Property - Commercial	Income Approach - Income Streams	The Application shall allow and store multiple income types for each income segment. (e.g., various rent types: Contract Rent vs. Market Rent)		
60		Assessor	Appraisal Real Property - Commercial	Income Approach - Income Streams	The Application shall allow the user to enter, track, and employ multiple income streams on each parcel in the development of a value using the income approach. Examples of multiple income streams: 1) a four story building where each floor has a different rent or 2) even on the same floor suites with a view of the mountains have a higher rent than those on the opposite side with a view of the freeway or 3) multiple buildings on one property account number, where each building has a different rent level		
61		Assessor	Appraisal Real Property - Commercial	Income Approach - Model Development	The Application shall provide for the development of models comprised of typical income, expense, and capitalization rate figures that can be applied to subject properties within the same strata.		
62		Assessor	Appraisal Real Property - Commercial	Income Approach - Multiple Land Accounts	The Application shall allow land value from other parcels to be brought into the subject property's income stream.		
63		Assessor	Appraisal Real Property - Commercial	Income Approach - Multiple Uses in one Building	In all approaches to value, the Application shall allow user to designate each floor and/or building section with a specific property type code. (e.g., multi-storied commercial buildings such as the Vancouver Center or the First Interstate Tower, both mixed use developments).		
64		Assessor	Appraisal Real Property - Commercial	Income Approach - Personal Property	The Application shall allow for a deduction of personal property value in all approaches to value.		

65		**Assessor**	**Appraisal Real Property - Commercial**	**Income Approach - Rent Survey Flag**	**When utilizing the income approach, the Application shall notify users that the subject property had a rent survey returned.**		
66		**Assessor**	**Appraisal Real Property - Commercial**	**Income Approach - Statistical Analysis**	**The Application shall provide the capability to calculate median and mean rent per unit of measure, expense ratios, market rents, vacancy levels, gross income multipliers, and overall capitalization rates for any strata of commercial property.**		
67		**Assessor**	**Appraisal Real Property - Commercial**	**Income Approach - Summary**	**The Application shall display the detail of values produced by the income approach on a year-by-year basis.**		
68		**Assessor**	**Appraisal Real Property - Commercial**	**Income Approach - Survey Flag**	**When a rent survey has been returned on a parcel, the Application shall run a duplicate income approach display concurrently with the standard income approach display (with tabled values) so that the survey data can be utilized to value the parcel. Between the two displays, the appraiser decides which value to use.**		
69		**Assessor**	**Appraisal Real Property - Commercial**	**Income Approach - Tables - Access to**	**The Application shall use data gathered and input from research to create internal tables for use in the income approach. The appraiser shall be able to request, by various parameters (i.e., property type code, neighborhood, cycle), a calculated average of any table factor (dollar per square foot, average rental price per unit, average expense ratios, etc) from this table. The appraiser shall have the choice of allowing the Application-generated factor to populate the income approach fields or input a factor of their own choosing.**		
70		**Assessor**	**Appraisal Real Property - Commercial**	**Income Approach - Tables - Autofill**	**Data entered from responses to the rent and expense survey/questionnaire include rental values per square foot, expense ratios, vacancy rates, etc shall be stored in a table(s). The Application shall allow users to choose at the time of entry whether or not the data is valid for use in the market tables, or solely for viewing purposes. This data shall be available for analysis and/or use in the income approach.**		
71		**Assessor**	**Appraisal Real Property - Commercial**	**Income Approach - Tables and Mass Application**	**The Application shall allow income and expense models to be developed, saved and applied in mass to parcels based on user defined selection criteria (E.g. Neighborhood, Cycle, Property Type, etc….)**		
72		**Assessor**	**Appraisal Real Property - Commercial**	**Income Approach - worksheets**	**The Application shall provide an income and expense worksheet (similar to those found in Appraisal Textbooks and the Marshall & Swift cost factor book) with the ability to link the worksheet to the appropriate benchmark account.**		

73		Assessor	Appraisal Real Property - Commercial	Income Approach-GRM	When valuing a Multi-Family property using a GRM, the Application shall allow a line item adjustment for personal property.		
74		Assessor	Appraisal Real Property - Commercial	Income Approach-Income Stream	The Application shall allow users to identify and associate (allocated) an income stream to a specific building section and/or building floor as needed.		
75		Assessor	Appraisal Real Property - Commercial	Income Approach-MF-GIM	The Application shall enable users to value multi-family properties (e.g.: duplex, triplex+>, apartment complexes) using a GIM (Gross Income Multiplier).		
76		Assessor	Appraisal Real Property - Commercial	Income Approach-MF-GRM	The Application shall be able to value multi-family properties (e.g.: duplex, triplex+>, apartment complexes) using a GRM (Gross Rent Multiplier).		
77		Assessor	Appraisal Real Property - Commercial	Income Approach-MF-GRMs	The Application shall allow multiple GRMs (or GIMs) on one parcel.		
78		Assessor	Appraisal Real Property - Commercial	Income Approach-MF-Misc.Rents	Multi-family property owners often charge a separate rent for parking spaces, carports and/or garages. The Application shall be able to track these rents separately from the base unit rents. (If not available, explain in notes.)		
79		Assessor	Appraisal Real Property - Commercial	Income Approach-Personal Property	The Application's income approach shall allow for the addition of personal property value (e.g., Company Reports would show land, building and M&E values).		

1.1.4. Data Characteristics

In Benton County, all physical attributes, amenities, and conditions affecting value need to be recorded on the Property Account Number.

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
80		Assessor	Appraisal Real Property - Data Characteristics	Building Condition	The Application shall allow multiple building condition descriptions (E.g. Fair, Good, Average etc….)		
81		Assessor	Appraisal Real Property - Data Characteristics	Building Quality Classes - All Properties	The Application shall allow for at least 24 base building quality classes for each property type.		
82		Assessor	Appraisal Real Property - Data Characteristics	Building Quality Classes - Other Structures	The Application shall allow multiple quality classes (expandable as needed) for all structures and other improvements. By all structures we mean SFR's, commercial, industrial, condos, multi-family, outbuildings, tennis courts, pools, detached garages, accessory dwelling units etc.		

83		Assessor	Appraisal Real Property - Data Characteristics	Building Style	The Application shall allow multiple building styles. (E.g. ranch, 2-story, split level, bi-level, log cabin, etc….) (Explain any limitations to the number of allowed styles.)		
84		Assessor	Appraisal Real Property - Data Characteristics	Data Exchange Between Property Types	The Application shall provide the capability to transfer records between property types, such as residential and commercial, for change of use, valuation and/or characteristics.		
85		Assessor	Appraisal Real Property - Data Characteristics	Information Source ID Codes	The Application shall enable the user to tag property characteristics with identifiers as to the source of the information, such as Benton County user ID, taxpayer, fee appraiser, realtor, home inspector etc.		
86		Assessor	Appraisal Real Property - Data Characteristics	Land Characteristics	The Application shall separate the land component of a single parcel into specific land categories (home site, low, wet, rolling, flat etc.) by standard units of measurement (Sq. Ft., acres, lineal feet) each with its own value component.		
87		Assessor	Appraisal Real Property - Data Characteristics	Land Characteristics	On each land record, the Application shall allow for a location identifier (N, NW, NE, S, SW, etc.) per land sub-category.		
88		Assessor	Appraisal Real Property - Data Characteristics	Land Characteristics	On each land record, the Application shall allow sub-category identifiers, such as corner, pad site, prime land, contaminated etc… Identifiers can then be linked to a value table, coefficient, or percentage adjustment.		
89		Assessor	Appraisal Real Property - Data Characteristics	Land Characteristics	The Application shall accommodate different units of measure for land value, including, square foot, front foot, acre, and number of homesites and shall have separate fields for each unit of measurement.		
90		Assessor	Appraisal Real Property - Data Characteristics	Land Classification - Improved and Unimproved	The Application shall allow the user to code each line item of land as either improved or unimproved.		
91		Assessor	Appraisal Real Property - Data Characteristics	Land Dimensions	The Application shall allow the user to enter actual dimensions of a parcel (e.g., 50' x 100').		
92		Assessor	Appraisal Real Property - Data Characteristics	Multiple Floor SFR's / Condos	The Application shall allow separate data entry for each floor of a building.		
93		Assessor	Appraisal Real Property - Data Characteristics	Residential - Multiple Stories	The Application shall allow for 4 or more above ground stories on a single-family residential structure. If not available, please explain how a multiple story structure is entered in your Application.		

1.1.5. Photos and Sketches

Selected application shall allow photos and sketches to be created and linked to property records.

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
94		Assessor	Appraisal Real Property - Photos and Sketches	Building square footage	The CAMA Application's building square footage shall automatically reflect the building square footage from the building sketch.		
95		Assessor	Appraisal Real Property - Photos and Sketches	Data Entry Without a Sketch	The user shall be able to value all structures regardless of whether or not a sketch is associated to the property.		
96		Assessor	Appraisal Real Property - Photos and Sketches	Sketch - Copy	The user shall have the ability to copy a sketch from one parcel to one or more parcels.		
97		Assessor	Appraisal Real Property - Photos and Sketches	Sketch - Edit	The user shall have the ability to edit a sketch without the need to re-enter data. For example: We would like to add an addition to an existing sketch, without the need to redraw the original sketch.		
98		Assessor	Appraisal Real Property - Photos and Sketches	Sketch - Entering a Sketch	The Application shall allow the user to control the size and locations of dimensions, labels, annotations, and notes.		
99		Assessor	Appraisal Real Property - Photos and Sketches	Sketch - Entering a Sketch	The user shall be able to shade specific building areas, specify line widths, shading colors, etc.		
100		Assessor	Appraisal Real Property - Photos and Sketches	Sketch - Entering a Sketch	The user shall be able to use patterns such as diagonal lines, dots, etc. covering a selected area of the building.		
101		Assessor	Appraisal Real Property - Photos and Sketches	Sketch - Entering a Sketch	The user shall be able to easily sketch irregular shapes (rounded surfaces, angles) for improvements and all structures, including pools.		
102		Assessor	Appraisal Real Property - Photos and Sketches	Sketch - Entering a Sketch	The user shall be able to place annotations in various sections of the sketch showing year built.		
103		Assessor	Appraisal Real Property - Photos and Sketches	Sketch - Multiple buildings	The Application shall support multiple building sections and structures per property with full sketch and/or identification as to approximate location on property.		
104		Assessor	Appraisal Real Property - Photos and Sketches	Sketch - Zoom	The user shall have the ability to zoom in and out during sketching, editing and viewing.		

105		Assessor	Appraisal Real Property - Photos and Sketches	Sketch Viewing	The Application shall allow for user-identified on-line viewing without access to update capabilities. (Security access profile for read-only users)		

1.1.6. Physical Inspections and Data Collection

Our appraisers need to arrive on site with all tools necessary to accurately document all characteristics contributing to the value of a parcel. This would include, but is not limited to, parcel data from the CAMA system, photographs, sketches and maps.

A strategic goal for the Assessor office is to have seamless integration between the CAMA system and portable field devices in such a way that data transfers are direct and no intermediary conversion process or third parties are needed to move field data off a field device into the CAMA system.

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
106		Assessor	Appraisal Real Property - Physical Inspections and Data Collection	E-Building Cards (AKA Field Sheets) - Digital Copy - Field Device Compliant	Application shall enable user to export or download specified property characteristics and digital images to a field device (PDA, Laptop PC, Tablet Computer). Application shall enable the appraiser to select parcel characteristics, digital images, and sketches by any user defined criteria including at the minimum by: 1. Cycle Number (With careful controls in place - this will generate 1,000's of records) 2. Neighborhood Number 3. Parcel Number		
107		Assessor	Appraisal Real Property - Physical Inspections and Data Collection	E-Building Cards (AKA Field Sheets) - Hard Copy - Print Run	The Application shall allow the appraiser to: a: Query the parcel database by user identified criteria, to identify parcels to include in a revaluation area b: Gives user option to set nested sort order of query output (e.g. By NH, by Geocode, by PAN) c: The Application shall prompt the user with selection criteria and sort order and identifies # of parcels in print run; then allows user to cancel or proceed with print run to generate hard copies of field sheets.		
108		Assessor	Appraisal Real Property - Physical Inspections and Data Collection	Land & Building Characteristics	The Application shall allow the user to indicate when property characteristics are estimated.		
109		Assessor	Appraisal Real Property - Physical Inspections and Data Collection	Neighborhood Groupings	The Application shall allow user to create neighborhoods of properties by user defined parameters, such as: property account number, geocode ranges, property type codes, building class, building style, etc…. And save data to a file for future analysis.		

110		Assessor	Appraisal Real Property - Physical Inspections and Data Collection	Portable Computing Device - transmission of data	The Application shall accommodate cellular, radio, or microwave transmission of data from field to host.		
111		Assessor	Appraisal Real Property - Physical Inspections and Data Collection	Portable Computing Devices -	The Application shall have upload and download capability between the Application and a portable computing device.		
112		Assessor	Appraisal Real Property - Physical Inspections and Data Collection	Portable Computing Devices - data copy	The Application shall enable users to copy inspection data and characteristics from one property account number to another for speedy collection. (Useful in a subdivision with "same as" buildings).		
113		Assessor	Appraisal Real Property - Physical Inspections and Data Collection	Portable Computing Devices - Field Module	The Application shall have a module for use on a portable computing device that will facilitate field activities including data collection, data correction, valuation, measuring - sketching, GPS guidance, digital map displays, and workflow management tools for efficient inspection routing. If you answer yes, please explain which of the above activities your Application does and any limitations.		
114		Assessor	Appraisal Real Property - Physical Inspections and Data Collection	Portable Computing Devices - sketching	The Application shall provide full sketch drawing data entry and editing on a portable field device.		
115		Assessor	Appraisal Real Property - Physical Inspections and Data Collection	Portable Computing Devices - transmission of data	A strategic goal for the Assessor office is to have seamless integration between the CAMA Application and portable field devices. The Application shall allow direct data transfers without requiring an intermediary conversion process or third parties in order to move field data off a field device into the CAMA Application or vice versa.		
116		Assessor	Appraisal Real Property - Physical Inspections and Data Collection	Query: Product: Rent and Sales Surveys - Output	Application shall allow appraiser to generate rent and sales surveys by any one or more of the following criteria / sorts: 1. Neighborhood Number 2. Cycle Number 3. Primary Property Type (AKA PT1) 4. Secondary Property Type (AKA PT2) 5. Sale Price Range (e.g., Sales >$10,000; or Sales between 10,000 and $1,000,000) 6. Sale Date Range 7. Excise Number In the case of an IOP Sale (IOP = Includes Other Parcels), the Application shall combine property characteristics into one survey.		

117		Assessor	Appraisal Real Property - Physical Inspections and Data Collection	Report: Identify Parcels	Application shall allow user to query property account database by any user defined criteria (e.g. NH, Cycle, plat, etc…) or combination of criteria with output exportable to industry standard programs (e.g. MS Excel, MS Access, SPSS)		

1.1.7. State-assessed Utilities

The new system shall accommodate the assessment of state assessed utility accounts for real property according to RCW Chapter 84.12. The accounts, their respective assessed values and tax code areas must be tracked, as the information is needed for the levy calculation/certification process.

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
118		Assessor	Appraisal Real Property - State-assessed Utilities	State Assessed Utilities - Real property	The Application shall allow the user to enter state-assessed utilities for real property and process them through the assessment roll, levy calculation & certification, tax roll and tax collection as required by Washington State Law RCW 84.12.all.		

1.1.8. Valuation

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
119		Assessor	Appraisal Real Property - Valuation	Adjustment Indexes: Functional, Economic, Market	The Application shall enable user to apply multiple adjustments for the physical, functional, and economic obsolescence; location and market influence adjustments for factors that affect property values. Additionally, each adjustment can be identified with a explanation code. Each adjustment can be associated with a sunset date. (E.g. 10 ~~yr~~yr. tax break on CBD housing)		
120		Assessor	Appraisal Real Property - Valuation	Administrative Segregation	The Application shall provide a method to display all related parcels (in the administrative segregation) together with a summary of key property information.		
121		Assessor	Appraisal Real Property - Valuation	Administrative Segregation	The Application shall allow for the segregation of a parcel or a portion of a parcel (land or building) not based on a legal description or transfer but based on an administrative reason. Examples include a portion of a taxable office building used by a ~~non taxable~~nontaxable tenant, we would seg out the ~~Sq.Ft.~~Sq.Ft of the tax exempt portion of the building. Another example would be Officer's Row were we have one (1) parcel and twenty-two (22) buildings with each building segregated out to a building-only account for tracking purposes.		

122		Assessor	Appraisal Real Property - Valuation	Annual Adjustment - "Do Not Adjust" Flags	The Application shall allow coding of individual properties with a flag or marker that prevents the annual adjustment from being applied. (e.g., MF rent restricted properties, Contaminated properties, Unique Properties).		
123		Assessor	Appraisal Real Property - Valuation	Annual Assessment	The Application shall identify different value components (e.g. market value, assessed value, land use value) and annually adjust each component separately.		
124		Assessor	Appraisal Real Property - Valuation	Annual Assessment	The user shall have the ability to apply percentage adjustments to either land value, building value or both. These adjustments shall be able to be applied to groups of parcels based on user defined criteria including but not limited to: Property Account Number, Building Style, Building Class, , Occupancy Code, Effective Age, Actual Age, GLA, Property Type, Zoning, Site Size, Neighborhood Code, Cycle Code, or County-wide).		
125		Assessor	Appraisal Real Property - Valuation	Annual Assessment	The Application shall be able to analyze sales ratio statistics by user defined selection criteria. This module provides the necessary information to make comparisons between classes and locations and identify categories with differences in value level or variance. These categories can then be checked to determine if adjustments are required.		
126		Assessor	Appraisal Real Property - Valuation	Annual Assessment	Stores all percent adjustment changes by assessment year in a sortable program or exportable to a sortable program.		
127		Assessor	Appraisal Real Property - Valuation	Annual Assessment	The Application shall allow land and building values to be updated by applying percentage adjustments.		
128		Assessor	Appraisal Real Property - Valuation	Annual Assessment	The Application shall provide a trending technique for determining the value of real property using acquisition cost/sale price with time adjustments backwards and forwards for inflation or deflation rates.		
129		Assessor	Appraisal Real Property - Valuation	Automated Value Approach Override	The Application shall have a "default" valuation approach with an appraiser override feature where the user can select an alternate valuation approach in the reconciliation process.		
130		Assessor	Appraisal Real Property - Valuation	Benchmark Properties	The Application allows users to establish benchmark properties.		

131		Assessor	Appraisal Real Property - Valuation	Building Value Adjustments / Add ons - Building Miscellaneous Table	Building Add On Module: Treat each statement below as a separate question as it relates to an Add On Module The Application shall allow dollar adjustments (add to or subtract from base value) for specific building characteristics and/or influences to building value (LP Siding Adjustment, development fees [vary by jurisdiction], permitting costs, park & school impact fees, view [for condos downtown with no land value or on 99 yr leased land], locational factors not accounted for in the land model etc.) The Application's Building Add On records shall be unlimited and can be grouped by multiple identifiers (e.g. neighborhood, cycle, plat, city, County, property type) Can be batch uploaded and applied. Can be manually entered on individual basis. Allows percentage adjustments to each Add On field (AA) by user defined criteria (e.g. NH#, Cycle, Prop Type ~~etcetc~~.). As an alternate to a set dollar amount, allows same Add-On record to be a percent of the base building value prior to calculating Add-Ons. In this scenario, an AA adjustment to the building automatically adjusts the Add-On value.		
132		Assessor	Appraisal Real Property - Valuation	Characteristics For Mobile Homes	The Application shall have the ability to store multiple attributes on mobile homes including: Make and model, length and width, serial number as shown on the vehicle title registration, etc.		
133		Assessor	Appraisal Real Property - Valuation	Comparable Sale Approach	Comparable sales approach has the ability to individually or universally adjust selection weights and characteristic adjustments. Supports separate property selection weights and property characteristic value adjustments (dollars and percentage).		
134		Assessor	Appraisal Real Property - Valuation	Comparable Sales	Within the sales approach model, the Application shall allow for the selection of comparable sales within a user defined radius. (E.g. .25 mile from subject, 1 mile, 3 miles etc.....)		
135		Assessor	Appraisal Real Property - Valuation	Comparable Sales Algorithm	The Application shall allow for the selection of comparable sales based on a statistical algorithm utilizing a set of user-defined criteria and weights.		
136		Assessor	Appraisal Real Property - Valuation	Comparable Sales Grid - Display / Output	Comparable sales approach displays individual property characteristics for subject and comparable property, and auto-calculates individual and gross comparable property adjustments. The Application shall allow export of comparable sales grid in report format (paper and digital)		
137		Assessor	Appraisal Real Property - Valuation	Comparable Sales Selection Override	The Application shall allow users to override the Application-selected comparable and/or individual characteristic adjustments. The Application shall recalculate values based on the new comparable and/or adjustment rates.		

138		Assessor	Appraisal Real Property - Valuation	Comparable Sales Selection Override	The Application shall utilize ~~a user-defined comparable selection criteria~~user-defined comparable selection criteria to search for comparable sales which results in an Application-recommended value.		
139		Assessor	Appraisal Real Property - Valuation	Condition Modifier Tables	The Application shall allow a percentage adjustment (positive or negative) against the DRCN for condition factors (e.g. worn out, fair, avg., good, very good, excellent, etc.)		
140		Assessor	Appraisal Real Property - Valuation	Condominiums	The Application's method of valuing condominiums shall incorporate the same functionality and methodology available for single family residential structures.		
141		Assessor	Appraisal Real Property - Valuation	Contiguous Land Valuation	The Application shall provide an effective means of identifying and valuing contiguous land with the same owner (regarding valuation: at the minimum by acres and by sq. ft. tables) that allows valuation as one larger parcel.		
142		Assessor	Appraisal Real Property - Valuation	Cost Approach	The Application shall support replacement cost new (RCN) calculations based on the comparative unit and unit-in-place methods. The comparative unit method provides for the automated addition of items not included in the base rates and the deletion of items that are included in the base rates.		
143		Assessor	Appraisal Real Property - Valuation	Cost Approach: RCN and RCNLD	The Application shall calculate a replacement cost new (RCN) and replacement cost new less depreciation (RCNLD).		
144		Assessor	Appraisal Real Property - Valuation	Depreciation Override	The Application shall enable users to apply different depreciation amounts to different buildings on the same property and allow user override.		
145		Assessor	Appraisal Real Property - Valuation	Dollar Adjustment	After calculating RCNLD, the Application shall allow users to add a positive or negative lump sum dollar adjustment to adjust the building value.		
146		Assessor	Appraisal Real Property - Valuation	Final Value Reconciliation	The Application shall support a value reconciliation process within the comparable sales approach and between other valuation approaches to derive final reconciled assessed value estimate.		
147		Assessor	Appraisal Real Property - Valuation	Global Update / Upload	The Application provides global update and ~~upload~~uploads capabilities for groups of records that include common characteristics. The Application shall also enable user to finalize the values of selected groups of records.		
148		Assessor	Appraisal Real Property - Valuation	Land Valuation	The Application shall Incorporate the development of land valuation models by all tracked land characteristic fields including but not limited to zoning, property type, location, and unit of comparison.		
149		Assessor	Appraisal Real Property - Valuation	Land Valuation	The Application shall provide an automated approach to valuing land utilizing rate tables that can be set up on ~~an acreage~~acreage, square foot, front foot or site value basis either for a batch process for multiple accounts or for a		

					single parcel.		
150		Assessor	Appraisal Real Property - Valuation	Land Valuation - Special Assessments	The Application shall allow for the calculation of land values based on Current Use legislation.		
151		Assessor	Appraisal Real Property - Valuation	Land Value	The Application shall track land by topography categories (low, flat, steep, wet etc.) with the ability to apply an adjustment factor specific to each topography category per parcel.		
152		Assessor	Appraisal Real Property - Valuation	Land Value Adjustments - Batch Adjustments (AA)	The Application shall allow percentage adjustments to base land value tables to reflect influences that may not be typical in the neighborhood (development issues, access)		
153		Assessor	Appraisal Real Property - Valuation	Land Value Adjustments - Individual	The Application shall allow percentage adjustments to land values on parcel-by-parcel, line-by-line basis to reflect influences that may not be typical in the neighborhood (development issues, access).		
154		Assessor	Appraisal Real Property - Valuation	Land Value Adjustments / Add ons - Land Miscellaneous Table	Apart from Base Land Value Tables, the Application shall have a separate way of tracking and adding incremental land value attributable to miscellaneous factors, such as well, septic, view, easements, traffic, and noise influences.		
155		Assessor	Appraisal Real Property - Valuation	Market Approach	The Application shall produce market value estimates using comparable sales.		
156		Assessor	Appraisal Real Property - Valuation	Market Approach	The Application shall include the ability to extract sold properties from the master sales file and build a sales history file on the subject property for sales analysis purposes.		
157		Assessor	Appraisal Real Property - Valuation	Miscellaneous Real Property Assessments	The Application shall provide the ability to assess boathouses, houseboats, mobile homes, airplane hangars, decks, carports, leased buildings, etc. under their own property account numbers, independent from the land on which these improvements might be located.		
158		Assessor	Appraisal Real Property - Valuation	Multiple Building Value Calculation & Tracking	The Application shall display all records associated with any parcel (e.g., mobile homes and land parcels, parcels with two homes, contiguously assessed parcels) and calculate the overall value of all records while maintaining and displaying separate values.		
159		Assessor	Appraisal Real Property - Valuation	Multiple valuation approaches	The Application shall allow users to select ~~either the~~the cost approach, direct comparable sales approach, the income approach or a combination of the three approaches to value for each property.		

160		Assessor	Appraisal Real Property - Valuation	New Construction - % complete field	In all approaches to value, for each building or structure on a parcel, the Application shall have a separate percent complete field that automatically adjusts the building or structure value relative to the building or structure's overall percent complete.		
161		Assessor	Appraisal Real Property - Valuation	Obsolescence calculations in each Appraisal Method	In each value approach, the Application shall have field(s) to capture and apply appraiser's calculation of: 1) Functional Obsolescence 2) Economic Obsolescence 3) Physical Obsolescence		
162		Assessor	Appraisal Real Property - Valuation	Percentage Modifiers for Cost Tables	The Application shall provide for the use of percentage modifiers to calibrate RCN to the local market.		
163		Assessor	Appraisal Real Property - Valuation	Quality Control - AA Check Reports	After Application of Application-wide adjustments, the Application shall allow user to request electronic, sortable check reports showing before and after market values (as opposed to Frozen Sr. Values) and other such criteria as determined necessary.		
164		Assessor	Appraisal Real Property - Valuation	Recalculate Values based on new data	The Application shall recalculate values for current or prior assessment years based on changed characteristics.		
165		Assessor	Appraisal Real Property - Valuation	Regression Analysis	The Application shall allow comparable sale prices to be adjusted based on coefficients produced by the regression analysis.		
166		Assessor	Appraisal Real Property - Valuation	Sale Comparison Models	Sales comparison models are applicable to agricultural, residential, condominiums, commercial, industrial, ~~multi~~and multi-family, mobile homes, and personal property class of property.		
167		Assessor	Appraisal Real Property - Valuation	Statistical Analysis	The Application shall enable users to compute standard IAAO statistics such as sales ratios, minimum, maximum, variance, mean, median, standard deviation, coefficient of variation, average absolute deviation, coefficient of dispersion and price-related differential (PRD).		
168		Assessor	Appraisal Real Property - Valuation	Statistical Analysis	The modeling process allows variables to be expanded, combined, and transformed as needed for use in the regression analysis.		
169		Assessor	Appraisal Real Property - Valuation	Statistical Analysis	The Application shall allow data transformations and statistical model analysis from SPSS or similar statistical analysis modeling applications.		
170		Assessor	Appraisal Real Property - Valuation	Statistical Analysis	The Application shall be able to integrate various SPSS (or similar) statistical modeling applications and transformations of variables.		
171		Assessor	Appraisal Real Property - Valuation	Statistical Analysis - Calibration Tools	The Application shall provide tools to assist in the calibration of cost and depreciation tables and neighborhood land and building adjustments.		
172		Assessor	Appraisal Real Property - Valuation	Statistical Analysis - Data Transfer	The Application shall enable the user to quickly read and write data between the assessment application and SPSS (or similar) software.		

173		Assessor	Appraisal Real Property - Valuation	Statistical Analysis - Model Applicability	The Application shall enable the user to develop and apply statistical valuation models to subject records of the same type, same location and with the same units of comparison.		
174		Assessor	Appraisal Real Property - Valuation	Statistical Analysis - Ratio Reports	The Application shall allow the user to incorporate time adjustments into sales and ratio studies.		
175		Assessor	Appraisal Real Property - Valuation	Statistical Analysis - Ratio reports	The Application shall generate a standard ratio report by user specified criteria. (User specified criteria such as: sale date range, sales ratio range, verification codes, type of property, neighborhood codes, cycle codes, school districts, and/or taxing districts codes.)		
176		Assessor	Appraisal Real Property - Valuation	Statistical Analysis - Ratio reports	The Application's ratio reporting capabilities shall comply with the requirements outlined in WAC 458-53-100all.		
177		Assessor	Appraisal Real Property - Valuation	Statistical Analysis - Time Studies	The Application shall provide time series analysis capabilities to measure inflation and deflation.		
178		Assessor	Appraisal Real Property - Valuation	Value Methods	The Application shall allow market values to be determined based on cost, market, and income models that can be stored.		
179		Assessor	Appraisal Real Property - Valuation	Value Model Formats	Supports additive, multiplicative, and hybrid value model formats.		
180		Assessor	Appraisal Real Property - Valuation	Value Override	The Application shall enable a user to override a value generated by the Application with a value that is entered directly in the record.		
181		Assessor	Appraisal Real Property - Valuation	Value Summary Display	The Application shall display the details of assessed values produced by the sales comparison approach on a year-by-year basis.		
182		Assessor	Appraisal Real Property - Valuation	View Adjustments	The Application shall allow for view quality and market adjustment factors to be applied to view properties.		

1.1.9. Value Notifications

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
183		Assessor	Appraisal Real Property - Value Notifications	Data on value notifications	Value notifications shall show the following data: - Name and mailing address - Situs address - Abbreviated legal description - Tax code area - Prior year's and new year's values for all value categories, with breakdown between land and building (e.g., market values, current use values and senior exemption values, when applicable) - A total value that will be the basis for the following year's taxes.		
184		Assessor	Appraisal Real Property - Value Notifications	Generating value notifications	The user shall be able to generate and print value notifications in-house and through an outside vendor.		

185		Assessor	Appraisal Real Property - Value Notifications	Information on value notifications	The Application shall allow the user to create custom valuation notices without vendor / programmer assistance.		
186		Assessor	Appraisal Real Property - Value Notifications	Send more than one value notification	The Application shall allow users to create value notification letters in batch, by specific property account numbers or other user defined criteria.		
187		Assessor	Appraisal Real Property - Value Notifications	Separate Mailings	The Application shall allow printing and mailing of valuation notices of selected groups of properties or individual property accounts as many times as needed during an assessment year.		
188		Assessor	Appraisal Real Property - Value Notifications	Valuation Notice - Do Not Mail	The Application shall provide automatic coding or flagging of parcels based on user-defined criteria that prevents a valuation notice from printing. For example: the user specifies all non-contiguous parcels with less than $500 of assessed value do not have valuation notices printed. The Application responds by identifying qualified parcels and automatically coding them with a do not print code.		
189		Assessor	Appraisal Real Property - Value Notifications	Value Notifications and Special Exemptions	The value notification shall display the type of special exemption that applies to the property (Example: Historic Property, Multifamily Tax Abatement, 30% Homeowner's Exemption, etc.)		
190		Assessor	Appraisal Real Property - Value Notifications	View image of value notification	The Application shall display and store an image of the value notification letter.		

1.1.10. What-if Calculations

This functionality allows the user to see what will happen, or what would have ~~happened,~~happened; to a particular parcel or a grouping of parcels should a change be made within the CAMA system without actually updating the subject(s).

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
191		Assessor	Appraisal Real Property - What If Calculations	Current year what if valuation calculations	Prior to posting the property's final value, the user shall be able to calculate and view the current year's values based on varying valuation scenarios.		
192		Assessor	Appraisal Real Property - What If Calculations	Prior years value calculations	The Application shall provide the ability to recalculate values for (at a minimum three) prior years based on changed property characteristics.		
193		Assessor	Appraisal Real Property - What If Calculations	Statistical Analysis - What If	The Application shall incorporate an Application-wide "What-if" module that allows the user to test the impact to values and sales ratios when changes are made to cost tables and parcel characteristics.		

194		Assessor	Appraisal Real Property - What If Calculations	Statistical Analysis - What If	The Application shall allow "What-if" analysis on individual property account numbers.		

1.2. Appraisal – Personal Property

Personal property consists of all property that is not real property. It is property that is movable without damage to itself or the real estate; that is, it can be re-located. Personal property is either tangible or intangible. Tangible personal property is property that has a substantial physical presence beyond merely representational. It is assessable. In the state of Washington, intangible personal property is not assessable, e.g., goodwill, patents etc. Washington state law requires the discovery, listing and valuing of all taxable personal property within each County each year.

1.2.1. Requirements for All Accounts

Personal property appraisal determines through self-reporting or agency estimates the monetary value of qualifying property. Detailed asset listings are mailed to existing and newly discovered accounts. Asset listings are returned to the County and valued using depreciation schedules, industry standards, and professional judgment. Asset details are retained and used for the asset listings mailed the following year.

ID#	P	Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
195		Assessor	Appraisal Personal Property - Requirements for all accounts	Account analysis and comparison	The user shall be able to perform comparisons on similar businesses in order to analyze amounts reported and variances.		
196		Treasurer	Appraisal Personal Property - Requirements for all accounts	Advance Taxes	The Application shall create advance tax notification for an account. This information shall include account number, current owner, address, code area, tax years affected, levy rates detailed for each of these years, tax amount owing, due date, and an explanation as to the reason for advance tax bill.		
197		Treasurer	Appraisal Personal Property - Requirements for all accounts	Advance Taxes	The Application shall provide reporting as to collection activity associated with advance tax bills. This reporting shall be scheduled, yet also be able to run on-demand.		
198		Treasurer	Appraisal Personal Property - Requirements for all accounts	Advance Taxes	The Application shall document, within the audit trail, that an advance tax notice (statement) has been generated.		
199		Assessor	Appraisal Personal Property - Requirements for all accounts	Batch updates from data files	The user shall be able to perform batch updates from data files. Example: Tax code areas, situs address, etc.		

200		Assessor	Appraisal Personal Property - Requirements for all accounts	Cross-check tax code area	The Application shall provide the ability to cross check the tax code area assigned to a personal property account if the account is linked to a real property account number.		
201		Assessor	Appraisal Personal Property - Requirements for all accounts	Electronic filing and value notifications	The Application shall support filing and sending value notifications electronically.		
202		Both Assessor and Treasurer	Appraisal Personal Property - Requirements for all accounts	Link between Personal Property and Real Property	The Application shall maintain a relationship between personal property and the associated real property.		
203		Assessor	Appraisal Personal Property - Requirements for all accounts	Linking scanned documents or data files	The user shall be able to link scanned documents or data files to a personal property account.		
204		Assessor	Appraisal Personal Property - Requirements for all accounts	Miscellaneous Fields	The user shall be able to enter information for the following areas: - Business Open Date - Business Close Date - Business Sale Date		
205		Both Assessor and Treasurer	Appraisal Personal Property - Requirements for all accounts	Personal Property Account Numbers	The Application shall automatically assign a property account number to a new account. The account numbers have a different format or key identifier for each of the personal property categories (commercial, farm and state assessed utilities).		
206		Assessor	Appraisal Personal Property - Requirements for all accounts	Personal Property Account Status	The user shall be able to track the status of an account (e.g., Notice sent? Form returned by owner? Returned timely? Account valued? Valuation notice sent?)		
207		Both Assessor and Treasurer	Appraisal Personal Property - Requirements for all accounts	Personal Property/Addresses	The mailing address shall consist of two address lines, and the length of fields shall be large enough to accommodate up to 50 characters.		
208		Both Assessor and Treasurer	Appraisal Personal Property - Requirements for all accounts	Personal Property/Addresses	The Application shall have the ability to change both the mailing address and the situs with a single entry.		
209		Both Assessor and Treasurer	Appraisal Personal Property - Requirements for all accounts	Personal Property/Addresses	The Application shall automatically update the personal property account and the real property account when the Situs address is changed.		
210		Both Assessor and Treasurer	Appraisal Personal Property - Requirements for all accounts	Personal Property/Addresses	When the change of address is electronically entered, the Application shall automatically change all forms (scanned images).		

Commented [ER23]: Discuss do we want to have one or two separate to manage

211		Both Assessor and Treasurer	Appraisal Personal Property - Requirements for all accounts	Personal Property/Addresses	The Application shall send address changes, both mailing and Situs, to a history file.		
212		Both Assessor and Treasurer	Appraisal Personal Property - Requirements for all accounts	Personal Property/Addresses	The Application shall automatically update address changes in integrated or third-party collection software.		
213		Assessor	Appraisal Personal Property - Requirements for all accounts	Query - New personal property discovery accounts	The user shall be able to run a query against all new personal property discovery accounts, showing items such as: Year account was discovered, individual account value, total number of accounts discovered, total value added to the assessment roll, timely filed, late filing penalty, no file, etc.		
214		Assessor	Appraisal Personal Property - Requirements for all accounts	Request for listing of personal property - Commercial except for leasing companies	After the batch valuation update has been performed the user is able to generate Request for Personal Property Listings on all active commercial accounts (except for leasing companies). The Application tracks the date that this notice was generated as well as the date that the notice was mailed. These fields are automatically updated.		
215		Assessor	Appraisal Personal Property - Requirements for all accounts	Request for personal property listing - Farm	After the batch valuation update has been performed the user shall be able to generate Request for Personal Property Listings on all active farm accounts. For farm accounts that qualified in the previous year for the Farm Exemption, only the master account is generated. This master account should display the combined, prior year's information of the master and sub-account's asset detail lines. The Application shall track the date that the notice was generated as well as the date that the notice was mailed. These fields shall be automatically updated.		
216		Assessor	Appraisal Personal Property - Requirements for all accounts	Request for personal property listings - Leasing companies	After the batch valuation update has been performed, the user is able to generate Request for Personal Property Listings on all active commercial lease master accounts. These accounts do not display the pre-calculated asset detail lines and summarized subtotals and totals. The Application tracks the date that this notice was generated as well as the date that the notice was mailed. These fields are automatically updated		

217		Assessor	Appraisal Personal Property - Requirements for all accounts	Request to list personal property - All account types	After all accounts have been updated using the new year's valuation tables and information has been copied forward from the prior year, the user shall be able to generate notifications asking property owners to update their personal property listings. The Application shall provide the ability to generate these notifications by a third-party vendor or in-house.		
218		Assessor	Appraisal Personal Property - Requirements for all accounts	SIC (Standard Industrial Classification) or NAICS (North American Industry Classification System)	The Application shall store SIC or NAICS codes and associate them to personal property accounts. Note: We do not know which of the two codes will be in use when we implement the new Application.		
219		Assessor	Appraisal Personal Property - Requirements for all accounts	SIC (Standard Industrial Code) field	The Application shall have a field to assign a SIC and its corresponding explanation to each account. The user shall be able to define which screens, forms, etc. the SIC code and explanation should be included in.		
220		Assessor	Appraisal Personal Property - Requirements for all accounts	Tax Registration Number	Able to store a tax registration number.		
221		Assessor	Appraisal Personal Property - Requirements for all accounts	Track number and values of farm accounts that do and do not qualify for the Farm Exemption	The Application shall track the number and value of all farm accounts that qualify for the Farm Exemption and those that do not. This information is required for the Abstract Report that is completed yearly for the Washington State Department of Revenue.		
222		Assessor	Appraisal Personal Property - Requirements for all accounts	UBI (Unified Business Identifier) number field	Has a field to store the UBI number for each commercial account. The user is able to define which screens, forms, etc. the UBI number should be included in.		
223		Assessor	Appraisal Personal Property - Requirements for all accounts	User defined notes and account history	User shall be able to view an account's history/notes. These notes, at a minimum, shall include: - By year if an account was not timely filed and received a filing penalty - If an account was audited - Business open date - Business close date - Business sale date - Notes entered by the user from audits, revaluation, ~~contact~~and contact with the property owner, etc. These notes are categorized (drop-down menu?)		

224		Both Assessor and Treasurer	Appraisal Personal Property - Requirements for all accounts	View and Print Reports	The Application shall allow the user to view and print reports on all personal property accounts at a common, user defined location. For example, all businesses in a single building, or stores at a strip mall.		

1.2.2. Audit

Personal property auditing is the process of identifying non-payers, non-filers, and performing a paper audit or site visit.

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
225		Assessor	Appraisal Personal Property - Audit	Audit fields and tracking	The Application shall contain the following fields to allow the user to track audit processes: - Scheduled audit date/year (i.e., date when the audit should occur) - Date that the audit letter was mailed - Date that the audit was conducted - Type of audit that was done (field, office, etc.) - Date that the audit was completed - How the audit was solicited, if at random, the Application shall show that, if selected individually the Application should allow the user to enter a note stating why the account was selected for the audit (drop down menu?).		
226		Assessor	Appraisal Personal Property - Audit	Audit Selection	The user shall be able to mark an account to be audited in the future, or select accounts to be audited at random with a user-defined selection criteria.		

1.2.3. Farm Exemption

Under RCW 84.36.630, certain qualifying farm machinery and equipment owned by a farmer may be exempt from the state portion of the personal property tax. Each year, the property owner must complete an application and file it with the Personal Property Farm Listing in order to qualify for this exemption.

ID#	P	Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
227		Assessor	Appraisal Personal Property - Farm Exemption	Farm Equipment Exemption RCW 84.36.630	The Application shall be able to administer Washington State's Farm Equipment Exemption according to RCW 84.36.630. This law exempts property owners of certain farm equipment from paying the state portion of the levy rate. Example: A farmer may own some equipment that is taxed at the full levy rate, and other equipment that is exempted from the state portion of the levy rate. If the Application administers this exemption by establishing two accounts for the same property owner (master and sub-account), then the two accounts will need to be linked for viewing and reporting purposes.		

1.2.4. State-assessed Utilities

The state of Washington is responsible for valuing personal property associated with companies that provide utility services and have tangible assets that encompass ~~more than one~~More Than One County. These values are reported by the state to the County assessor, processed through the County's assessment roll, and used in levy certification, tax roll, and tax collection procedures.

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
228		Assessor	Appraisal Personal Property - State-assessed Utilities	Automated preparation for state assessed utilities - Personal Property	The Application shall provide an automated mechanism that allows the user with minimal manual data entry to calculate the appropriate railroad mileage percentages, assign account numbers by property owner and tax code areas, verify total assessed values by property owner and tax code area, and update the Application.		
229		Assessor	Appraisal Personal Property - State-assessed Utilities	Compare prior year's values to current year's values for state assessed utilities - Real/Personal	The user shall be able to compare the prior year's total assessed value of state-assessed utilities (real and personal property) by tax code area and overall total, to this year's values.		
230		Assessor	Appraisal Personal Property - State-assessed Utilities	State Assessed Utilities - Personal Property	The Application shall allow the user enter state-assessed utilities for personal property and process them through the assessment roll, levy calculation & certification, tax roll and tax collection as required by Washington State Law RCW 84.12.all.		

1.2.5. Tables

Many tables are utilized by the personal property staff in performing their duties. Some tables are provided by the state, including Valuation Guidelines, which are provided yearly to all 39 counties by the Washington State Department of Revenue. These tables promote statewide uniformity and standardization in the assessment of personal property.

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
231		Assessor	Appraisal Personal Property - Tables	Expanded DOR Tables	The user shall be able to add additional codes to the depreciation table provided by the Washington State Department of Revenue (DOR)		
232		Assessor	Appraisal Personal Property - Tables	SIC Code (Standard Industrial Classification) or NAICS (North American Industry Classification System) Valuation Table	The Application shall contain a SIC or NAICS Code valuation table with all valid SIC or NAICS codes, a value for each of these codes, and a field indicating what summarized value category the personal property value should be posted to (for each asset detail line). The table is updated yearly using the same processes that are used to update the expanded DOR table. This valuation table is used (rather than the expanded DOR table) when the account shows an entry in the Discovery supplement field and a valid SIC or NAICS code in the SIC or NAICS code field. Note: We do not know which of the two codes		

					will be in use when we implement the new Application.		
233		Assessor	Appraisal Personal Property - Tables	Table Updates	Able to: - Update depreciation tables with information from a data file from the State - Copy prior year's depreciation table to the new year - Update depreciation table manually		

1.2.6. Valuation

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
234		Assessor	Appraisal Personal Property - Valuation	Asset detail lines - Commercial	The user shall be able to add an unlimited number of asset detail lines. At a minimum, each line shall include fields for: - A unique line identification number - Detail description - Cost - Year purchased - Trend (from expanded DOR Table) - Percent (applied against cost to arrive at value, from DOR Table) - Value		
235		Assessor	Appraisal Personal Property - Valuation	Asset Detail Lines - Farm	The user shall be able to add an unlimited number of asset detail lines. At a minimum each line shall include fields for: - A unique line identification number - Detail description - Cost - Year purchased - Trend (from expanded DOR Table) - Percent (applied against cost to arrive at value, from DOR Table) - Value - A field to show whether or not the asset detail line qualifies for the Farm Equipment Exemption		
236		Assessor	Appraisal Personal Property - Valuation	Asset detail lines and 'hold' values	The user shall be able to add asset detail lines (commercial and farm accounts) with a hold value. This means that the value is 100% of the amount entered in the cost field.		
237		Assessor	Appraisal Personal Property - Valuation	Batch valuation update - commercial and farm accounts	After the new DOR and SIC tables have been entered, the user shall be able to perform a batch valuation update to all accounts based on the new table entries, asset detail information copied from the prior year and the prior year's head of family information.		
238		Assessor	Appraisal Personal Property - Valuation	Copy/Roll Prior Year's Account Information	The Application shall copy/roll all of the prior year's (or last known year's) account information to the future year. The user shall have the ability to perform this update in batch (based on user defined criteria), or on an individual account.		

239		Assessor	Appraisal Personal Property - Valuation	Estimate of Value	The user shall be able to add an estimated value to an account due to non-reporting or under-reporting by the property owner. This entry shall be identified as an estimated value in the line item detail description of the account.		
240		Assessor	Appraisal Personal Property - Valuation	Head of Family Exemption	The Application shall provide a field for the Head of Family Exemption. When this field is checked, the exemption amount shall automatically post as a negative amount in the corresponding summarized value category.		
241		Both Assessor and Treasurer	Appraisal Personal Property - Valuation	Late Filing Penalty	The Application shall apply a late filing penalty (%). This penalty shall be calculated against the total tax owed on the account the year following the assessment of the penalty.		
242		Assessor	Appraisal Personal Property - Valuation	Leased Equipment - Cross-reference	The user shall be able to cross-reference lessor and lessee for items assessed as leased equipment. Example: When a business reports leased equipment, the user should be able cross-check to ensure that the leasing company is listed and reported the lease.		
243		Assessor	Appraisal Personal Property - Valuation	Leasehold improvements	The user shall be able to track and appraise leasehold improvements as either personal property or real property.		
244		Assessor	Appraisal Personal Property - Valuation	Leasing Companies - Master and sub-accounts	The Application shall provide the ability to create a master account and lease sub-accounts for each leasing company.		
245		Assessor	Appraisal Personal Property - Valuation	Locate estimated asset detail lines	The user shall be able to locate all accounts that contain an estimated value in an asset detail line and print, view or export the output.		
246		Assessor	Appraisal Personal Property - Valuation	Personal Property Discovery - Access database	The department is currently using an Access database for the discovery of new, commercial personal property accounts. Refer to the Personal Property Discovery section of the Software Applications Overview appendix for a description of this database. The proposed Application shall be able to either perform the function of this database, or allow for an upload of all new personal property discovery accounts into the Personal Property Discovery database.		
247		Assessor	Appraisal Personal Property - Valuation	Personal Property Valuation	The user shall be able to value all classes of property listed in the depreciation tables (personal property and industrial) provided by the Washington State Department of Revenue yearly. Web Reference: http://dor.wa.gov/content/taxes/Property/prop_PsnlPropValSched.aspx.		

248		Assessor	Appraisal Personal Property - Valuation	Posting summarized values	The user shall be able to mark on the asset detail line which summarized value category should be assigned to the item. The Application shall total the values and post the totals to the corresponding categories, calculating the account's overall total. This information is required to generate a summary account to the State.		
249		Assessor	Appraisal Personal Property - Valuation	Processing new personal property discovery accounts	New personal property discovery accounts shall show that the account was established through the discovery process and the date that it was created. The valuation of these accounts is based on the account's SIC and the SIC table. All other processes for the account follow the requirements for other commercial personal property accounts.		
250		Assessor	Appraisal Personal Property - Valuation	Summarized total value categories - Commercial	The total value of a commercial personal property account shall consist of the following categories: - Manufacturing, contracting, logging, and mining machinery and equipment - All other equipment and machinery (office and store equipment and machinery, furniture, tools, etc.) - Supplies and consumables not for sale - Property on exempt land (leasehold improvement assessed as personal property) - Other personal property - Head of Family Exemption		
251		Assessor	Appraisal Personal Property - Valuation	Summarized value categories - Farm	The total value of a farm personal property account shall consist of the following categories: - Machinery & equipment - Head of Family Exemption		
252		Assessor	Appraisal Personal Property - Valuation	Supplies and consumables not for sale - commercial accounts	The Application shall provide an area to enter an amount for supplies and consumables not for sale and show whether this amount was provided by the property owner or estimated by the appraiser. The amount shown in this field shall automatically post to the corresponding summarized value category.		
253		Assessor	Appraisal Personal Property - Valuation	Track number and value of accounts that qualify for the $500 Exemption	The Application shall track or flag those accounts that result in a $0 taxable value due to the $500 Value Exemption. The number of personal property accounts that qualify for this exemption and the assessed value (value loss, since the taxable value is $0) is required for the Abstract Report that is submitted yearly to the Washington State Department of Revenue.		
254		Assessor	Appraisal Personal Property - Valuation	Tracking - Head of Family Exemption	The Application shall track the number of accounts that qualify for a Head of Family Exemption (Commercial, Farm separate counts). These numbers are needed for reports to the Washington State Department of Revenue.		
255		Assessor	Appraisal Personal Property - Valuation	Value Exemption < $500.00 Personal Property	The Application shall accommodate Washington State's value exemption of certain properties that are exempt if the assessed value is < $500.00. See RCW 84.36.015.		

1.2.7. Value Notifications

A summarized notice of the total value of a commercial personal property account is mailed to the taxpayer. This value, multiplied by the levy rate in the tax code area where the personal property is located, creates the following year's tax bill. Notifications are produced individually or in batch mode.

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
256		Assessor	Appraisal Personal Property - Value Notificatio ns	Value Notifications - Farm and commercial	Able to generate value notifications either one account at a time or for a batch of accounts. The user is able to schedule the generation of these notifications by entering a future date and time. The print job should start automatically at the predefined time. The Application tracks the date that the valuation notice was generated and the date the notice was mailed. For leasing companies, value notifications are only sent to the master lease account, not the sub account.		

1.3. Assessments

Benton County envisions implementing an application which will allow for flexibility in the creation, billing and receipting of assessment activity. Benton County desires to create one statement for property owners. This statement shall contain information relating to real property taxes and any and all assessments associated with this account, with the possible exception of County Road Improvement Districts (CRIDs). Each property will carry an account number with all billings directly related to this number be it property taxes or assessments/fees.

1.3.1. General Assessments

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
257		Treasurer	Assessments - General Assessments	Assessment - Storm Water	The Application shall have the ability to export receipt information to a delimited or fixed ASCII text file.		
258		Treasurer	Assessments - General Assessments	Assessment and fee billing data upload & processing	A file is received each year that contains all billing information (e.g. the property account number, the assessment amount, and a specific year). A process of verifying that all of the property account numbers are active accounts is required to be run prior to posting the billing detail to each account. The process will produce a report listing the inactive property account numbers, and the new active property account number or numbers that are associated with that inactive property account number. If no inactive property account numbers are found, a report shall be produced stating that as well.		

259		Treasurer	Assessments - General Assessments	Assessment and fee line-item on main bill	~~Benton County currently bills each assessment and fee as separate statements.~~ The Application shall include all current assessments and fees as a line-item detail in the Property Tax statement, creating one bill for the taxpayer.		
260		Treasurer	Assessments - General Assessments	Assessments	Bill detail shall be tied to a specific year, and the Application shall have an option for manual entry of this data as well.		
261		Treasurer	Assessments - General Assessments	Assessments	The Application shall identify which accounts are to be paid by a mortgage company, and which accounts are billed directly to a taxpayer.		
262		Treasurer	Assessments - General Assessments	Assessments	The Application shall retain and associate the receipt numbers and receipt date assigned by the cashiering Application. Posting of application will occur by a functional operator of the Treasurer's Office and will be posted in batch mode		
263		Treasurer	Assessments - General Assessments	Assessments	The Application shall have a report to track receivable activity by fee year, where the fee receipts are tied to a fee year.		
264		~~Treasurer~~	~~Assessments - General Assessments~~	~~Assessments - Delinquents~~	~~Delinquent Assessments are assignable or can be assigned to a collection agency. The detailed information associated with the delinquent account shall include collections attempts and communication by County staff. This information shall be forwarded electronically to the collection agency. The Application shall then be identify the accounts which for such activity has occurred.~~		
265		Treasurer	Assessments - General Assessments	Assessments	If an account becomes delinquent, the interest and penalty associated with the delinquent account shall be calculated automatically by the Application. (See Interest and Penalty Table)		
266		~~Treasurer~~			~~Blank~~		
267		Treasurer	Assessments - General Assessments	Assessments reported by assessment year	Assessments and fees shall be tied to an assessment and or fee year. Application reports shall be available to track assessment receivable activity by assessment and or fee year.		

Formatted Table

Formatted Table

268		Treasurer	Assessments - General Assessments	~~Lighting assessment~~ payment due date rules	The Application shall bill for assessments and fees. The Application shall accommodate the following rule: If the assessment bill is less than or equal to a defined dollar amount (currently this is $50.00), it is due and payable by April 30. If the billed amount is greater than the defined dollar amount, half of the bill is due and payable by April 30. The remainder is due and payable by October 31. Should an account become delinquent, interest and penalties shall be calculated and added to the amount outstanding. For interest and penalty calculations, see interest and penalty table. Both the dollar limits and the payable dates shall be configurable without requiring programming.		
269		Treasurer	Assessments - General Assessments	Reports	The Application shall provide for detailed and summary aging reports for each separate assessment and fee type by year by account.		
270		Treasurer	Assessments - General Assessments	Separate grouping and accounting for assessments and fees	Assessment and fee receipts shall be grouped separately and accounted for separately, both for the General Ledger and Taxation Application. The assessment receipts shall be further broken down by type. For example, irrigation/storm water assessments shall be posted to the General Ledger in one batch, separated from property taxes and other assessments.		

~~1.3.2. Intentionally Left Blank~~

~~1.3.3.~~1.3.2. County Road Improvement Districts (CRIDs)

A County Road Improvement district is authorized by RCW 36.88.015. The district is formed to create or improve a shared road with the costs split among the property owners. The property owners are allowed a one-time payment to either pay off the entire road improvement district or to make just one payment of any size. If a property owner chooses to make a payment, then their amount due is reduced by the amount paid subsequent payments (principal and bond interest) are calculated on the new amount due based upon a bond issued to finance the remainder of the assessment.

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
281		Treasurer	Assessments - County Road Improvement Districts (CRIDs)	Assessments - County Road Improvement Districts (CRIDs)	The Application shall provide functionality for assessment payoffs as well as display in inquiry mode the correct payoff amount owing to date.		

282		Treasurer	Assessments - County Road Improvement Districts (CRIDs)	Assessments - County Road Improvement Districts (CRIDs)	The Application shall provide accounting to adjust the receivable balance in SQL Financials General Ledger by the amount of the assessment payoff at the time of the receipt.		
283		Treasurer	Assessments - County Road Improvement Districts (CRIDs)	CRID	The Application shall accommodate the following: when a County Road Improvement District is authorized, the Application shall allow the property owners a one-time payment, to either pay off their entire road improvement district, or to make just one payment of any size. If a property owner chooses to make a payment, then their amount due is reduced by the amount paid. Subsequent payments (principal and bond interest) are calculated on the new amount due, based upon a bond issued to finance the remainder of the assessment.		
284		Treasurer	Assessments - County Road Improvement Districts (CRIDs)	CRID	The Application shall allow for period billing throughout the year, based upon the due dates for each CRID. CRID's are due and payable on their due date, and considered delinquent 30 days past their due date. Interest and penalty become due on the 31st day after the payment date. Current year cannot be paid if a delinquent year is owing. The oldest year owing shall be paid first, with delinquent interest and penalty paid in full.		
285		Treasurer	Assessments - County Road Improvement Districts (CRIDs)	CRID	The Application shall allow for the creation of statements generated using the current property tax information. ~~Bills are generated 60 days prior to the due date and mailed~~. These statements include any delinquent interest and penalties on prior years, current year due, and payoff amounts. The in-house bill shall contain an OCR scan line, in OCRA font~~, as well as a barcode in 3of9 font.~~ Should be in compliance with the County's software system		
286		Treasurer	Assessments - County Road Improvement Districts (CRIDs)	CRID	The Application shall allow for when segregation or combination activity occurs on a property, CRID's must be considered. An assessment which has yet to be paid must be moved to a valid account (s), and the remaining principal and bond interest shall be divided between the parcels based upon their respective assessed value(s).		
287		Treasurer	Assessments - County Road Improvement Districts (CRIDs)	CRID	When payments are received for a CRID, the Application shall post directly to the property account, including any delinquent interest and penalties. CRID receipts shall be grouped separately and accounted for separately, both for the General Ledger, as well as for the taxation Application. The receipt number assigned at the point of sale, or other receipting Application, and the receipt date, shall be retained when posting the database.		

Commented [ER24]: Software has ability for various due dates

Formatted: Highlight

Formatted: Highlight

Formatted: Highlight

288		Treasurer	Assessments - County Road Improvement Districts (CRIDs)	CRID	The Application shall allow for the calculation of payoff amounts, delinquent interest, and new bond interest. New bond interest for the next year is calculated after the delinquent date, and becomes due if there is a payoff after the due date. Payoff can occur at any time of the year, and includes the next year's bond interest, remaining principal, and any delinquent interest and penalty, if applicable. If there is delinquent interest and penalty on a payoff, the amount for the payoff is only good for 30 days. After the 30 days, new delinquent interest is due.		
289		Treasurer	Assessments - County Road Improvement Districts (CRIDs)	CRID	The Application shall allow for the reconciling of CRID receipts. In order to reconcile between the Application, POS, and SQL General Ledger, reports shall be generated in the Application, breaking down by CRID, by account, principal, bond interest, delinquent interest and delinquent penalties paid, and the accounts remaining with principal and bond interest due.		
290		Treasurer	Assessments - County Road Improvement Districts (CRIDs)	CRID	The Application shall provide a report allowing the user to select a list of receipt properties (e.g. receipt number, date, amount of receipt, assessment receipt principal, property account number, payee, property account owner, check number, tender type, assessment penalty, assessment interest), and shall provide this detail for CRID Assessment within a given date range. It shall also provide the account posting to the General Ledger that is associated with the CRID Assessment within the date range selected.		
291		Treasurer	Assessments - County Road Improvement Districts (CRIDs)	CRID	If an account becomes delinquent, the interest and penalty associated with the delinquent account shall be calculated automatically by the Application. (See Interest and Penalty Table)		
292		Treasurer	Assessments - County Road Improvement Districts (CRIDs)	CRID	Application reports: Monthly, the Application shall report all accounts paid in full or installment payments received. This information shall be grouped by CRID's District: property account number, installment principal, installment interest, and delinquent penalty, if applicable. A summary of this data, by CRID's District, shall also be included.		

~~1.3.4. Department of Natural Resources/Fire Patrol~~

~~Benton County collects fire patrol fees for the State Department of Natural Resources. This process uses a flag to identify which properties must pay the DNR fire patrol. Fees are calculated based on the acreage of the property~~.

ID#		~~Dept.~~	~~Subject Area~~	~~Title~~	~~Description~~	~~Vendor Response~~	Vendor Notes

Formatted Table

293		~~Both Assessor and Treasurer~~	~~Assessments - Department of Natural Resources/Fire Patrol~~	~~Calculating DNR Fire Patrol Fees~~	~~The Application shall be able to calculate DNR Fire Patrol fees based on regulations provided by the Washington State Department of Natural Resources. The rate structure for the fees changes each year. The user shall be able to change the fee structure without vendor/programmer assistance. Department of Natural Resources, DNR Letter with New Rates~~	-	
294		~~Treasurer~~	~~Assessments - Department of Natural Resources/Fire Patrol~~	~~Department of Natural Resources/Fire Patrol Refunds~~	~~The Application shall allow for Department of Natural Resources/Fire Patrol refund applications to be initiated by the customer over the web.~~	-	
295		~~Both Assessor and Treasurer~~	~~Assessments - Department of Natural Resources/Fire Patrol~~	~~Identifying properties for DNR Fire Patrol~~	~~The Application shall provide a mechanism to allow the user to identify a property for DNR Fire Patrol Assessment. The user shall be able to add or remove this flag by batch updates or manually.~~	-	
296		~~Treasurer~~	~~Assessments - Department of Natural Resources/Fire Patrol~~	~~Special Fee Assessments - Department of Natural Resources - Fire Patrol~~	~~The Application shall allow for a Washington State Department of Natural Resources (DNR) assessed Fire Patrol, which is billed annually by Benton County Treasurer's Office for forest fire suppression. Fire Patrol is due and payable on April 30 and October 31, along with regular property taxes. Its payment schedule shall be set the same as regular property taxes. Should an account become delinquent, interest and penalty are calculated, and shall be shown separately.~~	-	
297		~~Treasurer~~	~~Assessments - Department of Natural Resources/Fire Patrol~~	~~Special Fee Assessments - Department of Natural Resources - Fire Patrol~~	~~The Application shall allow for a Fire Patrol that is calculated on a list of property account numbers that have been flagged for Fire Patrol calculation. It is a flat fee if the parcel is less than 50 acres, or is a flat fee plus X cents per acre over 50 acres in size. The parcel shall have acres associated with it in order for this calculation to work.~~	-	
298		~~Treasurer~~	~~Assessments - Department of Natural Resources/Fire Patrol~~	~~Special Fee Assessments - Department of Natural Resources - Fire Patrol~~	~~The frequency of payments shall be posted daily from the taxation Application to the SQL General Ledger. The Application shall transfer to the SQL General Ledger at a summary level by fund, and transfer based on the date of the transaction. The Application shall allow for reporting prior to posting to the General Ledger to ensure accuracy.~~	-	
299		~~Treasurer~~	~~Assessments - Department of Natural Resources/Fire Patrol~~	~~Special Fee Assessments - Department of Natural Resources - Fire Patrol~~	~~The Application shall allow for reporting so that a list of individual parcels that have Fire Patrol paid on them for a specific day shall be generated and tied back to the daily cash received for the day. The allocation of these types of fees shall also be able to be traced back from the property receipt to the exact fund it was allocated to.~~	-	
300		~~Treasurer~~	~~Assessments - Department of Natural Resources/Fire Patrol~~	~~Special Fee Assessments - Department of Natural Resources - Fire Patrol~~	~~Receivable reports shall be able to be generated on a daily, weekly, monthly, or yearly basis.~~	-	

301		~~Treasurer~~	~~Assessments - Department of Natural Resources/Fire Patrol~~	~~Special Fee Assessments - Department of Natural Resources - Fire Patrol~~	~~The Application shall allow for the manual removal of fees, with the appropriate accounting entries flowing through the Application.~~	-	
302		~~Treasurer~~	~~Assessments - Department of Natural Resources/Fire Patrol~~	~~Special Fees- Fire patrol~~	~~The Application shall add an administrative fee to Fire Patrol assessment. This shall occur at the time taxes are created annually. This fee shall be recorded in SQL General Ledger to a unique fund.~~	-	

~~1.3.5.~~1.3.3. Drainage Maintenance Districts & Diking Districts

Drainage Maintenance and Diking District Assessments are billed once a year by the Benton County Treasurer's Office. At the time the District Commission establishes their annual budget, an assessment roll is created. The assessment role contains property detail to include the property account number the dollar amount per acre that is assessed as well as the total acres for a property. The Benton County Treasurer's Office also may include~~s~~ a fee ~~($2.00 up to $4.00)~~ on each account. Should an account become delinquent interest and penalties accrue (see interest and penalty table). Payments are due on or by April 30 of each year.

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
303		Treasurer	Assessments - Drainage Maintenance Districts & Diking Districts	Assessments - Drainage Maintenance Districts	The Application shall group Drainage Maintenance and Diking District receipts separately from other assessments, and accounted both for in the General Ledger.		
304		Treasurer	Assessments - Drainage Maintenance Districts & Diking Districts	Assessments - Drainage Maintenance Districts	The entire Drainage Maintenance and Diking District assessments shall be posted to the General Ledger in one batch, by day, separated from property taxes and other assessments.		
305		Treasurer	Assessments - Drainage Maintenance Districts & Diking Districts	Assessments - Drainage Maintenance Districts	The Application shall provide a report that lists all receipts within a given date range that contain drainage maintenance and diking district assessments posted to the database, allowing the user to select a list of receipt properties (e.g. receipt number, date, amount of receipt, assessment receipt principal, property account number, payee, property account owner, check number, tender type, assessment penalty, assessment interest) with summary totals by assessment year and grand total.		

306		Treasurer	Assessments - Drainage Maintenance Districts & Diking Districts	Assessments - Drainage Maintenance Districts	The Application shall provide a report allowing the user to select a list of receipt properties (e.g. receipt number, date, amount of receipt, assessment receipt principal, property account number, payee, property account owner, check number, tender type, assessment penalty, assessment interest), and will provide this detail for Drainage assessments within a given date range. It shall also provide the account posting to the General Ledger that is associated with the Drainage assessments within the date range selected.		
307		Treasurer	Assessments - Drainage Maintenance Districts & Diking Districts	Assessments - Drainage Maintenance Districts	The Application shall produce a report, controlled by date, that shall show all property accounts that contain Drainage Assessments showing the amount assessed by year, receipt number, date of payment, payment amount received for assessment, total receipt amount received, if any interest and penalty was paid, and what the balance on the property tax account still is. This report shall allow the sorting of information by assessment amount, property account number, receipt number, date of payment, payment amount received for assessment, total receipt amount received, and interest or penalty amount.		

~~1.3.6. Intentionally Left Blank~~

~~1.3.7.~~1.3.4. ~~Water Utility Districts~~Irrigation Assessments

Water Utility District Assessments are billed twice a year by the Benton County Treasurer's Office on behalf of Benton Public Utilities under RCW 36.94.220. At the time the final assessment roll is established through resolution by Benton Public Utilities, Benton County receives documentation which defines the complete district. All participants who are named in the documentation are given 30 days to make payment in whole or in part without any interest. Thereafter the sum remaining unpaid on any such assessment is billed over 10 years, in 20 equal installments, due April 30 and October 31.

		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
312		Treasurer	Assessments - Water Utility Districts	Assessments - Water Utility	The Application shall provide a report allowing the user to select a list of receipt properties (e.g., receipt number, date, amount of receipt, assessment receipt principal, property account number, payee, property account owner, check number, tender type, assessment penalty, assessment interest), and will provide this detail for Water Utility District assessments within a given date range. It will also provide the account posting to the General Ledger that is associated with the Water Utility District Assessment within the date range selected.		

313		Treasurer	Assessments - Water Utility Districts	Assessments - Water Utility Districts	Application reports: Monthly, the Application shall generate a report on all accounts paid in full, or installment payments received. This information shall be grouped by Water Utility District: account number, installment principal, installment interest, and delinquent penalty, if applicable. A summary of this data, by Water Utility District, shall also be included.		
314		Treasurer	Assessments - Water Utility Districts	Assessments - Water Utility Districts	The Application shall process interest-free payments for the first 30 days of the billing period (days shall be a variable field). Thereafter, and for the next 10 years (years shall be a variable field), the Application shall process installment payments comprised of principal amount owed, plus interest and penalty for any amounts considered delinquent. (See Interest and Penalty Table)		
315		Treasurer	Assessments - Water Utility Districts	Assessments - Water Utility Districts	The Application shall post these receipts to the General Ledger using a specific account coding per transaction type. Please see accounting code table.		
316		Treasurer	Assessments - Water Utility Districts	Reporting	The Application shall provide a report for all accounts that have been paid in full. This information shall contain the account number, the dollar amount of payoff, and date received.		

1.4. Creation of Taxes, Maintenance, and Billing

The Application shall allow for fully integrated management of property tax receivables, from creation through adjustments to billings. It is the intent of this RFP to find an application that will provide seamless and automated processes to create property taxes from levy calculations, create property tax billings, handle accounting entries and automatically post to the SQL Financial General Ledger for property tax receivables and revenues.

This Application will provide detail history on all adjustments to the taxes created from; property account history on the customer service screens and reports, to billings and adjusting accounting entries to the receivables and revenues on the General Ledger.

The Application shall account and report all property tax receivables by fund by levy year. It is the intent of Benton County to track receivables in compliance with GASB 41.

1.4.1. Levy Certification

8.5.1.1 Calculating Levies

ID#		Dept.	Subject Area	Title	Description	Vendor Respons e	Vendor Notes
317		Assessor	Levy Certification - Calculating Levies	1% Levy Limit, and 5.90 Levy Limit - Report	The Application shall generate reports that allow the user to verify/check the 1% and 5.90 levy limits.		

318		Both Assessor and Treasurer	Levy Certification - Calculating Levies	Calculate levies	The Application shall calculate levies, and provide documentation to the Washington State Department of Revenue and taxing districts, in accordance with RCW 84.52.all.		
319		Assessor	Levy Certification - Calculating Levies	Highest lawful levy	The Application shall be able to store the highest lawful levy amount for each taxing district back to 1985 and shall use that number as the starting figure for each year's levy calculation. The user shall be able to overwrite this figure.		
320		Assessor	Levy Certification - Calculating Levies	Levy calculation and limitations	The Application shall be able to calculate levies and verify levy limitations according to RCW 84.52.all and 84.55.all. The Application shall be able to process three calculations for each taxing district: 101% limitation, budget calculation, and statutory limit.		
321		Assessor	Levy Certification - Calculating Levies	Levy calculation reports	The Application shall provide levy calculation reports by tax code area and by taxing district that include the total assessed value and parcel count, broken down by: - Real property - Personal property - State assessed utilities (real and personal) - Exempt properties - Timber assessed value - Senior exempt values (broken down by the three income levels and total value)		
322		Assessor	Levy Certification - Calculating Levies	Restarting the levy calculation process	The Application shall allow the levy specialist to restart the levy calculation process. For example, the levy specialist loads values into the certification database on October 1, 2004. A large value change that occurs on October 15 requires that values are reloaded into the certification database to restart the levy calculation process.		
323		Both Assessor and Treasurer	Levy Certification - Calculating Levies	Tax code areas, taxing districts and fund numbers	The Application shall allow the creation of new tax code areas and assign fund numbers. There shall be one fund number for each taxing district. The taxing district has multiple tax code areas.		
324		Assessor	Levy Certification - Calculating Levies	Track value by categories for levy calculation/certification	The Application shall be able to track multiple assessed values by category for use in the computation of the levy rate. For example, the total assessed value for the senior citizen exemptions (broken down by the three income levels), the timber assessed value, state assessed utilities, annexations, new construction values, parcel counts and breakdowns by tax code area and taxing district.		

8.5.1.2 Taxing District Notifications

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes

325		Assessor	Levy Certification - Taxing District Notifications	Calculation forms	The Application shall have reports to submit to each taxing district. Reports shall include the levy calculations including the 101% calculation, the budget calculation, the statutory limit calculation, administrative refund calculations, excess levy calculations, as well as listing their highest lawful levy for future year calculations.		
326		Assessor	Levy Certification - Taxing District Notifications	Levy certification report for each taxing district	The Application shall have detailed reports to submit to each taxing district notifying them of the taxes to be collected, detailed by fund.		
327		Assessor	Levy Certification - Taxing District Notifications	Value letters to taxing districts	The Application shall have detailed reports to submit to each taxing district (value letter) notifying them of the total assessed value, senior exempt values that will not be taxed, new construction values, timber assessed values, and taxable values for both general funds and levy/bond funds.		

8.5.1.3 Training Databases

The Levy Certification process is a complicated process requiring inputs from a variety of sources. Our goal is to cross-train staff to run this process. As part of the cross-training and quality control, it is our desire to have the ability to enter and save all of the parameters for the Levy Certification as separate scenarios. The Levy Certification process should be able to run multiple scenarios in a trail or "What If" mode.

ID#		Dept.	Subject Area	Title	Description	Vendor Respons e	Vendor Notes
328		Assessor	Levy Certification - Training Databases	Levy calculation scenarios	The user shall be able to run the levy calculation/certification process multiple times as a scenario without making any changes to live data.		
329		Assessor	Levy Certification - Training Databases	Levy calculation/cer tification scenarios	The user shall be able to generate all reports, forms, letters, etc. from levy calculation/certification scenarios in the same way they are generated from the live database.		
330		Assessor	Levy Certification - Training Databases	Levy calculation/cer tification scenarios	The user shall be able to save and compare levy calculation/certification scenarios.		
331		Both Assessor and Treasurer	Levy Certification - Training Databases	Training databases for levy calculations/c ertification	The Application shall have up to three additional training databases for the levy calculation/certification processes. These databases shall function in the same manner as the production database, and shall allow employees to perform levy calculations/certification parallel with the levy specialist for training and cross-check purposes.		

8.5.1.4 What if Mode

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
332		Both Assessor and Treasurer	Levy Certification - What-if Mode	Estimates of values and levy calculations	The Application shall process estimates of levy calculations or projections of what if situations at any time of the year. The Application shall allow the user to access current assessed values, as well as manually enter values to estimate outcomes of annexations, LID lifts, etc.		

8.5.2 Certification of Taxes and Creation of Assessment and Tax Rolls

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
333		Assessor	Certification of Taxes and Creation of Assessment and Tax Rolls	Certificate of New Construction Form	The Application shall be able to generate the Certificate of New Construction Form (RCW 36.21.080 & 84.40.040).		
334		Assessor	Certification of Taxes and Creation of Assessment and Tax Rolls	Create and certify assessment rolls - Real/Personal	The Application shall be able to create the real and personal property assessment rolls and generate the assessment roll certification form (RCW 84.40.040).		
335		Both Assessor and Treasurer	Certification of Taxes and Creation of Assessment and Tax Rolls	Create and certify tax rolls - Real/Personal	The Application shall create the real and personal property tax rolls, and generate the tax roll certification form (RCW 84.52.080).		

8.5.3 Cancellations and Supplements

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
336		Treasurer	Cancellations and Supplements	Cancellations and Supplements	The Application shall integrate seamlessly between the CAMA Application, the taxation Application, and SQL General Ledger.		
337		Treasurer	Cancellations and Supplements	Cancellations and Supplements	The Application shall be able to handle the prorating of taxes based upon Washington State RCWs.		
338		Treasurer	Cancellations and Supplements	Cancellations and Supplements	When values have been adjusted by the Assessor's Office via the CAMA Application, the Application shall cancel taxes or supplement taxes. The cancellation or supplementing of taxes shall occur through a workflow process, with the appropriate approval levels and audit trails.		

Commented [ER26]: Discuss option: specific and price diff w/ and without integration of Proval

Formatted: Highlight

339		Both Assessor and Treasurer	Cancellations and Supplements	Changing prior years' values - Real/Personal	The Application shall allow the user to access (or create) prior year's information, edit the information to generate a corrected (or new) value for the prior year, automatically update the database with the corrected (new) values, and generate a cancellation or supplement form. This shall be completed with the appropriate audit trails and approval levels. Prior year's information shall include value information, tax billing information, and receipt or payment information. The Application shall allow the user to add prior year information, should it need to be edited after it has been archived from the database. The Application shall allow this to occur by single account, or in groups.		
340		Both Assessor and Treasurer	Cancellations and Supplements	Value changes for prior years integrated with Treasurer's system - Real/Personal	When the user processes a change for a prior year's assessment, the Application shall automatically change the corresponding tax information without additional manual data entry by the Treasurer's staff.		
341		Both Assessor and Treasurer	General Functional Requirements	Agents - Real/Personal	Some property owners assign an agent (e.g., third-party property management firm) to handle all of his/her property related business affairs. The Application shall allow the user to: - Maintain information on one or multiple agents per property; - Assign multiple properties to one agent; - Define authorities for each agent on each property; - Identify employees at the agent's company. - Define which Application-generated correspondence shall be sent to the agent only, the property owner only, or both.		

Questions

342	Describe how the Application tracks cancellation / supplements.

8.5.4 Combinations

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
343		Both Assessor and Treasurer	Combinations	Combinations	The Application shall combine properties, in an automated manner that requires minimal data entry by the user, and is integrated with the Treasurer's Application, updating the tax information, including any assessments associated with the existing properties.		
344		Treasurer	Combinations	combinations	The Application shall accommodate the following rule: An assessment which has yet to be paid, or paid in part, must move to a valid account pursuant to the assessment district's instructions, should the segregation or combination create an inactive account.		
345		Both Assessor and Treasurer	Combinations	Combinations and history records	The combination transaction shall be recorded such that the parcel history can be easily reconstructed.		

Commented [ER27]: Discuss w/Assr of impact

Formatted: Highlight

346		Both Assessor and Treasurer	Combinations	Combinations and tax relief programs	The combination process shall accommodate properties with special tax relief assessments, such as senior citizen exemptions and current use.		
347		Treasurer	Combinations	Combination information	The Application shall have a mechanism for tracking information related to combinations such as receipt information.		
348		Assessor	Combinations	Tracking combinations	The user shall be able to track combinations from their initial creation to the revaluing of the resultant parcel(s).		
349		Both Assessor and Treasurer	Combinations	Unlimited number of properties	The Application shall allow for an unlimited number of properties to be combined. (If not, please indicate the maximum number of properties that can be combined in a single combination process.)		
350		Assessor	Combinations	User defined criteria for data to be moved during combinations	The Application shall allow the copying/pasting/moving of data, photos and sketches from one parcel to another based on user defined criteria or business rules.		

8.5.5 Segregations

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
351		Both Assessor and Treasurer	Segregations	Segregations	The Application shall be able to segregate properties, in an automated manner that requires minimal data entry by the user, and is integrated with the new taxation Application. For example, a GIS data file containing the parent parcel and resultant parcel(s) information regarding values, size, topography, ownership, etc., shall be used to segregate the property and update the Application.		
352		Treasurer	Segregations	Segregations and special assessments	The Application shall accommodate the handling of special assessments, such as irrigation and storm water assessments when a segregation occurs as allowed for in accordance the appropriate RCW's and original assessment acreages.		
353		Assessor	Segregations	Tracking segregations	The Application shall track segregations from their creation through the revaluation of all parcels associated with the segregation.		
354		Assessor	Segregations	User-defined criteria for data to be moved during segregations	The Application shall allow the copying/pasting/moving of data (including photos and sketches) from a parent parcel(s) to the resultant parcel(s) to be based on user-defined criteria or business rules. For example: User decides whether or not valuation flags, Situs address, etc., should be copied/pasted/moved to the resultant parcel(s).		

8.5.6 Judgments

Per RCW 84.56.240, the County Treasurer is to prepare and present a list of uncollectible personal property taxes to the Board of County Commissioners by the first Monday of February of each year.

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
355		Treasurer	Judgments	Judgments	The Application shall have a report which lists, by account, uncollectible personal property taxes, and the date the action took place.		
356		Treasurer	Judgments	Judgments	The Application shall provide the means to cancel any personal property taxes more than four years delinquent.		
357		Treasurer	Judgments	Judgments	The Application shall track a judgment tied to several Property Account Numbers, and generate a report to adjust taxes.		

Add refund module-inquire with Debbie/Walla Walla

~~8.5.7~~ Annexations

Formatted: Normal, No bullets or numbering

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
358		Treasurer	Annexations	Finance - Annexations	When an annexation occurs, the Application shall change, for the properties involved, the specific tax code area, and have all changes documented and available for customer service representatives.		
359		Treasurer	Annexations	Finance - Annexations	a) The Application shall create a shift in the receivables FROM one code area TO another code area. This includes all necessary documentation. b) All subsequent taxes collected shall flow through the distribution process to the proper (new) code area.		
360		Treasurer	Annexations	Finance - Annexations	The Application shall track and report results from annexations to include: The tax statement shall indicate the change in jurisdictions.		
361		Treasurer	Annexations	Finance - Annexations	The Application shall produce a report listing the property accounts affected by the annexation.		
362		Treasurer	Annexations	Finance - Annexations	The Application shall track and report results from annexations to include: A report on the REVENUE shifts between tax code areas as a result of the annexation.		
363		Treasurer	Annexations	Finance - Annexations	The Application shall produce a report showing the Receivables shift between tax code areas as a result of the annexation.		

~~8.5.8~~8.5.7Tax Relief

8.5.8.1 Tax Relief - 30 % Homeowner's Exemption

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
364		Assessor	Tax Relief - 30 % Homeowner's Exemption	30% Exemption	The Application shall enable the user to print a 30% Remodel Exemption form.		
365		Assessor	Tax Relief - 30 % Homeowner's Exemption	30% Exemption	In accordance with RCW 84.36.400, the Application shall be able to concurrently produce and track a reduced assessed value together with the full appraised value and shall be able push the reduced assessed value to the Treasurer's tax Application.		

366		Both Assessor and Treasurer	Tax Relief - 30 % Homeowner's Exemption	30% Homeowner's Exemption	The Application shall administer and track the 30% Homeowners' Exemption as described in RCW 84.36.400.		

8.5.8.2 Tax Relief - Destroyed Property

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
367		Assessor	Tax Relief - Destroyed Property	Destroyed Property	Upon activating the Destroyed Property module, the Application shall automatically notify the user that more than one building exists on the parcel.		
368		Assessor	Tax Relief - Destroyed Property	Destroyed Property	The Application shall allow users to print a Destroyed Property Form		
369		Assessor	Tax Relief - Destroyed Property	Destroyed Property	In the case of multiple buildings on one parcel, each with a differing degrees of destruction/damage, the Application shall allow the user to make adjustments specific to each building.		
370		Both Assessor and Treasurer	Tax Relief - Destroyed Property	Destroyed Property	Accounting for Destroyed Property is a multi-user process. The Application shall incorporate workflow tracking in such a way that the appraiser shall update and revalue the destroyed parcel, then electronically send the work to the Treasurer for the tax component (refund) etc.		

8.5.8.3 Tax Relief - Historic and Multi-Family Tax Abatement

ID#	P	Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
371		Assessor	Tax Relief - Historic and Multi-Family Tax Abatement	Historic and Multi-Family Tax Abatement	Application shall incorporate necessary functionality to implement tax abatements per: Multi-Family Tax Abatement: RCW 84.14.020		

8.5.8.4 Tax Relief - Senior Citizen and Disabled Property Owners

Per RCW 84.36.all and WAC 458.16A, Benton County is required to have the ability to calculate senior citizen frozen values, market values, and taxable values.

ID#	P	Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes

372		Treasurer	Tax Relief - Senior Citizen and Disabled Property Owners	Reports	The Application shall query the database to determine which accounts qualify for the highest level senior exemption status and have a tax bill for the current year that is greater than a variable dollar amount. The information associated with the account such as property owner, mailing address, current year tax bill amount and the amount of money the property owner is allowed to make as part of this program shall be used to prefill a form or template associated with Tax Work Off Activity. The formula for determining the amount of money the property owner is allowed to make is the current tax year bill amount less than a variable dollar amount.		
373		Both Assessor and Treasurer	Tax Relief - Senior Citizen and Disabled Property Owners	Senior Citizen and Disabled Property Owners Exemption	The Application shall administer the senior citizen and disabled property owner's exemption according to RCW 84.36.all.		
374		Assessor	Tax Relief - Senior Citizen and Disabled Property Owners	Senior citizen and disabled property owners exemption - audits	The user shall be able to select parcels for audits (random selection criteria and/or those that were previously marked to be audited), generate audit letters and forms for property owners and track the audit process.		
375		Both Assessor and Treasurer	Tax Relief - Senior Citizen and Disabled Property Owners	Senior Citizen and Disabled Property Owners Exemption - Integration	The Application shall be fully integrated with all other valuation programs (market value and current use assessments). Example: When a market value change is done, the change shall automatically adjust the senior exemption values/calculation accordingly.		
376		Both Assessor and Treasurer	Tax Relief - Senior Citizen and Disabled Property Owners	Tax Relief - Senior Citizen and Disabled Property Owners notices	The Application shall allow for notices to be generated communicating with property owners who qualify for a senior citizen tax exemption that no taxes are due. This notice shall be created in mass or individually. The Application shall allow for the creation of a file as well as a notice should the process become outsourced.		
377		Both Assessor and Treasurer	Tax Relief - Senior Citizen and Disabled Property Owners	Workflow process for senior citizen and disabled property owner's exemption	The Application shall have a workflow process that allows the user to track the processing of a senior citizen exemption from mailing the form (application), to receipt of the form, verification, application update, property owner notification, new taxation application update, audit, refunds, etc.		

8.5.9 Creation of Tax Assessment Fees & Bills

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
378		Treasurer	Creation of Tax Assessment Fees & Bills	Assessments - Storm Water	The Application shall add the Storm Water Fee line item amount to the Property Tax Statement, creating one bill for taxpayers.		

379		Treasurer	Creation of Tax Assessment Fees & Bills	Creation of Tax Assessment Fees & Bills	~~Should~~ Benton County bills ~~decide to bill~~ all assessments, fees and taxes on one statement.~~,~~ ~~t~~The Application shall accommodate the different payment requirements the County may impose~~. For example, taxes are billed at $1000.00, a lighting assessment is $23.00, and a storm water fee is $33.00. The first half statement should require the taxpayer to send in $556.00, and the second half should require the taxpayer to pay $500.00.~~ The Application shall be flexible to accommodate a change in payment requirements should the County indicate this is necessary.		
380		Treasurer	Creation of Tax Assessment Fees & Bills	Tax billing	The Application shall create information on the annual statement which documents the tax and/or fees that is reportable to the Internal Revenue Service.		
381		Treasurer	Creation of Tax Assessment Fees & Bills	Tax Creation and Billing	The Application shall be able to create data files for property tax, assessment, and fee accounts. The data shall be sent electronically to an outside vendor to allow for the creation of statements. The Application shall have the flexibility to create mailings at will.		
382		Treasurer	Creation of Tax Assessment Fees & Bills	Tax Creation and Billing	The Application shall identify and track accounts that are to be paid through a mortgage company. Those accounts identified as being paid through a mortgage company are sent an informational tax statement ~~do not receive a tax statement.~~		
383		Treasurer	Creation of Tax Assessment Fees & Bills	Tax Creation and Billing	The Application shall create a file for accounts that reference a mortgage company, to enable inclusion of property account number, mortgage company reference, and owner information. This information shall be created at will.		
384		Treasurer	Creation of Tax Assessment Fees & Bills	Tax Creation and Billing	The Application shall allow for the creation of statements at will. This process shall be done in-house. The Application will allow the statement to be formatted to replicate the Tax Statement produced by our vendor. The statement shall contain property account number, owner information, Situs address, assessed value, tax code area, levy breakdown, any and all delinquencies, and current year tax information. The statement shall have a payment coupon which contains an OCR scanline and a barcode.		
385		Treasurer	Creation of Tax Assessment Fees & Bills	Tax Creation and Billing	The Application shall document in the audit trail when a statement has been generated. The Application will ~~shall~~ document ~~if~~ when, by whom, and the reason the statement ~~was~~ is generated. ~~and requested by a staff member, IVR, WEB, due to a cancellation supplement, or a file was sent to the vendor for mass generation.~~		
386		Treasurer	Creation of Tax Assessment Fees & Bills	Tax Creation and Billing	The Application shall create post-petition statements for all accounts that are noted as being in bankruptcy. For example, if an account filed bankruptcy in 2001 and the bankruptcy is still active, statements shall only be generated for 2002 and forward. A note shall be documented on the statement which indicates prior years are owing but account is in bankruptcy.		

386-1		Treasurer	Creation of Tax Assessment Fees & Bills	Tax Creation and Billing	Application shall allow for assessments and taxes to be billed on a percentage of ownership or any combination as required by owners, and mailed to a third-party.		
387		Treasurer	Creation of Tax Assessment Fees & Bills	Tax Creation and Billing	The Application shall allow for text messages to be included on all statements. This includes mass-generated statements and those generated in-house. The text messages shall be modifiable by Treasurer's Office staff to accommodate changing needs and communication items. The text messages shall be triggered by particular items on the account. Text messages must be archival pursuant to Washington State Disclosure and Public Records Requirements.~~For example, should an account only show current year taxes owing, a message shall indicate on the account that taxes may be paid at any First Independent Bank branch.~~		
388		~~Treasurer~~	~~Creation of Tax Assessment Fees & Bills~~	~~Tax Creation and Billing~~	~~The Application shall identify when an account has been forwarded to a collection agency. In an automated fashion, any property or assessment, year-specific to an account, that has been forwarded to a collection agency, shall not print on a statement. This shall be decided by Treasurer's staff at the time of creation. This shall include any method of creation; individual generic statements generated in-house, or mass-generated by a third party vendor.~~		
389		Treasurer	Creation of Tax Assessment Fees & Bills	Tax Creation and Billing	The Application shall be able to differentiate between taxing districts when creating files for mass-generated statements. Should a city decide to send a unique mailing to their customers using the property tax statement as the mechanism, the Application shall accommodate this.		
389-1		~~Treasurer~~	~~Creation of Tax Assessment Fees & Bills~~	~~Tax Creation and Billing~~	~~System shall not allow billing on an inactive or deleted parcel~~		
390		Treasurer	Creation of Tax Assessment Fees & Bills	Tax Creation and Billing	The Application shall accommodate assessments and taxes billed on one statement to include the unique penalty and interest calculations for each assessment type (see interest and penalty table).		

Formatted Table

Commented [ER28]: Add to if not in other sections: 1. Email 2. ACH 3. Partial Payments/Delinquent payment plans

8.5.10 Current Use Assessments

8.5.10.1 General Requirements

In the early 1970's, the State of Washington legislature enacted two laws granting tax relief to property owners. Properties eligible for this program are taxed on their "current use" (value in use), rather than their "highest and best use" (market value). To qualify for this relief, property owners must make application and if approved, must engage in a continuing activity to maintain their status in the program. Property owners can voluntarily leave

the program, apply to change classifications, or may be disqualified from the program by the assessor. Each of these situations causes a series of events/activities that need to be tracked and followed to completion. When a property is removed from the program, the liability for deferred taxes, interest, and penalty may or may not be imposed. Also, removals can be in whole or only part of the classified acreage. The calculation, process, and procedures are different under the two laws.

The two laws are the Open Space Taxation Act and Forest Land. There are three classifications within the Open Space Taxation Act: Farm and Agricultural Lands, Timber Lands, and Open Space Lands. The Open Space Lands classification has 5 subcategories and within each of these, there are further qualifying categories. It is extremely important to be able to easily identify the specific criteria under which each application was approved. Historically, the legislature and County commissioners have made changes to these laws. It is very important that the system be flexible in order to adapt to any future law changes.

All processes—from application to valuation to removal—should be fully automated and integrated into all other programs, avoiding duplicate data entry. Through a workflow process, the user should be able to electronically forward and track documents, notes, forms, etc.

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
391		Both Assessor and Treasurer	Current Use Assessments - General Requirements	Administer the Current Use assessment program	The Application shall administer the Current Use assessment program as described in RCWs 84.33.all and 84.34.all.		
392		Assessor	Current Use Assessments - General Requirements	Current Use assessments fully integrated with other programs	The current use assessment tools shall be fully integrated with all programs. For example, a change in the market value of a property are automatically posted to the program that calculates the current use assessed value; changes to the land characteristics are automatically applied to the current use assessment program without the need of duplicate data entry or batch updates, etc.		
393		Assessor	Current Use Assessments - General Requirements	Current Use Forms	Forms that are used for the current use assessment process shall be available in the Application. The user shall be able to edit the layout and content of the form (Example: DOR makes changes to the form), and complete the form in an automated manner (Example: Information that is stored in the Application shall be automatically loaded into the form, rather than manual data entry).		

Questions

394	**Please describe how you shall administer the Current Use assessment program as described in RCWs 84.33.all and 84.34.all.**

8.5.10.2 Applications

Current process: A property owner will submit an application for a current use classification between January 1 and December 31, along with the required application fee. A current use folder will be created with the application and receipt for the application fee payment. The folders will be divided into two groups: Timber Land and Open Space Land applications, and Farm and Agricultural Land and Designated Forest Land applications. The reason for this division is the approval process is different for each group. Timber/Open Space applications are handled by Community Development with the Benton County Board of Commissioners approving; the Farm & Ag/DFL applications are reviewed and approved by the Assessor's office. Each group follows a separate process for reviewing the applications. Hardcopies of all notes from field inspections and meetings are documented and put in each folder. Once each group has determined the outcome for each of their applications (approval, partial approval, denial), notices are sent for all applications informing the property owner of the outcome.

Envisioned new process: We would like the ability to mark a property when an application has been received, track the application process electronically, attach corresponding data files, attach scanned images, enter notes, identify what type of application was made, forward information electronically and note the outcome of the application process. All notes, documents, data files, etc. associated with these transactions should be identified as being part of the current use application process.

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
395		Assessor	Current Use Assessments - Applications	Identify current use classification	The Application shall show which type of current use classification was approved (by application number) and is used for the current use assessment.		
396		Assessor	Current Use Assessments - Applications	Identify Open Space lands criteria	When a property owner's application has been approved for the Open Space classification, the Application shall show which specific criteria of this program was approved.		
397		Assessor	Current Use Assessments - Applications	Notes, data files and scanned documents	The Application shall track and store all notes, data files, scanned documents, etc. associated with the current use application process and identify them as such.		
398		Assessor	Current Use Assessments - Applications	Track classification by application number	The Application shall track the classification by application number. For example, a property may qualify for the current use program with more than one application number and more than one classification type.		
399		Assessor	Current Use Assessments - Applications	Track current use application	The Application shall provide a mechanism that allows the user to track/check on the progress of a current use application, from the time of submission, to either approval or denial of the application.		

8.5.10.3 Appraisal

Source valuation data comes from two sources: the Farm Advisory Group provides land rental values, and the State of Washington provides an interest rate, property tax component, and timber stumpage values. Currently we take these values, enter them into an Excel spreadsheet, and calculate a Rate per Acre and Capitalization Rate. Current use values are broken down by soil type as inventoried by the US Department of Agriculture in 1972.

Current process: We enter the information into CATS tables and run a recalculation program to calculate each parcel's current use value. To check the accuracy of this process, the values on each parcel are checked by downloading from CATS all values into an Excel spreadsheet, grouped by soil type and compared to the original Rate per Acre calculation. Errors are either corrected in the Rate per Acre table or on individual parcels, as necessary.

Envisoned new process: The new system should provide an automated mechanism for this process. The system should calculate the information needed to enter into the valuation tables. The system should allow for batch updates and have the ability to recalculate current use values as changes are made to an individual property. Example: If the soil type on a property is changed, the system should automatically recalculate the new values based on the corrected information.

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
400		Assessor	Current Use Assessments - Appraisal	Current Use valuation history	The Application shall retain at least 10 years of current use valuation history. This information is needed when calculating the compensatory tax.		
401		Assessor	Current Use Assessments - Appraisal	Current Use valuation tables	Based on information submitted by the Washington State Department of Revenue and Benton County's Farm Advisory Board, the Application shall be able to automatically calculate new rates and update the valuation table(s).		
402		Assessor	Current Use Assessments - Appraisal	Portion of property valued as current use	The Application shall allow the user to value only a portion of a property under the current use assessment program, while the remainder of the property is valued at full market value. The combined value of the two portions is the taxable value of the property.		
403		GIS	Current Use Assessments - Appraisal	Unique identifiers for property areas	For different areas of a property, the Application shall provide unique identifiers that can be tied to the GIS.		

8.5.10.4 Removals

Current Use is a legislatively-enacted tax relief—not a tax forgiveness program. When land is removed from classification, the deferred taxes, applicable interest, and penalty may be applied with the current owner

(compensatory tax). Land can be removed in whole (all of the classified land in a parcel) or in part (only a portion of the land in a parcel). Depending on the classification, the compensatory tax is calculated differently. However, similar source data is necessary: we need to identify the soil type and associated assessed value, and we need to identify the topography and its associated market value for up to the last ten (10) years. From this information, combined with the levy rate for each year and the date of removal we are able to calculate the compensatory tax.

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
404		Assessor	Current Use Assessments - Removals	Ability to void a current use removal	The user shall be able to void a current use removal. The history of the property shall retain all the preceding removal activities and shall show that the transaction was voided. The voiding of a current use removal will flow through to the creation of an invoice taking into consideration all the accounting entries that must be created.		
405		Both Assessor and Treasurer	Current Use Assessments - Removals	Creating a current use removal form	The Application shall have an automated mechanism to create a current use removal form. The information required to prepare this form shall be stored in the database, and the user shall be able to generate the form with little or no manual data entry.		
406		Assessor	Current Use Assessments - Removals	Estimates of compensatory tax for removals	The Application shall have an automated mechanism to create estimates of compensatory tax for removals. The information required to prepare this estimate shall be stored in the database, and the user shall be able to generate the estimate with no or little manual data entry. This is the same form as described in ID #360, however, it is generated and sent to the taxpayer as an estimate and should not affect taxes until the user marks it as a removal.		
407		Both Assessor and Treasurer	Current Use Assessments - Removals	Tracking and processing current use removals	The Application shall show that a current use removal was created. The user shall be able to view and/or reproduce the current use removal form at any time. Through an automated workflow process, the user shall be able to forward the electronic removal form for further processing to the Treasurer.		
408		Assessor	Current Use Assessments - Removals	Tracking current use removals through market value assessments	The Application shall have an automated mechanism that assures that all properties (or portions of properties) removed from the current use assessment program are revalued at full market value for the applicable assessment year.		
409		Assessor	Current Use Assessments - Removals	Tracking estimates of compensatory tax for removals	The Application shall show that an estimate for compensatory tax was created. The user shall be able to view and/or reproduce the estimate at any time.		

8.5.11 Board of Equalization

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
410		BOE	Board of Equalization	Petition Tracking	The Application shall include a Board of Equalization petition tracking module. This module shall be interfaced with the Assessor's application.		

8.5.12 Value Appeal Response and Call Tracking

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
411		Assessor	Value Appeal Response and Call Tracking	Appeals & Calls - Comps	The Application shall provide an automatic comparable sale comparison feature with appraiser manual override capability resulting in Board-ready comparable sale report listing sales and value adjustments to sales and final adjusted sale price for each comparable. Prior to running the comparable sale report, the user shall be given the opportunity to input a monthly trend factor for time which is applied to the sales selected for the sale report.		
412		Assessor	Value Appeal Response and Call Tracking	Appeals & Calls - Comps	The Application shall provide a comparable sales search tool that enable users to search for comparable sales within a user defined radius from the subject. (E.g. .25 mile, 1 mile, 3 miles etc….)		
413		Assessor	Value Appeal Response and Call Tracking	Appeals & Calls Module - Real/Personal	The Appeals and Calls module shall store and display all value changes to the certified assessed value. (Note: value changes usually occur as a result of a review process).		
414		Assessor	Value Appeal Response and Call Tracking	Appeals & Calls Module - Real/Personal	The Appeals and Call Tracking module shall store and display a parcel's certified assessed value for the year selected by the user and shall also store and display any newly published values that are not yet certified but have been mailed to the property owner. (Generally, it is the newly published value that has prompted the appeal or call to the Assessor's office.)		
415		Assessor	Value Appeal Response and Call Tracking	Appeals & Calls Module - Real/Personal	The Appeal and Call Tracking Module shall identify and link related parcels. For example, this would be used for an apartment complex consisting of four parcels with two buildings on each parcel.		
416		Assessor	Value Appeal Response and Call Tracking	Appeals & Calls Module - Real/Personal	The Appeals & Calls Module shall incorporate a workflow processing intelligence so that parcels flagged for review can be assigned to an appraiser, a specified work group; can be reassigned to different appraisers; all workflow has an audit trail.		
417		Assessor	Value Appeal Response and Call Tracking	Appeals & Calls Module - Real/Personal	The Appeals & Calls Module shall provide date & time stamped comment fields.		

418		Assessor	Value Appeal Response and Call Tracking	Appeals & Calls Module - Real/Personal	The Appeals and Call Tracker Module shall have an autofill function (i.e. fields in the module are automatically populated with stored data thus reducing data entry) In note section, Indicate level of programming needed to incorporate autofill feature for each of the following: BOE (Board of Equalization) Information: petition numbers, hearing dates etc.. Geocode Situs 1st Line Legal Building Characteristics Building Values Land Values Add On Values		
419		Assessor	Value Appeal Response and Call Tracking	Appeals & Calls Module - Real/Personal	The Appeals and Call tracking Module shall interface and exchange data with outside third-party software programs--specifically data entered at the local Board of Equalization seamlessly and automatically transfers to the Appeals and Call Tracking module.		
420		Assessor	Value Appeal Response and Call Tracking	Appeals & Calls Module - Real/Personal	The Application shall have an internal Appeals and Call Tracking Module that lets staff record and track incoming customer inquiries, appeals filed at the local (BOE) and appeals filed at the state level (BTA).		
421		Assessor	Value Appeal Response and Call Tracking	Appeals & Calls Module - Real/Personal	The Appeals & Calls Module shall enable an authorized user to create, store custom letters.		
422		Assessor	Value Appeal Response and Call Tracking	Appeals & Calls Module - Real/Personal	The Appeals & Calls Module shall store entries by Assessment Year, so notes and work for one assessment year are kept separate from the next assessment year.		
423		Assessor	Value Appeal Response and Call Tracking	Appeals & Calls Module - Real/Personal	The Appeals and Calls Module shall store, display and print all forms, letters, comparable sale grids and any other documentation sent to a property owner.		
424		Assessor	Value Appeal Response and Call Tracking	Appeals & Calls Module - Real/Personal	The Appeals & Calls Module shall allow users to assign a status to each appeal or call. (Status examples include: initial call needed; more research needed; BOE ready; etc.)		
425		Assessor	Value Appeal Response and Call Tracking	Appeals & Calls Module - Response Tracking	In response to inquiries or appeals, staff sends various letters to property owners that require the owner's signature. The signed letters are then returned to the Assessor's office. The Application shall interface with a County imaging system in such a way that scanned documents are associated with the correct property account number.		
426		Assessor	Value Appeal Response and Call Tracking	Appeals & Calls Module - Response Tracking & Attachments	In response to inquiries or appeals, staff sends various letters to property owners that require the owner's signature. The signed letters are then returned to the Assessor's office. The Application shall provide fields that allow users to record and track the owner's response to letters referenced above. (e.g. Yes, No, Agree, Disagree, Continue to BOE etc…)		

427		Assessor	Value Appeal Response and Call Tracking	Value Appeal and Response - completing standard forms and letters - Real/Personal	The Application shall give users access to all values and allows the user to determine which values are used to populate standard forms and letters.		
428		Assessor	Value Appeal Response and Call Tracking	Value Appeal Response and Call Tracking Reports - Real/Personal	The Application shall generate reports that allow management to assign work and monitor work status.		

8.6 Tax Collection

The Application shall allow for fully integrated receipting activity between a Point of Sale Application, Lockbox, Web, IVR, and electronic files. Benton County desires to implement an application that will aid in collection of delinquent accounts to include making all information relating to collection activity available to our customer service representatives.

8.6.1 Receipting

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
429		Treasurer	Tax Collection - Receipting	Electronic payment due file for mortgage companies	The Application shall allow for data files of payments due~~, to~~ and be created for~~available to~~ mortgage companies upon request. ~~through an FTP upload or similar. (Currently, this data is refreshed weekly.)~~		
430		Treasurer	Tax Collection - Receipting	Mortgage Reference Information	The Application shall receive mortgage company reference information electronically en masse. The mortgage information shall be identified within the Application by name. For example, if ~~Washington Mutual~~Wells Fargo defines which accounts they will make payment on, this information~~-~~ ~~Washington Mutual~~Wells Fargo~~-~~will be spelled out and displayed with the account. Assessments will be defined separately from taxes.		
431		Treasurer	Tax Collection - Receipting	Receipting	A report shall be generated which shall document exception payments placed on account with a payment that does not match what is owing. For example, should a current year 1st half tax bill be owing $350.00, however the payment received is $325.00~~,~~ If the partial payment is accepted, it shall be noted as an exception with the ability to record the reason for the payment acceptance, for audit purposes. ~~The Application shall have the ability to apply the payment after review from on-account to the tax bill. This report will be available for all receipting functions from~~		

Formatted Table

					~~Loans, remittance, POS and or third party file.~~		
432		Treasurer	Tax Collection - Receipting	Receipting	The Application shall produce an exception report which documents all accounts that do not match what was received vs. what is owed. This report shall also document what is within the County tolerance level for over and short.		
433		Treasurer	Tax Collection - Receipting	Receipting	When payments are processed ~~at the~~through the remittance ~~center~~processing~~, this equipment creates~~ a unique receipt number for each transaction is created by the Application~~.~~ The Application shall ~~be able to accept~~produce ~~this~~ the receipt number and date of transaction, and attach this information to the transaction at the time it is posted.		
434		Treasurer	Tax Collection - Receipting	Receipting	The application shall allow the County to reserve the right to utilize an over and short tolerance, which is set by the County and treats the bill as if it were paid in full by utilization of an over and short fund~~.~~		
435		Treasurer	Tax Collection - Receipting	Receipting - Loans	When a file is received, the Application shall post the payments in an on-account status. This process shall allow for an unlimited number of receipts processed in a ~~day~~file.		
436		Treasurer	Tax Collection - Receipting	Receipting - Loans	Payments shall be accepted via ACH. The payment shall be receipted via SQL Accounts Receivable with the data file received by the taxation Application. The taxation Application shall have a process to accommodate reconciliation of the two applications, and the files received by each.		
437		Treasurer	Tax Collection - Receipting	Receipting - Remittance	The Application shall be able to receive a file from a remittance processing system. The Application shall be able to pull payment files from the remittance network in an automated fashion, and load it into the taxation Application residing on the County network.		
~~438~~		~~Treasurer~~	~~Tax Collection - Receipting~~	~~Receipting - Remittance~~	~~The Application shall track all property accounts which opt out of ARC processing. This information shall be used in conjunction with the remittance processing system to accommodate the customer's desires.~~		
~~439~~		~~Treasurer~~	~~Tax Collection - Receipting~~	~~Receipting - Remittance~~	~~The taxation Application shall create a file containing accounts which have been paid in full, or if it is prior to May 15, 1st half taxes have been paid. This file shall be transferred daily from the County network to the remittance network. This transfer shall occur in a automated fashion.~~		
~~440~~		~~Treasurer~~	~~Tax Collection - Receipting~~	~~Receipting - Third Party file~~	~~Payments shall be accepted via ACH. The payment shall be receipted via SQL Accounts Receivable, with the data file received by the taxation Application. The taxation Application shall have a process to accommodate reconciliation of the two applications, and the~~		

					~~files received by each.~~		
441		Treasurer	Tax Collection - Receipting	Receipting - Third Party file	When a file is received from a third party, the payments shall be posted in an on-account status. This process shall allow for an unlimited number of receipts to be processed in a day.		
442		Treasurer	Tax Collection - Receipting	Stores receipt number against posting	The Application shall retain and associate the receipt number(s) and receipt date assigned by the cashiering Application. The cashiering Application may be Point of Sale, Remittance Processing, or loan payment files. The Application shall be able to associate receipt numbers for any other type of receipting activity which may occur today, or in the future. The timing of these postings to the Application shall be controlled manually, and shall be posted in a batch mode.		
443		Treasurer	Tax Collection - Receipting	Tax Collection - Receipting	The Application shall receipt an unlimited number of payments at any given time, including real property payments, supplemental taxes, and or assessments. At the same time, create an exception report for the payments that cannot be applied to an account. This process will allow Benton County to review the exception payment, and either apply the payment to the account, or refund the payment back to the appropriate party.		
444		Treasurer	Tax Collection - Receipting	Tax Collection - Receipting	The Application shall allow all payment files to be exported in the following formats: Text file, tab, delimited, mdb, dbf, or xml.		
445		Treasurer	Tax Collection - Receipting	Tax Collection Receipting	The Application shall ~~t~~ create bulk refunds (example mortgage company payments) with detail of why the payment was being returned, including the account number, the check number, and where the check is being returned. This information shall be retained in the Application for customer service review with the information transferred to SQL Accounts Payable for actual creation of the refund.		
446		Treasurer	Tax Collection - Receipting	Tax Collection Receipting	The Application shall be able to ~~unapply~~ reapply payments that are placed on account that have been received from an external receipting application and maintain an appropriate audit trail.		
447		Treasurer	Tax Collection - Receipting	Tax Collection Receipting	The Application shall transfer refund information to SQL Accounts Payable to include the following fields: a) Property Account Number b) Owner Name c) Address d) Amount of Refund e) Reason for Refund		
448		Treasurer	Tax Collection - Receipting	Tax Collection- Receipting	The Application shall ~~accmodate~~accommodate the County tolerance for over/short payments in accordance with Treasurer's Office Policies~~to the property tax account and GL~~.		

8.6.2 Collections

8.6.2.1 Distraint

Distraint rules are described in RCW 84.56.070 and .090. Additional clarification and guidance is provided in the Benton County Treasurer's Office Policies

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
449		Treasurer	Collections - Distraint	Collections - Distraint	When an account moves through the distraint process, particular events create fees. The Application shall associate fees with designated accounts based upon steps in the distraint process as defined in the B.C. Treasurer's Office Policies. Fees shall be added automatically to the collection Application and documented.		
450		Treasurer	Collections - Distraint	Collections - Distraint	The Application collection tool shall automatically document collection activity associated with the distraint process.		
451		Treasurer	Collections - Distraint	Collections - Distraint	The Application shall provide an automated queuing feature (established with criteria set internally) which prioritizes accounts needing additional review.		
452		Treasurer	Collections - Distraint	Collections - Distraint	The Application shall have the ability to identify properties meeting the definition of Distraint.		
453		Treasurer	Collections - Distraint	Collections -Personal Property Distraint	The Application shall auto-generate letters based upon defined dates. The letters shall be based upon predefined criteria associated with each account affected. This action shall be documented within the collection Application.		

8.6.2.2 Foreclosure

After the expiration of three years from the date of delinquency, when any property remains on the tax rolls for which no certificate of delinquency has been issued, the County Treasurer shall proceed to issue certificates of delinquency on the property to the County for all years' taxes, interest, penalties and costs (per RCW 84.64.050). **Additional clarification and guidance is provided in the Benton County Treasurer's Office Policies**

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
454		Treasurer	Collections - Foreclosure	Collections - Foreclosure	The Application and any associated collection tool shall have the ability to maintain all pertinent information, such as persons with a recorded interest in the property, whether a title search has been completed, or statutorily required mailings have been sent, are associated with the foreclosure properties.		
455		Treasurer	Collections - Foreclosure	Collections - Foreclosure	The Application and any associated collection tool shall have the ability to identify all potential properties meeting the foreclosure definition, and flag this information into the customer information tool (property events).		

456		Treasurer	Collections - Foreclosure	Collections - Foreclosure	The Application and any associated collection tool shall have the ability to track the number of mailings (both regular and certified), and shall provide a mechanism to enter the tracking number associated with each certified mailing.		
457		Treasurer	Collections - Foreclosure	Collections - Foreclosure	The Application shall use a general note screen for contact, payment, or general information associated with the property. The Application shall also have a general note screen that shall be used by all Customer Service Representatives.		
458		Treasurer	Collections - Foreclosure	Collections - Foreclosure	The Application collection tool shall have the ability to provide a daily call back or task list for those items that have not been worked to conclusion, or require additional follow-up at a later date.		
459		Treasurer	Collections - Foreclosure	Collections - Foreclosure	The Application shall associate foreclosure fees with specific account numbers defined as being in the foreclosure process. The Application shall be able to accomplish this for a single item, a group, or en masse.		
460		Treasurer	Collections - Foreclosure	Collections - Foreclosure	The Application shall allow adding any person (and their contact information) who has a recorded interest in or a lien of record upon the property.		
461		Treasurer	Collections - Foreclosure	Collections - Foreclosure	The Application shall contain forms/templates that are necessary in the foreclosure process. Examples include, but not limited to: Correspondence letters, certificate of delinquency, summons and notice letters, bidder's registration forms, bidder cards, agency assignment letters, Treasurer's Receipts, etc., and where appropriate, assign signatures to letters. These forms/templates shall be maintainable by appropriate staff.		
462		Treasurer	Collections - Foreclosure	Collections - Foreclosure	When needed, the Application shall enable personnel to do mail merge letters from this tool, and request the property owner's statements that are associated with each property. The Application shall have the flexibility to print these items in a collated manner, and produce address labels if needed.		
463		Treasurer	Collections - Foreclosure	Collections- Foreclosure	The Application shall track all sales proceeds until appropriately disbursed.		
464		Treasurer	Collections - Foreclosure	Report	The Application shall have the ability to provide on-screen or downloadable reports defined by the user. The Application shall have reports showing the foreclosure properties, the activities and status of such properties, fees that have been added to the account, and comments associated with collections or customer service efforts.		

8.6.2.3 ~~Miscellaneous third party assignment, b~~Bankruptcy~~, etc.~~

~~Benton County utilizes an outside source for collection of delinquent assessments and fees. The forwarding of accounts occurs after Benton County has met all Fair Debt and Credit Act requirements.~~ Bankruptcy account information is forwarded to the Treasurer's Office regarding property tax, assessment and fee accounts. Federal Bankruptcy rules must

be adhered to regarding collection activity. **Additional clarification and guidance is provided in the Benton County Treasurer's Office Policies.**

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
465		Treasurer	Collections - ~~Miscellaneous third-party assignment,~~B ~~b~~ankruptcy~~, etc.~~ update below	Able to process Chapter 13 bankruptcy payments	The Application shall process partial payments from the Chapter 13 trustee. The Application shall associate the partial payment to the property detailed by the trustee's office. Funds shall be held on-account.		
~~466~~		~~Treasurer~~	~~Collections - Miscellaneous third-party assignment, bankruptcy, etc.~~	~~Assign assessment to collection agency~~	~~Assigning assessments can be assigned to a specific collection agency. The property account is then flagged as an in Collections Status.~~		
467		Treasurer	Collections - Miscellaneous third-party assignment, bankruptcy, etc.	Bankruptcy flag	The Application shall provide for a bankruptcy flag preventing various statements and documents from being generated, such as batch tax statements, collection or delinquent letters, and other communications.		
~~468~~		~~Treasurer~~	~~Collections - Miscellaneous third-party assignment, bankruptcy, etc.~~	~~Collections~~	~~The Application shall track all garnishments that have been documented and provided to the Treasurer's Office by an outside party or other County Department.~~		
469		Treasurer	Collections - Miscellaneous third-party assignment, bankruptcy, etc.	Collections - Miscellaneous-third party assignment, bankruptcy, etc.	The Application shall update a flag, or have an indicator for accounts where a taxpayer files for bankruptcy protection.		
470		Treasurer	Collections - Miscellaneous third-party assignment, bankruptcy, etc.	Collections - Miscellaneous-third party assignment, bankruptcy, etc.	The Application shall have a report to list accounts in bankruptcy, and associate information relative to the bankruptcy such as filing date, chapter, status of bankruptcy, court documentation, etc.~~.~~		
471		Treasurer	Collections - Miscellaneous third-party assignment, bankruptcy, etc.	Collections - Miscellaneous-third party assignment, bankruptcy, etc.	The Application shall have a means to notify an outside collection agency when an account has been updated with a bankruptcy flag. This indicates that the collection efforts must be discontinued.		
472		Treasurer	Collections - Miscellaneous third-party assignment, bankruptcy, etc.	Collections - Miscellaneous-third party assignment, bankruptcy, etc.	For properties where the taxpayer files for bankruptcy protection, the Application shall update the collection module, either internal to the Taxation Application, or the County's collections application, for an account with a bankruptcy flag.		

Formatted Table

Formatted Table

473		Treasurer	Collections - Miscellaneous third-party assignment, bankruptcy, etc.	Collections - Miscellaneous-third party assignment, bankruptcy, etc.	The Application shall accept the addition of various fees to be associated with a property, or allocated to many properties. These fees include, but are not limited to: Foreclosure fees, collection fees, and lien fees.		
474		Treasurer	Collections - Miscellaneous third-party assignment, bankruptcy, etc.	Collections - Miscellaneous-third party assignment, bankruptcy, etc.	The Application shall have a report indicating all payment information made to accounts in bankruptcy.		
475		Treasurer	Collections - Miscellaneous third-party assignment, bankruptcy, etc.	Collections - Miscellaneous-third party assignment, bankruptcy, etc.	The Application shall produce collection letters.		
476		Treasurer	Collections - Miscellaneous third-party assignment, bankruptcy, etc.	Collections - Miscellaneous-third party assignment, bankruptcy, etc.	The Application shall produce correspondence letters.		
477		Treasurer	Collections - Miscellaneous third-party assignment, bankruptcy, etc.	Collections - Miscellaneous-third party assignment, bankruptcy, etc.	The Application shall provide a means to document notes, ~~and~~ taxpayer comments, and have the ability to store bankruptcy correspondence such as Proof of Claims~~.~~. This information shall be retained as part of the audit trail.		
~~478~~		~~Treasurer~~	~~Collections - Miscellaneous third-party assignment, bankruptcy, etc.~~	~~Collections - Miscellaneous-third party assignment, bankruptcy, etc.~~	~~The Application shall provide a method to assign delinquent accounts to an outside collection agency for collection. This shall be completed on a user level, who has the approved security for these type of transactions.~~		
479		Treasurer	Collections - Miscellaneous third-party assignment, bankruptcy, etc.	Collections - Miscellaneous-third party assignment, bankruptcy, etc.	The Application shall provide a means for adding additional fees or costs to delinquent accounts. The Application shall provide a method for these additional costs to be allocated to a single account, or to all accounts. This shall be accomplished for one item, a group, or en masse, either by individual posting or calendared events.~~.~~

483		Treasurer	Collections - Miscellaneous third-party assignment, bankruptcy, etc.	Track bankruptcy, mortgage and user-defined codes	The Application shall allow the user to track and report on properties with a bankruptcy code, mortgage code, and user-defined codes this shall include a code specific to assigning an account to collections. Benton County set-up shall assign priority levels for these codes.		

Formatted Table

8.6.3 Paid Under Protest

As stated in RCW 84.68.020, should any property account owner find that the levy of taxes associated with that property be excessive may pay these taxes under protest. This action requires written documentation from the property account owner as to the properties in questions and the grounds for such protest. The owner of record then has the right to take action in Superior Court or Federal Court.

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
484		Both Assessor and Treasurer	Paid Under Protest	Paid Under Protest	The Application shall image the paid under protest letter from the taxpayer and related County generated correspondence, and associate it to the property and tax year.		
485		Both Assessor and Treasurer	Paid Under Protest	Paid Under Protest	The paid under protest letter image is associated with each property listed in the protest letter. In order to accomplish the foregoing, the Application, if necessary, shall interface with other systems/applications.		
486		Both Assessor and Treasurer	Paid Under Protest	Reporting	The Application shall report all paid under protest accounts. This report shall contain the name on the account, property account number, and tax year.		

8.6.4 Advance Taxes

Per RCW 58.08.040, prior to the recording of a plat subsequent to May 31st in any year and prior to the actual collection date of real property taxes a deposit shall be collected by the Treasurer. The deposit shall equal the product of the County Assessor's latest valuation on the property, less improvements in such subdivision, multiplied by the current year's levy rate, increased by twenty five percent. A receipt shall be issued which becomes evidence of the payment.

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
487		Treasurer	Advance Taxes - Real Property	Advance taxes - Real Property	The Application shall calculate the amount required for the Deposit of advance taxes. The formula is: The current assessed value, less improvements, multiplied by 125% of the current year's levy rate.		
488		Treasurer	Advance Taxes - Real Property	Advance Taxes - Real Property	The Application shall document the payment placed on account for the advance taxes for the property. Documentation shall consist of a minimum of who paid, payment date, the advance tax year, and the receipt number.		
489		Treasurer	Advance Taxes - Real Property	Advance Taxes - Real Property	The Application, in the following year, shall apply the on account payment to the property account number, billing for the current year, and generate a refund for the amount of the overage on this account. This shall be available for a single item, a group, or en masse.		
490		Treasurer	Advance Taxes - Real Property	Advance Taxes - Real Property	The Application shall provide a report of all the advance taxes where a deposit has been placed on account.		
491		Treasurer	Advance Taxes - Real Property	Advance Taxes - Real Property	The Application shall have a status for each account as "on -account" to allow payments to be applied to the tax account without associating to a tax or assessment billing.		
492		Treasurer	Advance Taxes - Real Property	Advance Taxes - Real Property	The Application shall create a certificate of taxes paid letter after payment of advance taxes has been received.		
493		Treasurer	Advance Taxes - Real Property	Advance Taxes - Real Property	The Application shall allow "on-account" payments to be applied in mass.		
494		Both Assessor and Treasurer	Advance Taxes - Real Property	Certify taxes paid	The Application shall freeze/flag values, (not allowing for any value changes that will affect taxes to occur) at the time advanced taxes have been receipted and placed on account.		
495		Treasurer	Advance Taxes - Real Property	Report	The Application shall generate a report after the process of posting the advance taxes in the new year, which shall show payments placed on account have been applied to the account, and any remaining amount to be refunded. This report shall be defined by year.		

8.6.5 Current Use Removals

Landowners may request that their property be put into one of several categories of Current Use and taxed at lower than market value. These include Farm and Agricultural, Timber, and Open Space in accordance with RCW 84.34. The Assessor's Office determines that a property qualifies for a special program, and makes the value adjustment to assess taxes at the lower rate.

Parcels can be removed at the owner's request, when the property no longer qualifies, when a change in use results in disqualification, exempt owner, or when the Notice of Continuance is not signed. At this time the taxes for the difference

between market value and current use value for the last 7 years are due along with interest at 1% per month and, if there has been a change in use, a 20% penalty on the tax and interest. Recording fees are assessed and tax is calculated for the remainder of the current year.

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
496		Treasurer	Tax Collection - Current Use Removals	Current Use Removal	When the Assessor's Office removes an account from current use, the Application shall automatically generate a statement for the customer to pay. This statement shall detail the reason for its creation (removal from current use program), as well as: Itemized prior year's taxes interest on prior year's taxes penalty on prior year's taxes recording and filing fees remainder of current year's taxes		
497		Treasurer	Tax Collection - Current Use Removals	Current Use Removal	Upon receipt of payment, the Assessor's Office shall be able to review information online to this affect, and move forward with release of lien.		
498		Treasurer	Tax Collection - Current Use Removals	Current Use Removal	The Application shall include current use removal fees, to include delinquencies, with the mass generation of property tax statements, as well as being able to generate and include this information on property tax statements generated in-house.		
499		Treasurer	Tax Collection - Current Use Removals	Current Use Removal	The Application shall be able to track delinquent current use removal fees, and include this information in the foreclosure process, should the delinquency meet the criteria established for foreclosure.		
500		Both Assessor and Treasurer	Tax Collection - Current Use Removals	Tax Collection - Real Property and Current Use	The Application shall allow for landowners that request that their property be put into one of several categories of Current Use, and taxed at lower than market rate. Parcels can be removed at the owner's request, when the property no longer qualifies, when a change in use results in disqualification, exempt owner, or when the Notice of Continuance is not signed. At this time, the taxes for the difference between market value and current use value for the last 10 years (this shall be a variable field), are due along with penalty and interest.		
501		Treasurer	Tax Collection - Current Use Removals	Tax Collection - Real Property and Current Use	The Application shall allow for, upon receipt of payment, distribution to occur as follows: 1) Prior year's taxes, using the levy rates for the prior year 2) Interest and penalty to the general fund 3) Recording and filing fees as required		
502		Treasurer	Tax Collection - Current Use Removals	Tax Collection - Real Property and Current Use	The Application shall distribute current use taxes using the same levy rates as other property accounts in the code area.		
503		Treasurer	Tax Collection - Current Use Removals	Tax Collection - Real Property and Current	The Application shall generate property tax statements for accounts in current use in the same manner that other real property tax statements are generated. This shall include the mass generation of statements created twice yearly.		

				Use			
504		Treasurer	Tax Collection - Current Use Removals	Tax Collection - Real Property and Current Use	The Application shall track an account in current use for its delinquent status to include the calculation of delinquent ~~interst~~interest (see Interest and Penalty table).		

8.6.6 Payments in Lieu of (Timber harvest, etc)

Benton County receives revenues that are required to be distributed to the County and the rest of the taxing districts based upon the same allocation formulas as property taxes given the location where the revenue was derived.

506		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
507		Treasurer	Tax Collection - Payments in Lieu of (Timber harvest, etc)	Tax Collection - Payments in Lieu of (Timber harvest, etc)	Payment in Lieu of taxes (PILOT) includes the following: DNR Timber, DNR Purchase, DNR Other, Private Harvest Timber Land, Federal Entitlement Land, Housing Authority PILOT, and Federal PILOT. The user shall be able to change, update and maintain the tax code formulas, without programmer intervention, for the calculation of the revenue distribution.		
508		Treasurer	Tax Collection - Payments in Lieu of (Timber harvest, etc)	Tax Collection - Payments in Lieu of (Timber harvest, etc)	The Application shall have the ability to export collection information in delimited or fixed ASCII text.		

8.6.7 Refunds

The Benton County Treasurer's Office processes several distinct forms of refunds:

- Cashier refunds – those associated with transactions receipted by a general cashier
- Remittance refunds – those associated with transactions processed through remittance equipment
- ~~Loan~~ Mortgage refunds – those associated with transactions processed from bulk mortgage and tax service agencies and petition refunds-those associated with a tax status change or a value adjustment.

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
509		Treasurer	Refunds	Petition Refunds	The Application shall have an interest table so that interest for prior years is calculated correctly. This table shall contain both current and prior year interest rates. The interest rates shall be modifiable by appropriate personnel (See Interest and penalty table)		
510		Treasurer	Refunds	Refunds	The Application shall provide report(s) for the refunds of the day, which shall contain the corresponding details necessary for support documentation.		

511		Treasurer	Refunds	Refunds	The Application shall retain all refund information so that customer service representatives have ready access to this information.		
512		Treasurer	Refunds	Refunds	The Application shall track the status of the refund process including, but not limited to: Processed for payment, pending documentation, in accounts payable, refund mailed, etc.		
513		Treasurer	Refunds	Refunds	The Application shall create a refund file that shall be loaded into SQL Accounts Payable		
514		Treasurer	Refunds	Refunds	The Application shall accommodate various refund types. The refund type is the source of the refund, for example: The cashiers, remittance processor, loan/mortgage companies, and taxpayer petitions.		
515		Treasurer	Refunds	Refunds	The Application shall print or calendar (save) the refund letter(s) for printing at a later date, in order to coincide with when the refund check is created and available for mailing to the taxpayer.		
516		Treasurer	Refunds	Refunds	The Application shall generate a letter detailing the type of refund and reason for the refund. This letter shall contain specific information relating to property accounts being refunded.		
517		Treasurer	Refunds	Refunds	The Application will have the ability to produce refund checks and be able to produce a check register with security controls over voids and check issuance.		

8.6.8 Mobile Home Movement Permits

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
517		Treasurer	Mobile Home Movement Permits	Mobile Home Movement Permits	The Application shall be able to process mobile home movement permits, process advance taxes for a mobile home, issue proof of taxes paid letter and accommodate all requirements associated with the mobile home remaining in the County, moving out of the County or out of the state.		

8.7 Tax Accounting

The ATS System shall provide seamless interface with an SQL Financial System which produces the financial reports for the County and its districts. The ATS system will need to be flexible enough to allow the users to meet the reporting needs of the assessment and taxing districts instead of having the users manipulate the data in the system to meet those needs.

The ATS system will provide detailed and summary reports within a specified date range that will aid in balancing the POS System to the SQL Financial System and also provide detailed tax and assessment reports for each fund that has levies or assessments.

The ATS shall provide accounting to the SQL Financials General Ledger for revenues and receivables at the time of levy certification and to provide accounting for receipts as well as

cash and receivables. All adjustments should also be accounted for as an adjusting entry to revenues and receivables.

8.7.1 Distribution

Distribution is a process that distributes property taxes and assessments to property accounts on CATS, as well as posts accounting transactions to the County and its junior taxing districts funds within the SQL GL.

Formatted: Highlight

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
518		Treasurer	Tax Accounting - Distribution	Account detail transfer to SQL General Ledger	Account details shall be transferred by the Application to SQL General Ledger by day, in detail--not as a summary.		
519		Treasurer	Tax Accounting - Distribution	Distribution	At the time of distribution of property tax receipts, the amount collected may differ from what is distributed due to rounding issues associated with the levy rates used for distribution. The Application shall account for such rounding issues, and allocate such funds to a specific account code/fund.		
520		Treasurer	Tax Accounting - Distribution	Finance - Distribution	The Application shall provide each cashier's receipts by type (i.e., real property, personal property, interest, penalty, etc.)		
521		Treasurer	Tax Accounting - Distribution	Finance - Distribution	The Application shall provide a daily list of entries to SQL General Ledger.		
522		Treasurer	Tax Accounting - Distribution	Finance - Distribution	The Application shall provide a daily list of distributions to each code area.		
523		Treasurer	Tax Accounting - Distribution	Finance - Distribution	The Application shall provide a daily list of distributions to each Fund by levy year.		
524		Treasurer	Tax Accounting - Distribution	Reports - Daily Balancing	All Receipts Listing (summarizes all cashiers' work of the day and totals all property tax receipts for the day)		
525		Treasurer	Tax Accounting - Distribution	Reports - Daily Distribution	Real Property Listing (lists Real Property Tax, Excise Tax, Interest on each, Lien Fees, Over/Short amounts for the day).		
526		Treasurer	Tax Accounting - Distribution	Reports - Daily Distribution	Personal Property Listing (Personal Property Taxes, Interest, Lien Fees, Over/Short amounts for the day)		
527		Treasurer	Tax Accounting - Distribution	Reports - Daily Distribution	Local Improvement District Transactions (lists LID, Interest, Lien Fees, Over/Short amounts for the day)		
528		Treasurer	Tax Accounting - Distribution	Reports - Daily Distribution	Distribution by Code Area (lists totals receipted in each code area, and distributes the receipts by fund)		
529		Treasurer	Tax Accounting - Distribution	Reports - Daily Distribution	Distribution by Code Area (lists totals receipted in each code district by year the taxes were due in, including interest and penalty)		

530		Treasurer	Tax Accounting - Distribution	Reports - Daily Distribution	Treasurer Real/Personal/Excise Receipts Treasurer's Receipt Offline Proof (summary of tax receipts by fund for distribution to the General Ledger)		
531		Treasurer	Tax Accounting - Distribution	Reports - Daily Distribution	Distribution of Excise Taxes (summary of excise taxes distributed by fund)		
532		Treasurer	Tax Accounting - Distribution	Reports - Daily Distribution	Listing of assessments by type with full accounting code listing.		
533		Treasurer	Tax Accounting - Distribution	Reports - Daily Distribution	Full accounting journal for assessments as interfaced to SQL GL with balancing totals		
~~534~~		~~Treasurer~~	~~Tax Accounting - Distribution~~	~~Reports - Daily Distribution~~	~~Local Improvement Offsets Treasurer's Receipt Offline Proof (lists distribution of CWP, RID etc., by fund)~~	-	
535		Treasurer	Tax Accounting - Distribution	Tax Accounting - Distribution	The Application shall distribute property taxes to taxing districts based upon percentage of levy rate calculation for specific taxing districts which the property account lays.		
536		Treasurer	Tax Accounting - Distribution	Tax Accounting - Distribution	The Application shall distribute property tax payments daily in a batch process.		
537		Treasurer	Tax Accounting - Distribution	Tax Accounting - Distribution	The Application shall allow for the ability to reconcile cash receipts to tax code areas.		
538		Treasurer	Tax Accounting - Distribution	Tax Accounting - Distribution	The Application shall be able to reconcile cash receipts to each fund that has received distributions.		
539		Treasurer	Tax Accounting - Distribution	Tax Accounting - Distribution Reports	The Application shall allow reports to be regenerated after an accounting period is closed.		
540		Treasurer	Tax Accounting - Distribution	Tax Accounting - Distribution Reports	The Application shall allow for reports to balance receipts posted to accounting entries to be loaded into SQL FMS General Ledger.		
541		Treasurer	Tax Accounting - Distribution	Tax Accounting- Distribution Reports	The Application shall contain reports to balance receipts posted to overall accounts updated in the database.		

Formatted Table

8.7.2 Tax Roll

Tax Roll is the accounts receivable of all of the property taxes by fund by levy year. The certified tax levy for a jurisdiction creates the property tax receivable for the given levy year. The amounts due are calculated by the assessed value times the levy rate and are posted to the current year. The County is required to track these receivables by GASB 34 for 10 years. The tax roll is separated by the current year and 5 delinquent years. The oldest delinquent year is made up of all of the remaining delinquent years. Throughout the year, payments are made to the individual parcels, consequently adjusting the accounts receivables. In addition cancellation and/or

supplements are applied to the parcels. There are also annexations which occur periodically throughout the year and these changes need to be reflected in the Tax Roll (Accounts Receivables).

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
542		Both Assessor and Treasurer	Tax Accounting - Tax Roll	Adjudicated Refunds	The Application shall distribute and account for Adjudicated Refunds as prescribed in RCW 84.68		
543		Both Assessor and Treasurer	Tax Accounting - Tax Roll	Administrative Refunds	The Application shall distribute and account for Administrative Refunds as prescribed in RCW 84.69.		
544		Treasurer	Tax Accounting - Tax Roll	Reports - Mid-month and Month End	Month to Date Code Area Report (lists receipts for the period, by code area, by year, by Regular Tax, Fire Patrol, LF Penalty, Penalty, Interest)		
545		Treasurer	Tax Accounting - Tax Roll	Reports - Mid-month and Month End	Distribution of Excise Taxes (month end only) (summary of excise taxes, distributed by fund)		
546		Treasurer	Tax Accounting - Tax Roll	Reports - Mid-Month and Month-End	Distribution Tax Roll (lists tax receipts for the period, by fund, by year)		
547		Treasurer	Tax Accounting - Tax Roll	Tax Accounting - Tax Roll	The Application shall be able to generate web-ready reports.		
548		Treasurer	Tax Accounting - Tax Roll	Tax Accounting - Tax Roll Reports	The Application shall produce a report to reconcile the Tax Roll to the Taxation Database.		
549		Treasurer	Tax Accounting - Tax Roll	Tax Roll	The Application shall track property tax receivables for a specified number of years. The number of years to be tracked should be a variable field, configurable by the appropriate County staff member.		
550		Treasurer	Tax Accounting - Tax Roll	Tax Roll	The Tax Roll is separated by the current year and 9 delinquent years. The Application shall use the 9th delinquent year as the year to which all prior delinquent years are rolled.		
551		Treasurer	Tax Accounting - Tax Roll	Tax Roll	As changes are made within the Application for annexations, cancellations, supplements, combinations, or segregations, the changes to the receivables shall be reflected in Tax Roll. The changes shall occur in Tax roll in batch mode.		
552		Treasurer	Tax Accounting - Tax Roll	Tax Roll	The Application shall create tax roll in fund order.		
553		Treasurer	Tax Accounting - Tax Roll	Tax Roll	When the tax payment and/or cancellation supplement occurs, the Application shall make the necessary posting that shall occur to both the Tax Roll and the Taxation database simultaneously. This shall be seamless, and shall provide daily adjustments to the Tax roll based upon activity.		

554		Treasurer	Tax Accounting - Tax Roll	Tax Roll	~~At the beginning of every month, r~~Reports ~~shall~~ can be generated to confirm that the tax rolls balance to the Taxation database. The reports shall ~~be a bimonthly summary,~~ consist~~ing~~ of all Real & Personal Property taxes paid, and any cancellation/supplements, and any annexation adjustments by both code areas and by funds, and to tie back to the daily activity. The reports shall allow for drill down capabilities to the source transaction level as well any scanned images.		
555		Treasurer	Tax Accounting - Tax Roll	Tax Roll	The Cancellation/Supplement report shall list all of the parcels being adjusted within the code areas. These reports are needed to confirm that the ending balances of the tax roll database and the property tax database are the same.		
556		Treasurer	Tax Accounting - Tax Roll	Tax Roll	~~Mid-month tax roll and end of the month t~~Tax roll reports shall be generated in order to assist with the daily distribution. These reports shall be capable of being viewed on-line daily with drill down capabilities to the source transaction level as well any scanned images.		

8.7.3 Tax Remittance

Benton County remits property tax collections directly to certain taxing districts either on a daily basis, semi-monthly, or monthly basis.

`ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
557		Treasurer	Tax Accounting - Tax Remittance	Tax Accounting - Tax Remittance Reports	The Application shall generate a report which compiles ~~monthly~~ amounts due to the cities.		
558		Treasurer	Tax Accounting - Tax Remittance	Tax Remittances	The Application shall track periodic receipts of property tax collections to taxing districts.		
~~559~~		~~Treasurer~~	~~Tax Accounting - Tax Remittance~~	~~Tax Remittances~~	~~The Application shall create an export file for SQL Accounts Payable, which shall allow the County to electronically remit these periodic tax funds.~~		

Formatted Table

8.7.4 Accounting and Maintaining Property Tax Receivables

Once property taxes have been created in certification, the dollars associated shall be generated to load such receivables into SQL Financials to account for the property tax receivable for the new levy year for County and taxing district funds.

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
560		Treasurer	Tax Accounting - Accounting and Maintaining Property Tax Receivables	Accounting and Maintaining Property tax receivables	Once property taxes have been created in certification, the Application shall ~~generate a file to load the accounting entries into SQL General Ledger to~~ account for the property tax receivable for the new levy year for County taxing district funds. Similar entries must be made when a cancelation or supplement occurs.		

561		Treasurer	Tax Accounting - Accounting and Maintaining Property Tax Receivables	Accounting and Maintaining Property tax receivables	This file shall contain the account coding for both the receivable and the revenue accounts.		
562		Treasurer	Tax Accounting - Accounting and Maintaining Property Tax Receivables	Accounting and Maintaining Property tax receivables	The application will have the ability to export daily, the property tax receivables in delimited or fixed ASCII text.		
563		Treasurer	Tax Accounting - Accounting and Maintaining Property Tax Receivables	Accounting and Maintaining Property tax receivables	The Application shall allow reporting of accounting entries prior to posting to SQL Accounts Receivables to ensure accuracy. The ability to print this file shall be available prior to downloading to Accounts Receivables.		
~~564~~		~~Treasurer~~	~~Tax Accounting - Accounting and Maintaining Property Tax Receivables~~	~~ax Accounting - Accounting and Maintaining Property Tax Receivables~~	~~The Application shall update and cross validate the General Ledger account codes from the County's SQL General Ledger.~~		

Formatted Table

Questions

565	Describe how the Application generates accounting transactions.

8.7.5 Accounts Receivables for Fees and Assessments

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
566		Treasurer	Tax Accounting - Accounts Receivables for Fees and Assessments	Accounts Receivables for Fees and Assessments	Receipts shall be recorded to the General Ledger with assessment principal, delinquent interest and penalty.		
567		Treasurer	Tax Accounting - Accounts Receivables for Fees and Assessments	Accounts Receivables for Fees and Assessments	Once fees and assessment rolls are created, the Application shall create a file to load into the General Ledger that accounts for the assessment receivables for the new levy year. This file shall include account coding for both the receivable and the revenue.		
568		Treasurer	Tax Accounting - Accounts Receivables for Fees and Assessments	Tax Accounting - Accounts Receivables for Fees and Assessments	The Application shall update and cross validate the General Ledger account codes ~~from~~ to a ~~the County's SQL~~ General Ledger.		

8.7.6 Overlapping Debt

Overlapping debt occurs when the same parcel is servicing the debt of multiple districts.

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
569		Treasurer	Tax Accounting - Overlapping Debt	Finance - Overlapping Debt	The Application shall report the total property assessment value within each district that it has identified as an overlapping district, along with the percentage of each overlapping district property that lies within the specified district that is being looked at. The report takes the outstanding debt for each district and multiplies it by the percent of property value within that district.		
570		Treasurer	Tax Accounting - Overlapping Debt	Finance - Overlapping Debt	The Application shall produce an Underwriter's Report. The report shall show millage rates for all levies within this fund's specific district, for each year that lies within a specified time frame. This report shall also contain the amount levied for a specific year within the given date range, the adjustments to each levy, along with the collected amount for the levy, for each year, within that specified date range and the balance remaining.		

8.8 GIS

Benton County has a mature GIS system that is well integrated into the existing Assessment and Taxation system. It is anticipated that the new system will provide at least the same level of integration.

Benton County currently uses the ESRI product line for its GIS applications. The parcel data is stored in ArcSDE 9.0 and is published weekly in shapefile format.

Application level interaction between the CAMA and GIS provides the appraiser with the ability to select a parcel or parcels using a GIS viewer and automatically pass that selected set of records to the CAMA for further processing or analysis. Application integration should also allow the appraiser to pass the selected set of records from the CAMA system to a GIS viewer.

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
571		GIS	Geographic Information System	Exporting sketches	The Application shall export the building sketch into an ESRI compatible vector format that includes the building ID.		
572		GIS	Geographic Information System	Geographic coordinates	The CAMA Application shall track geographic coordinates for the building location.		
573		GIS	Geographic Information System	GIS and CAMA application integration	The Application shall allow authorized Benton County users to choose the symbology used in the map.		

574		GIS	Geographic Information System	GIS and CAMA application integration	The Application's source code for the GIS Viewer shall be available to Benton County.		
575		GIS	Geographic Information System	GIS and CAMA application integration	The Application shall support multiple years of ortho-photography.		
576		GIS	Geographic Information System	GIS and CAMA application integration	The Application shall support ESRI shapefiles.		
577		GIS	Geographic Information System	GIS and CAMA application integration	The Application shall support ESRI SDE layers.		
578		GIS	Geographic Information System	GIS and CAMA application integration	The Application shall allow authorized Benton County users to choose the layers used in the map.		
579		GIS	Geographic Information System	GIS and CAMA application integration	The Application shall include a GIS viewer.		
580		GIS	Geographic Information System	GIS and CAMA application integration	The Application's included GIS Viewer shall be developed using ESRI software.		
581		GIS	Geographic Information System	GIS and CAMA application integration	The Application's GIS viewer shall operate on a field device with no LAN access.		
582		GIS	Geographic Information System	GIS Interface	The Application provides an interface between Benton County's existing ESRI GIS Application and the proposed CAMA Application. For example, the interface can send the GIS Application a property account number, or the CAMA Application can receive a property account number from the GIS and display the CAMA record for that number.		
583		GIS	Geographic Information System	GIS interface documentation - Real/Personal	The Application shall include a well-documented database architecture and table structures that provide simple, secure access for GIS technicians.		
584		GIS	Geographic Information System	Information exchange from GIS to the Application	The Application shall provide a mechanism for dynamically receiving a selected set of parcels and attributes from a GIS application.		
585		GIS	Geographic Information System	Information exchange from the Application to GIS	The Application shall provide a mechanism for dynamically passing a selected set of parcels and attributes to a GIS application.		

586		GIS	Geographic Information System	Vector sketches	The first floor of the building sketches can be exported in an ESRI supported vector format for use as a building footprint layer in the GIS.		

8.9 Sales Transaction Management

Benton County desires to integrate processes to create more efficiency within the areas of excise tax processing, distribution, sales analysis and record maintenance. Benton County desires to receive excise tax information electronically where the data is then stored in tables that are readily accessible to perform these processes.

8.9.1 Excise / Real Estate Excise Tax (REET)

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
587		Treasurer	Real Estate Excise Tax	Excise Tax	The Application shall receive excise tax information electronically and import the data into the tax Application in an automated fashion.		
588		Treasurer	Real Estate Excise Tax	Real Estate and Mobile Home Excise Taxes	The Application shall provide for a configurable administrative fee that shall be distributed to multiple funds.		
589		Treasurer	Real Estate Excise Tax	Real Estate and Mobile Home Excise Taxes	The Application shall provide for excise tax rates that are configurable at an administrator level, and are table-driven.		
590		Treasurer	Real Estate Excise Tax	Real Estate and Mobile Home Excise Taxes	The Application shall provide a sequential excise number that is assigned for all transactions to be recorded with the Auditor's Office.		
591		Both Assessor and Treasurer	Real Estate Excise Tax	Real Estate Excise Tax	Real Estate Excise information shall be used to complete information relating to sales analysis, name and address changes, real estate excise tax distribution, and Land Records work processes. The information shall be stored in one place, with all parties using the same data to complete processes.		
592		Treasurer	Real Estate Excise Tax	Real Estate Excise Tax	When Excise has been processed, the information shall update tables in a pending status until the appropriate review and approval has occurred.		
593		Treasurer	Real Estate Excise Tax	Real Estate Excise Tax	The Application shall, if necessary, integrate with a third-party to accommodate electronic excise filing and processing.		
594		Treasurer	Real Estate Excise Tax	Real Estate Excise Tax	The Application shall have a table to set REET rates and shall allow for additional rates as needed.		
595		Treasurer	Real Estate Excise Tax	Real Estate Excise Tax	The Application shall track the rate to be collected by the rate effective date and allow for payments to calculate based upon sales occurring within effective dates.		

596		Treasurer	Real Estate Excise Tax	Report	The Application shall allow user to query defined parameters to create a Real Estate Excise Tax report. This information shall prefill a form or a template containing but not be limited to the following information from the query: date, beginning and ending affidavit numbers for a selected time frame, total of affidavits, number of affidavits that are for mobile homes, total state and local tax collected (excluding refunds, mobile home, penalties & interest. The users shall have the ability to add these amounts in later in the report)		
597		Treasurer	Real Estate Excise Tax	Real Estate Excise Tax Distribution	The Application shall distribute daily the collected real estate excise taxes. The tax is distributed based upon the following formulas: (State REET x Sales Price)- ~~1%~~ administrative fee = A (City REET x Sales Price) – ~~1%~~ administrative fee = B Total REET = A + B Or (State REET x Sales Price)- ~~1%~~ administrative fee = A (County REET x Sales Price)- ~~1%~~ administrative fee = C Then C/2 = D(County Capital) D/2 = E (County Parks) & F (County Economic Development Total REET = A + C + D + E +F		
598		Treasurer	Real Estate Excise Tax	Real Estate Excise Tax Distribution	Upon entering the parcel, the ATS will draw from REET tax tables to calculate the REET owing. (The tables need to be able to retain history so that delinquent taxes can be collected and distributed appropriately.) The rates will be applied against the sales amount and calculated. ~~The current rates are as follows:~~ ~~State of Washington 1.28%~~ ~~Benton County – Capital (unincorporated) .25%~~ ~~City of Benton 0.25%~~ ~~City of Waitsburg 0.50%~~ ~~City of College Place 0.25%~~ ~~City of Prescott 0.0%~~ The formula for REET is: Sales Price x REET rate = Real Estate Excise Tax (REET)		

598-1		Treasurer	Real Estate Excise Tax	Real Estate Excise Tax Distribution	System shall electronically transmit required information to Washington Department of Information on a Monthly schedule		
599		Treasurer	Real Estate Excise Tax	Real Estate Excise Tax Distribution	The ATS will distribute the REET based upon these formulas and code the result to the appropriate accounting codes to be interfaced with SQL Financials General Ledger.		
600		Treasurer	Real Estate Excise Tax	Real Estate Excise Tax Distribution	The ATS shall provide daily summaries of the amount of REET distributed by reporting entity as well as detail reports. The same should occur monthly and annually.		

8.9.2 Sales Database

We consider the accuracy and reliability of the sales database crucial to the performance of the entire CAMA system. All transferred properties must be documented and captured, quantified, and qualified within this portion of the system.

ID #		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
601		Assessor	Appraisal Real Property - Sales Database	Sales Database - Corrections	The Application shall allow a user to make corrections and updates to the sales module in batch. (This is particularly important once all new construction parcels have been identified as 100% complete. We would expect for this group of properties to complete a batch upload of all property characteristics and associated values)		
602		Assessor	Appraisal Real Property - Sales Database	Sales Database - Corrections	The Application shall allow users to correct any mistakes found in the information posted to the sales module. Corrections shall be able to be processed with a minimum amount of key strokes using a copy function when possible. Corrections of mistakes shall generate a time/date stamp from the user making the change (audit trail).		
603		Assessor	Appraisal Real Property - Sales Database	Sales Database - Corrections	If incorrect data is found in the information posted to sales history, the Application shall allow a user to manually correct the error in the active CAMA Application then automatically repost (update) the point of sale parcel characteristics in the sales module. (Note: this specification ID 390 deals with making the correction in the active database whereas specification ID 171 deals with making the correction in the sales module).		
604		Assessor	Appraisal Real Property - Sales Database	Sales Database - Exports	The Application shall allow sales records to be exported into other applicatons such as Access and in statistical software such as Excel, NCSS and SPSS.		
605		Assessor	Appraisal Real Property - Sales Database	Sales Database - History of Sales	The Application shall maintain a sales history file with valuation capabilities that captures and freezes the property characteristics at the time of the sale, while supporting corrections (based on historical valuation tables) of property value and characteristics. The Application shall allow for manual edit of property characteristics in sales history file. The Application shall allow multiple occurrences of the same property in the sales		

					file.		
606		Assessor	Appraisal Real Property - Sales Database	Sales Database - Housekeeping	The Application shall allow for systemic purging of sales records by date ranges.		
607		Assessor	Appraisal Real Property - Sales Database	Sales Database - IOP's	The Application shall identify and link parcel data from multiple parcels which sold on one deed (IOP's).		
608		Assessor	Appraisal Real Property - Sales Database	Sales Database - IOP's	In addition to providing an individual sale record for each sale parcel, the Application shall create a master sale record for each IOP transaction where parcels identified as IOP's shall be consolidated (summarized) into one set of land and building characteristics and assessed values shall be totaled for ratio analysis and reporting.		
609		Assessor	Appraisal Real Property - Sales Database	Sales Database - Maintenance	The Application shall allow sales in the sales history file to be flagged for source, validity codes, sale type, property type, and instrument (deed type), and good/bad state codes for the inclusion or exclusion of sales data in studies and reports and for the Washington Department of Revenue Ratio Study.		
610		Assessor	Appraisal Real Property - Sales Database	Sales Database - Manufactured Homes	The Application shall maintain a history of mobile home sales together with a list of real property accounts to which the sale MH has been attached. The mobile home sale record shall include fields for tracking the date the MH was placed on and removed from each real property account.		
611		Assessor	Appraisal Real Property - Sales Database	Sales Database - Modify Assessed Value	The Application shall allow recalculation of value at point of sale if subsequent to sale new information prompts appraiser to edit / correct sale record data to accurately reflect building or land data at point of sale.		
612		Assessor	Appraisal Real Property - Sales Database	Sales Database - Query Tool	The Application shall provide a user friendly ad-hoc query tool and report writing tool.		
613		Assessor	Appraisal Real Property - Sales Database	Sales Database - Reports	The application shall enable users to create custom sales verification form letters for each property type.		
614		Assessor	Appraisal Real Property - Sales Database	Sales Database - Tracking	For each sale transaction, the Application shall capture and store a complete copy of all data associated with the parcel (or parcels in the case of an IOP sale).		
615		Assessor	Appraisal Real Property - Sales Database	Sales Database - Tracking	The Application shall store all information found on each Real Estate Excise Tax Affidavit as part of the sale record.		

616		Assessor	Appraisal Real Property - Sales Database	Sales Database - Verification Codes	As part of the sales qualification process, the Application shall allow the user to assign multiple sale verification codes to a property account number.		
617		Assessor	Appraisal Real Property - Sales Database	Sales Database - Viewer	Please respond for each of the graph types below. The application shall be able to graph sales output from user search criteria into: a) Bar graphs b) Histograms c) Line graphs d) Scatter diagrams		

8.9.3 Land Records Management

8.9.3.1 Legal Descriptions

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
618		Both Assessor and Treasurer	Land Record Management - Legal Descriptions	Abbreviated legal description	The Application shall store and display an abbreviated legal description (e.g., Hidden Meadows Lot 7 or Addissons Addition Block 12, Lot 49 or T3N,R2E,S12 TL# 89).		
~~619~~		~~Both Assessor and Treasurer~~	~~Land Record Management - Legal Descriptions~~	~~Legal descriptions and linked images~~	~~This requirement has been intentionally removed.~~		
620		Assessor	Land Record Management - Legal Descriptions	Updating, adding legal descriptions	The user shall be able to copy/paste from a datafile (Excise) into the legal description module. The Application shall allow the user to insert, edit, make paragraphs, etc., in a fashion similar to a Word document.		

Formatted Table

8.9.3.2 New Subdivisions

ID#	P	Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
621	3	Assessor	Land Record Management - New Subdivisions	Ability to assess buildings on properties created for the future year	User shall be able to assess a building on a property that was created for the future year. For example, a subdivision was recorded after May 31, 2004. The new subdivision properties were added to the Application for the 2005 assessment year for 2006. If a building permit was issued on any of the newly created properties and a building was constructed (prior to July 31, 2004), the user shall be able to value the building 2004 assessment for 2005 taxes.		
622	3	Both Assessor and Treasurer	Land Record Management - New Subdivisions	Ability to create new subdivisions for future assessment year	The Application shall create new property accounts due to new subdivisions for the future assessment year. For example, plats recorded prior to May 31, 2004, shall be segregated and assessed 2004 for 2005 taxes. Plats recorded after May 31, 2004, shall be assessed 2005 for 2006 taxes.		
623	3	Both Assessor and Treasurer	Land Record Management - New Subdivisions	Creating new property accounts for subdivisions	The Application shall have an automated mechanism to create new subdivision accounts from a data file.		

624	3	Both Assessor and Treasurer	Land Record Management - New Subdivisions	Subdivision names and book/page numbers	The Application shall allow the record for each lot to store the book/page number, as well as the subdivision name, and allow users to search by book/page number or subdivision name.		
625	3	Assessor	Land Record Management - New Subdivisions	Tracking new subdivisions	The Application shall track new subdivisions from their creation through the revaluing of the new subdivision parcels.		

8.9.3.3 Transfers

The property transfer process in most cases is initiated by the creation of an excise document. Creation of the excise document should automatically begin the transfer transaction workflow. The workflow includes delegation of the task, tracking of progress of the transfer.

627		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
628		Both Assessor and Treasurer	Land Record Management - Transfers	Land record updates from real estate excise tax data file	The Application shall update property information (name, address, sales module, legal description, etc.) from a real estate excise tax data file. The Application shall allow the user to edit the information manually. The process shall have a workflow that allows the user to track all records of the data file, from receipt through update in the Application.		

8.9.4 Record Maintenance

8.9.4.1 Addresses

Situs addresses: Addresses must be linked to a building. Buildings must be linked to a parcel. Buildings must allow multiple addresses. Addresses must meet postal standards and include the City and zip+4. Addresses must contain a unique identifier. Buildings must contain a unique identifier.

Mailing addresses: Mailing addresses must meet postal standards.

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
629		Both Assessor and Treasurer	Record Maintenance - Addresses	Automated updates from data files - Real/Personal	Using a workflow mechanism, the Application shall accept automatic updates from data files.		
630		Both Assessor and Treasurer	Record Maintenance - Addresses	Mailing address should match postal standards - Real/Personal	The Application shall allow for mailing address fields that match postal standards (ZIP+4).		

631		Both Assessor and Treasurer	Record Maintenance - Addresses	Real Property Address Changes	The Application shall allow for Real Property address changes that are capable of being accepted via data-entry and electronically to include the Web. The updates shall place changes in a pending status until data has been verified.		
632		Both Assessor and Treasurer	Record Maintenance - Addresses	Real Property Address Changes	The Application shall allow for verification reports that are available both in electronic media and hardcopy.		
633		Both Assessor and Treasurer	Record Maintenance - Addresses	Real Property Address Changes	The Application shall handle single-entry or mass-entry of address changes, specifically regarding many accounts with the same owner.		
634		GIS	Record Maintenance - Addresses	Situs address - one property, multiple addresses - Real/Personal	The Application shall allow for Situs addresses that are stored in the Assessors application and tied to buildings. A property can have multiple buildings and each building can have multiple addresses.		

8.9.4.2 Annexations

When an annexation occurs in the State of Washington prior to ~~March~~ August 1st, the property taxes must be distributed to the new tax code area the following tax year. When an annexation occurs after ~~March~~ August 1st, the taxes must be distributed to the new tax code area two years later~~. For example, an annexation occurs January 15, 2004. Taxes collected in 2005 should be distributed to the new tax code area. An annexation occurs April 15, 2004, the taxes collected in 2006 should be distributed to the new tax code area. Exceptions to this rule include the issuing authority of building permits, distribution of road funds and excise tax collection. These areas may be affected by the 'Effective Date' of the annexation.~~

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
635		Both Assessor and Treasurer	Record Maintenance - Annexations	Annexation update information	The Application shall update (batch and manually): - New tax code area - New PUC flag (a flag that shows if a property is Platted, in an Unincorporated area, or in a City) - Start date for property taxes (the date that property taxes shall be distributed to the new tax code area) - Effective date of the annexation (the actual date that the annexation takes effect, in most instances, different from the property tax start date).		
636		Both Assessor and Treasurer	Record Maintenance - Annexations	Annexation update of tax code areas for personal property	Based on the annexation update performed on the real property application, the Application shall automatically recognize properties that are linked to personal property accounts, and shall update the tax code areas on the personal property accounts for the corresponding assessment year.		

637		Treasurer	Record Maintenance - Annexations	Record Maintenance - Annexations	The Application shall allow for user defined retention periods for annexation history.		
638		Both Assessor and Treasurer	Record Maintenance - Annexations	Annexations	The Application shall query and display annexation history of a property, the dates associated with the annexation, and the look of the property before and after the annexation. In order to access annexation information, it may require interfaces with other systems/applications.		

8.9.4.3 Owner Names

A single parcel can have many different interested parties with a claim to ownership. These parties have different classifications or type of interest and may have only a partial ownership of the property.

A single owner can own many different properties. The recorded owner name can vary. It is useful to be able to track all properties owned by a property owner that has various owner names.

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
639		Both Assessor and Treasurer	Record Maintenance - Owner Names	Multiple owners - Real/Personal	The Application shall accommodate properties/accounts that have multiple owners. Partial ownership shall be classified (e.g., contract buyer, spouse, etc.)		
640		Both Assessor and Treasurer	Record Maintenance - Owner Names	Multiple properties same owner/AKA - Real/Personal	Owner (individual or company) can have multiple 'Also Known As' (AKA's) aliases that resolve to the same record. If the owner has multiple properties listed under different AKA's, the Application shall provide reports and searches that can be run to identify all properties owned by that owner.		
641		Both Assessor and Treasurer	Record Maintenance - Owner Names	Percent of Ownership Field	For each owner name record, the Application shall have an associated field to track percent ownership relative to a Property Account Number. E.g. Smith 60% Jones 10% Abbey 30%. Application must calculate all percentages to equal 100%		
642		Both Assessor and Treasurer	Record Maintenance - Owner Names	Percent ownership - Real/Personal	The Application shall allow for a percent ownership that can be allocated to an individual partial owner.		
643		Both Assessor and Treasurer	Record Maintenance - Owner Names	Record Maintenance - Owner Names	The Application shall have a feature that cross-references the PERSONAL property account with a real property account. This is useful to identify where the business is physically located.		
644		Both Assessor and Treasurer	Record Maintenance - Owner Names	Record Maintenance - Owner Names	The Application shall have a feature that cross-references the Real property account with a personal property account. This is useful to identify all the business at one location.		

645		Both Assessor and Treasurer	Record Maintenance - Owner Names	Record Maintenance - Owner Names	The Application shall track the changes in names, and have it available for customer service representatives.		
646		Both Assessor and Treasurer	Record Maintenance - Owner Names	Record Maintenance - Owner Names - Real/Personal	The Application shall be able to classify owners as: Owner, Buyer, and In-Care-Of, and store and cross-reference 'Doing Business As' (d/b/a) name for the owner.		
647		Both Assessor and Treasurer	Record Maintenance - Owner Names	Record Maintenance - Owner Names Real/Personal	The inquiry by name shall be a wildcard query, and shall query against the three name fields - Owner, Buyer, and In-Care-Of.		
648		Both Assessor and Treasurer	Record Maintenance - Owner Names	Record Maintenance - Owner Names Real/Personal	The name fields shall be large enough as not to require any abbreviating.		
649		Both Assessor and Treasurer	Record Maintenance - Owner Names	Record Maintenance - Owner Names Real/Personal	The Application shall update (or create a method to update) the names and addresses in/for other applications that rely on the new property tax Application for the source of name and address.		
650		Both Assessor and Treasurer	Record Maintenance - Owner Names	Record Maintenance - Owner Names Real/Personal	The Application shall have a means to group accounts by a pre-determined common data element such as: Name, address, UBI (Uniform Business Identifier), or other key data element the County may determine appropriate.		

8.9.4.4 Tables other than Appraisal Tables

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
651		Both Assessor and Treasurer	Record Maintenance - Tables other than Appraisal Tables	Table Maintenance	The Application shall allow the appropriate user, based upon security access rights, the ability to add/change/remove items in the appropriate areas of the Application set-up. This is to enable the Application to accommodate changes in the future as they arise.		

8.10 Customer Service Inquiry

Benton County desires to improve and enhance our customer service information available to representatives from the Assessor's Office and Treasurer's Office. Information that is now in paper form and is retrieved manually, shall be available electronically. It is anticipated that all processes that require customer interaction will be processed through a workflow application.

8.10.1 Customer Information

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
652		Both Assessor and Treasurer	Customer Information	Customer Information	Once the Application has returned the query, the following information shall be available: The actual image of the statement that was mailed to the customer. This information shall be retained for a period of years.		
653		Both Assessor and Treasurer	Customer Information	Customer Information	Once the Application has returned the query, the following information shall be available: Sales history, characteristics about the building and land, and account number of personal property associated with the real property.		
654		Both Assessor and Treasurer	Customer Information	Customer Information	The Application shall query and display the type of assessment, as well as the geographic boundaries of the assessment associated with a property.		
655		Both Assessor and Treasurer	Customer Information	Customer Information	The Application shall have a glossary that shall allow the County to associate definitions with assessments, and link to these definitions after querying on a property~~. Example of definition: Fire Patrol is an assessment fee levied on forest and unimproved lands that DNR protects from wildfire (RCW 76.04.600). Assessment revenues are used to purchase wildfire engines, hire and train personnel, and other associated costs. For question and concerns, contact the Department of Natural Resource Protection Division at 1-360-902-1300.)~~		
656		Both Assessor and Treasurer	Customer Information	Customer Information Real/Personal	Once the Application has returned the query, the following information shall be available: Have statements been mailed on this account? How were they generated: By the application (annual mailings), or per customer's request, and the dates they were mailed?		
657		Both Assessor and Treasurer	Customer Information	Customer Information Real/Personal	Once the Application has returned the query, the following information shall be available: User shall be able to view any imaged correspondence received from the customer, determine where it is in the process, and if completed, what was the response.		
658		Both Assessor and Treasurer	Customer Information	Customer Information Real/Personal	Once the Application has returned the query, the following information shall be available: To determine if a property has been recently annexed, and what the property looked like before and after the annexation, and all the dates associated with the annexation.		
659		Both Assessor and Treasurer	Customer Information	Customer Information Real/Personal	The Application shall enable the user to query an account by number, name, site address, mailing address, plat and Geo Code, or by the use of a wild card.		
660		Both Assessor and Treasurer	Customer Information	Customer Information Real/Personal	The Application shall provide a form of notification ~~bulletin board~~, so when logging into the Application, if a major event is happening, or a process is changing, a pop-up ~~bulletin board~~ note shall identify the event or change.		

661		Both Assessor and Treasurer	Customer Information	Customer Information Real/Personal	Once the Application has returned the query, the following information shall be available: Assessed values of property, what program property is currently in: Current use, senior exemption, deferral, or any other program that may be developed in the future, the ability to easily view the dates of when the property was put into or removed from a specific program, and the ability to view an image of the actual correspondence to the customer. If the values were frozen, what are those values, and what are the un-frozen values?		
662		Both Assessor and Treasurer	Customer Information	Customer Information Real/Personal	Once the Application has returned the query, the following information shall be available: Ability to view all imaged documents associated with the property. To include but not be limited to: Payment information, deeds, liens, excise tax affidavit, correspondence, etc.		
663		Both Assessor and Treasurer	Customer Information	Customer Information Real/Personal	Once the Application has returned the query, the following information shall be available: What assessments or improvement districts are associated with the property?		
664		Both Assessor and Treasurer	Customer Information	Customer Information Real/Personal	Once the Application has returned the query, the following information shall be available: Payment history during the past five years on real property, assessments and improvement districts, and how the image of the check, coupons or other source documents associated with the payment shall be displayed.		
665		Both Assessor and Treasurer	Customer Information	Customer Information Real/Personal	Once the Application has returned the query, the following information shall be available: What assessments have been assigned to a collection agency, and when?		
666		Both Assessor and Treasurer	Customer Information	Customer Information Real/Personal	Once the Application has returned the query, the following information shall be available: Taxes that have been cancelled or supplemented, dates associated with them, and a link to the imaged document that was sent to the customer notifying them of this change.		
667		Both Assessor and Treasurer	Customer Information	Customer Information Real/Personal	The Application shall have the ability to query and add notes through a narrative tool. This tool shall be used to make notes concerning a customer's account, and available to all users of the Application.		
668		Both Assessor and Treasurer	Customer Information	Customer Information Real/Personal	Once the Application has returned the query, the following information shall be available: Any name and address changes that have taken place on this account, and if any name and address changes are pending, where in the process it is.		

8.10.2 Customer Self-Service

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes

669		Both Assessor and Treasurer	Customer Self-Service	Customer Self-Service Real/Personal	The Application shall provide a method for the appropriate staff to be notified that a change (name or address) is available to be worked on, or there are pending documents required to complete the change.		
670		Both Assessor and Treasurer	Customer Self-Service	Customer Self-Service Real/Personal	The Application shall have a queuing system to store the requested changes from the customer self-service area, where required documents are pending, until the arrival of those required documents.		
671		Both Assessor and Treasurer	Customer Self-Service	Customer Self-Service Real/Personal	The Application shall have a tracking mechanism so that customer service representatives will know the status of the requested name/address change.		
672		Both Assessor and Treasurer	Customer Self-Service	Customer Self-Service-Real/Personal	The Application shall have a customer self-service tool that is web-based. This application shall allow customers to initiate name and/or address changes, and if necessary, include a list of supporting documents required to complete the change.		

8.10.3 Customer Service

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
673		Both Assessor and Treasurer	Customer Service	Customer Service	The Application shall track the process and status of refunds. This shall include items such as: Type of refund, date entered, date of check, and date mailed. This tracking shall occur for all types of refund checks.		
674		Both Assessor and Treasurer	Customer Service	Customer Service	The Application shall have a range of predefined (configured by County staff) letters for customer service representatives to easily and efficiently process correspondence. These letters shall be easily maintainable. The letters shall print, or be put into a queue for printing at a later time. This may include several items (letter and tax statement) which shall be printed in a collated manner. Some examples of letters and forms include: Refund letters, cancellation/supplemental letters, proof of taxes paid letters for short plat, condo, mobile homes, plats, and collection letters, problem mail returns, petition refund, DNR fire patrol, foreclosure affidavit, and senior applications.		
675		Both Assessor and Treasurer	Customer Service	Customer Service Real/Personal	The Application shall provide a means for the County to develop custom reports and/or ad-hoc queries (that can be saved), and make them available for County staff.		
676		Both Assessor and Treasurer	Customer Service	Customer Service Real/Personal	The Application shall have an efficient process for customer service representatives to request changes to a property account, and to efficiently process those requests. These requests may include items such as: Request a duplicate tax statement, request mailing name/address changes, and a do not send flag (do not send statement to mortgage company). There may be multiple sources of these requests: Cashier, customer self-help, web, IVR. All of these changes shall become part of the history of the property account.		

677		Both Assessor and Treasurer	Customer Service	Customer Service Real/Personal	The Application shall have the ability to interface with other County applications. These applications shall include, but not be limited to: The recording system (Eagle Recording Application), or the segregation messaging system (SMURF). Having this information, even though it may reside outside the property tax system, is very useful for customer service representatives.		

8.10.4 History

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
678		Both Assessor and Treasurer	History	Dynamic link from excise to recorded document - Real/Personal	The Application shall be configured to have a dynamic link from an excise document to the recorded document image stored in the Eagle Recorder Imaging Application.		
679		Both Assessor and Treasurer	History	Edit history - Real/Personal	The Application shall edit history entries that are the result of data entry errors. An audit trail shall show that the history entry was corrected, when, by whom, and what the previous entry was.		
680		Both Assessor and Treasurer	History	Excise documents with multiple property numbers - Real/Personal	The Application shall store a data record of all related excise documents property/account numbers.		
681		Both Assessor and Treasurer	History	History - User defined categories for notes - Real/Personal	The Application shall allow the user to add notes that become part of the parcel's history. The notes shall be categorized based on user-defined rules. Examples include notes from the senior exemption process, notes from the current use assessment process, notes from boundary line adjustments, notes relating to the market assessment of the property, etc.		
682		Both Assessor and Treasurer	History	History and program updates - Real/Personal	The Application shall capture all update activities and store them in the history of a property, along with the dates of when each activity is updated. Examples include but not limited to: - Segregation - Combinations - Cancellations and supplements - Name changes - Address changes - Revaluation of property - Changes to the abbreviated legal description		
683		Both Assessor and Treasurer	History	History- Real/Personal	The Application shall keep all changes, notes and updates associated to the property. These changes and updates become part of the property's history. This history shall be available, real-time, for customer service representatives.		

684		Both Assessor and Treasurer	History	Inactive/retired properties - Real/Personal	The Application shall permit users to view historic information on inactive/retired properties/accounts.		
685		Both Assessor and Treasurer	History	Narrative comments - Real/Personal	The Application shall provide for narrative comments about the property/account.		
686		Both Assessor and Treasurer	History	Scope of historical information - Real/Personal	The Application shall preserve all historical information about a property/account.		
687		Both Assessor and Treasurer	History	Viewing value history - Real/Personal	The Application shall display (in chronological order) the value history of a property/account.		

8.11 Global Application Requirements

8.11.1 System Design and Features

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
688		Both Assessor and Treasurer	System Design Features	Data Entry and query - property account number (account number for personal property) - Real/Personal	The Application shall allow the user to move between screens and programs without the need to reenter the property account number (i.e., maintains context when navigating).		
689		Assessor	System Design Features	Display of mandatory fields	The Application shall clearly display mandatory fields (different shading, color, or other mechanism).		
690		Both Assessor and Treasurer	System Design Features	Forced Entries - Real/Personal	The Application shall allow selected fields to be required fields; users cannot proceed to another screen without entering data in required fields. Required fields shall be highlighted, or otherwise identified as required.		
691		Both Assessor and Treasurer	System Design Features	Microsoft /Windows type functions - Real/Personal	The Application shall use Microsoft standard capabilities, such as copy, cut & paste, multiple windows open simultaneously, split screen, cascading, undoing complete edit changes, etc.		

692		Assessor	System Design Features	Neighborhood Narrative Descriptions	For each neighborhood grouping created in the CAMA, the Application shall provide a narrative descriptive field for a historical record of the last physical reappraisal and subsequent annual updates (actual percentage adjustment(s) applied to land and to building), a brief description of the neighborhood, and related demographic data. The narrative and descriptive statistics shall be available to the review appraiser, and shall be available for export to outside applications to assist in writing reports.		
693		Both Assessor and Treasurer	System Design Features	Screen Design - Background Colors & Fonts - Real/Personal	The Application shall allow screen background color and font color style to vary by type of process (e.g., what if scenario screens would have blue background, and active screens would have a white background).		
694		Both Assessor and Treasurer	System Design Features	Screen Design - Background Colors & Fonts - Real/Personal	The Application shall allow an administrative override to lock out individual screen background color choices, font color, and style choices, to create a uniform look to screens throughout the Application.		
695		Both Assessor and Treasurer	System Design Features	Screen Design - Background Colors & Fonts - Real/Personal	The Application shall allow each user to select their own screen background colors and font colors.		
696		Both Assessor and Treasurer	System Design Features	Spell-checking - Real/Personal	The Application shall have a spell-checking function for memo and comment fields.		
697		Both Assessor and Treasurer	System Design Features	Tool Bars and Menus - Real/Personal	The Application shall provide user-definable tool bars and menu options. These settings shall be specific to a user or a desktop, i.e., each user can have their own configuration.		
698		Assessor	System Design Features	Value Identification	The Application shall clearly identify for each property the method used to develop the assessed value.		
699		Assessor	System Design Features	Value Identification	The Application shall list all PAN's used in the development of an assessed value. For example, Parcel A is the subject parcel and is valued on the income approach. A portion or all of the land value from Parcel B and Parcel C is needed in the development of Parcel A's income approach to value. Parcel A's record would reference Parcel B & C's property account number..		
700		Assessor	System Design Features	Value Summary Screen	The Application shall have one screen where all related values (land, land add ons, building, building add ons, outbuildings, new construction value, exemption amounts, senior values, land use values etc.) are listed for a given property account number.		

8.11.2 Reports

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
701		Both Assessor and Treasurer	Reports	Ad hoc data query capabilities - Real/Personal	The Application shall have non-proprietary ad hoc data query capabilities.		
702		Both Assessor and Treasurer	Reports	Ad Hoc Reporting - Real/Personal	The Application shall allow users to create ad hoc reports/queries, based on any field, and across multiple years.		
703		Assessor	Reports	Management reports - workload	The Application shall generate reports that allow management to forecast workloads and monitor workload status. Examples: How many parcels are in the reval area? How many parcels need to be inspected for new construction? What is the status of these parcels (have they been inspected, has data entry been done, etc.)?		
704		Both Assessor and Treasurer	Reports	Queries and Reports - Output - Real/Personal	The Application shall have the ability to send queries and reports to printer, fax server, e-mail client, or file in several application formats (Example: HTML, Acrobat, Word, Excel, etc.).		
705		Both Assessor and Treasurer	Reports	Query Capabilities	The Application shall allow the user to query comparable neighborhoods, and view neighborhood data either online, in a printed paper report, or in a file that can be exported to programs such as Access or Excel.		
706		Both Assessor and Treasurer	Reports	Report Writer - Real/Personal	The Report Writer Application shall support the import of form files in standard graphic formats, such as PDF, JPG, TIF, WMF and EPS.		
707		Both Assessor and Treasurer	Reports	Report: NH Inventory	The Application shall generate an "on-line" or printed neighborhood inventory report where the neighborhood is selected by the user. (Vendor shall supply sample neighborhood inventory report).		
708		Both Assessor and Treasurer	Reports	Reports - Real/Personal	The Application shall provide for custom-built reports. A report-builder tool shall be provided with the Application. County support staff shall be trained to build ad hoc reports, as well as new generally-accessible reports via the reports menu.		
709		Both Assessor and Treasurer	Reports	Running Reports - Real/Personal	The Application shall allow the user to run reports while the online Application is in use.		
710		Both Assessor and Treasurer	Reports	Search Capabilities - Real/Personal	The Application shall allow for searching, using common operations (>,		

711		Both Assessor and Treasurer	Reports	Search Capabilities - Real/Personal	The Application shall support phonetic/Soundex searching of text fields.		
712		Both Assessor and Treasurer	Reports	Search Capabilities - Real/Personal	The Application shall support searching by multiple data elements simultaneously, and support partial search strings or wildcards.		
713		Both Assessor and Treasurer	Reports	Value Error Parameter Reports	The Application shall produce error and warning reports that identify records with actual or potential valuation or data entry problems (e.g., PT Code 0011 GLA >20,000 or A/V>$20,000,000)		

Questions

714	**Describe any State of Washington report that the Application has as a standard report.**

8.11.3 Interfaces and Integration

ID#		DEPT.	SUBJECT AREA	TITLE	DESCRIPTION	VENDOR RESPONSE	VENDOR NOTES

Questions

715	Describe your implementation team's experience in interfacing the Application with other applications.
716	Give the maximum number of applications your Application has interfaced with. Provide a brief description of the application and each interface developed to support that application.
717	This requirement has been removed.

8.11.4 General Functional Requirements

ID#		Dept.	Subject Area	Title	Description	Vendor Response	Vendor Notes
718		GIS	General Functional Requirements	Assignment of property account numbers to all accounts (Condominiums, Mobile Homes, Buildings only, Personal Property, etc.)	The Application shall enable user to link all accounts (e.g. Condominiums, Mobile Homes, accounts with Buildings only, Personal Property, etc.) to a property account number that represents the land the assessment is located on. In the case of a condominium complex all property account numbers of the complex should be able to link to the first account number of the complex, to provide a link to the label on the GIS polygon.		
719		GIS	General Functional Requirements	Batch update utility - Real/Personal	The Application shall provide a secure, auditable and efficient method for batch uploading changes to Zoning, tax district, lot size, jurisdiction, etc., from the GIS or other County Applications (Auditor, Building Permits).		

720		Assessor	General Functional Requirements	Comparable Sales Viewing	The Application shall enable users to view comparable sale properties alone or with an option of simultaneous viewing the subject property and three or more comparables.		
721		Both Assessor and Treasurer	General Functional Requirements	Computer based training - Real/Personal	The Application shall provide a computer-based training (CBT) program that can be used for staff training for common functional topics.		
722		Both Assessor and Treasurer	General Functional Requirements	Edit and Input - Real/Personal	For day-to-day activities, such as cancellation/supplements or segregations/combinations, the Application shall provide real-time edit and input capabilities. Example: When a cancellation update is performed, the updated information shall be available immediately, and not stored for batch updates performed at a later time.		
723		Both Assessor and Treasurer	General Functional Requirements	Exempt properties - Real/Personal	The Application shall process all non-profit and other exempt properties through the assessment cycle (establish market/current use values) without generating a tax bill.		
724		Assessor	General Functional Requirements	Export Appraisal Tables	The Application shall allow users to export all tables to various PC-related applications including, but not limited to MS Excel, MS Access, and MS Word.		
725		Both Assessor and Treasurer	General Functional Requirements	Exporting Data - Real/Personal	The Application shall have the ability to export data in the following formats: Text file, tab, delimited or fixed, MDB, DBF and XML.		
726		Both Assessor and Treasurer	General Functional Requirements	Flag for Parcels with Advance Tax Collections - Real/Personal	The Application shall automatically flag a parcel when the Treasurer issues/collects advance taxes. This flag shall allow assessed value modifications only if special user-defined override specifications are met.		
727		Both Assessor and Treasurer	General Functional Requirements	Inactivate And Reactivate Accounts - Real/Personal	The Application shall allow the user to inactivate and reactivate an account for assessment purposes only (regardless of whether or not taxes or special assessment fees are still owed on the property).		
728		Assessor	General Functional Requirements	Internal Tables for valuation and identification.	The user shall be able to create custom tables, expand and/or delete tables, for both land and improvements.		
729		Both Assessor and Treasurer	General Functional Requirements	Legislative Requirements - Real/Personal	The Application shall accommodate all Washington State constitutional and statutory assessment and reporting requirements, as well as DOR rule changes.		

730		Both Assessor and Treasurer	General Functional Requirements	Link to Active Real Property Parcels	The Application shall link any structure-only account (e.g., Mobile Homes, airplane hangars, etc.) to an active real property parcel.		
731		Assessor	General Functional Requirements	Maintain and process multiple years of data - Real/Personal	The Application shall support maintaining and processing multiple years of property data (characteristics, valuation, cost tables, values, etc.) for at least 3 prior and 2 future years.		
732		Assessor	General Functional Requirements	Mid-year Value Changes	At any point in the assessment year, the Application shall allow a user to batch update values for groups of parcels selected by the user.		
733		Both Assessor and Treasurer	General Functional Requirements	Notes - Real/Personal	The Application shall provide the ability to create notes that can be attached to a property account number, and can also be categorized by type.		
734		Both Assessor and Treasurer	General Functional Requirements	Online Help - Real/Personal	The Application shall provide online help for all levels of the Application, including: General help, screen help, transaction help, data entry help, and help at the field level. Help features shall also be available on field devices. The Application Administrator shall be able to access and customize all levels of online help and other help features available on field devices.		
735		Both Assessor and Treasurer	General Functional Requirements	Report 'top "n" number tax payers	The Application shall generate a top 'n' number taxpayers within a taxing district report (real and personal property combined), based on the owner's name, including aliases or 'Also Known As', or 'Doing Business As'.		
736		Both Assessor and Treasurer	General Functional Requirements	Reporting - Datamart - Real/Personal	The Application shall include a datamart or data warehouse for simplified ad hoc reporting, and reduced server load on the Application when running complex or large reports.		
737		Both Assessor and Treasurer	General Functional Requirements	Returned Mail - Real/Personal	The Application shall process returned mail using barcode technology, and other current technologies. (Describe.)		
738		Both Assessor and Treasurer	General Functional Requirements	Scanned Images - Interfaces - Real/Personal	The Application shall support links to scanned images stored in the Auditor's Imaging Application, Public Works' ACORDE Imaging Application, excise affidavits, remittance, and point of sale images. (Or any County imaging solution)		
739		Both Assessor and Treasurer	General Functional Requirements	Scanning - Emerging Technologies - Real/Personal	The Application shall support emerging technologies for scanning documents that allow for updating, gathering, transferring, and disseminating data. (Please describe.)		

740		Both Assessor and Treasurer	General Functional Requirements	Scheduling Batch Updates - Real/Personal	The Application shall support the scheduling of batch jobs at a specific date and time.		
741		Assessor	General Functional Requirements	Store And Display Filing Information	The Application shall be able to store and display the filing information for each exemption or current use account (e.g., Historic Property Exemption, 30% Homeowner's Exemption, Senior Exemption, etc.).		
742		Both Assessor and Treasurer	General Functional Requirements	Store and launch related files - Real/Personal	The Application shall create a link to related files, such as Word documents, Excel spreadsheets, scanned documents, data files, etc., from within the proposed Application. Preferably, the Application shall launch the associated file with a click on the hyperlink or field.		
743		Both Assessor and Treasurer	General Functional Requirements	Summary screens	The Application shall provide summary screens. Example: Allows the user to view all data pertinent to the current year's assessment, including the appraised (market) value and assessed (taxable) value.		
744		Both Assessor and Treasurer	General Functional Requirements	System Search Function - Using searches to find parcels - Real/Personal	The Application shall allow user to search for accounts by owner name, buyer name, house number, street, APN, geocode #, plat #, plat name, legal description, or other desired fields. The Application shall search by exact word/number/phrase, or a portion of a word or number. For example, to find a parcel belonging to John Frostmeyer, user shall be able to search by entering 'meyer' to generate results containing the string 'meyer' in the name field.		
745		Both Assessor and Treasurer	General Functional Requirements	Tracking Special Exemptions	The Application shall track the beginning and end dates of special property exemptions. Examples: Historic Properties, Multifamily Tax Abatement, 30% Homeowner's Exemption, etc.)		
746		Both Assessor and Treasurer	General Functional Requirements	User defined flags	Based on user defined criteria, the Application shall automatically (autofill) special flags to a parcel. The user shall also be able to manually enter flags and shall be able to generate reports by flag type.		
747		Both Assessor and Treasurer	General Functional Requirements	USPAP Compliant	The Application shall be USPAP-compliant.		
748		Both Assessor and Treasurer	General Functional Requirements	View All Taxes - Real/Personal	The Application shall display all taxes and assessments on a property account number in one screen (e.g., Real Property, Personal Property, Special Assessments, etc.).		
749		Both Assessor and Treasurer	General Functional Requirements	Workflow capabilities - Real/Personal	The Application shall provide automated workflow capabilities that are configurable by Benton County.		

Section 4
Benton County Technical Requirements

4. Benton County ATS Technical Requirements

A standard response of **Yes**/**NCMod**/**Planned**/**No**" in the "Vendor Response" fields are to be completed by each submitter.

> **Yes** = Included in standard package. **NCMod** = No Cost Modification. (System does not contain this feature but will be furnished at no cost.) **Planned** = Not included but planned in a future update (Must estimate when the feature will be available). **Fee** = Not available but will develop and implement for and additional fee (Estimate fee if possible) **No** = Not available.

	Technical Requirements	Vendor Response	Vendor Notes
1.00	IT Administration		
1.01	**Proposed product operates on a Microsoft SQL Server 2010/12 database platform**		
1.02	**Proposed product operates in a Windows 2008 environment**		
~~**1.03**~~	~~**Proposed product operates in a Terminal Services environment**~~		
1.04	**Proposed product clients operates on a 32 bit Windows 7 Pro OS**		
1.05	**Proposed product clients operates on a 64-bit Windows 7 Pro OS**		
1.06	**Proposed product will run in a virtualized server environment**		
2.00	General Systems		
2.01	**Proposed product supports unique logins**		
2.03	**Unique logins - are tied to active directory for single sign-on capability**		
2.04	**Proposed product allows corrections and deletions and provides an audit trail that cannot be modified.**		
2.05	**Proposed product allows all database fields to be fully searchable by default**		
2.06	**Proposed product provides full online screen-based help**		

3.1 Technology Environment

The Benton County Assessor's and Treasurer's offices are connected to the Benton County backbone network on running at speeds at or about 1 GBit/Second. Benton County uses TCP/IP as our networking standard.

3.2 Workstations

Benton County operates a network that contains approximately 750 workstations running Microsoft's 32-bit Windows 7 Professional or 64-bit Windows 7 Professional Operating Systems.

Benton County works to replace each workstation once it has been in service for 4/5 years. This means that we enhance the performance capabilities of the workstations in regular intervals, but that in some cases we are two-to-three years behind currently available machines and/or operating systems. Our minimum supported station specifications follow:

Minimum Workstation (Machines greater than 1 year old)

- *Intel Xeo Processors 2.4+*
- *4GB of RAM*
- *80+ GB hard drive*
- *Windows 32 bit Windows 7 or 64-bit Windows 7*
- *Office 2010*

3.3 Servers

The network contains several servers. Most of these servers run the Microsoft Windows Operating System. Currently, Benton County operates the following operating systems on our network servers:

- *Microsoft Windows 2008 Standard Release 2*

Benton County has standardized on Dell PowerEdge servers for its windows servers.

Benton County has standardized on the Microsoft Windows Server 2008 operating system for our network environment. The successful vendor to this RFP shall have a solution that supports this standard.

3.4 Database Management System (DBMS)

As in many Counties, it seems that we operate, or have operated every database management system that has ever been devised. This has proven to be highly inefficient, and internal support for systems becomes significantly difficult in a many DBMS environment.

Benton County has standardized on Microsoft's SQL Server for our DBMS. It is considered highly desirable that the system utilizes Microsoft SQL Server and that the vendor solution is staying current with SQL Server upgrades while supporting prior versions as well.

3.5 Information Integration Philosophy

All information that is produced by Benton County employees and sub-contractors is viewed as 'owned by Benton County'. In this light, it is critical that Benton County has the ability to move information from one information system to another information system.

Vended systems, by design are often vertical in nature, i.e. they assume that the information collected in the application will only be utilized by that application. In truth, Benton County has found that it is rare that we have any data systems where information is not needed in another application. Hence, we view information as essentially horizontal in nature.

Take for example an address. There are many road name changes that happen in any political jurisdiction. Benton County is not immune to this issue. If each database at Benton County uses the road name in some manner, then whenever a name is changed, the staff that utilizes the database will have to update the address information. For vertical systems, this becomes problematic. We find very quickly that many departments are not informed of the road name, so address information quickly goes "out of sync".

Address information is a good example of horizontal information. A change needs to be applied to almost every data system that is maintained at Benton County. A change in a road name causes great inefficiency throughout our enterprise, if the records of each data system must be manually updated.

If applications are designed with the horizontal data issue in mind, we find that we have methods that can be used to synchronize changes in horizontal information. This improves information integrity, enhances confidence in our information systems, allows information to be used in abstract data analysis, and enhances employee efficiencies and many other benefits.

Consequently, Benton County's information philosophy is to procure and/or create systems that provide the ability to move information in and out of them. The vendor/company awarded this RFP must assure that the application has been developed, tested and runs on Microsoft SQL back-end. This is a critical requirement.

This issue is so significant to Benton County that applications that do not run Microsoft SQL will not be considered.

3.6 Data Conversion

The current Assessor/Treasurer system has been in operation for about 15 years. All data is stored in a Microsoft SQL database with both Ascend and Proval/Manatron tables (Ascend and Proval/Manatron are currently owned by Thomson Rueters). It is the expectation of Benton County that all data in the current Assessor/Treasurer system will be moved into the new ATS.

The current system also has sketches of houses stored in tables. Additionally photos and scanned images are stored as pointers to .jpg files. It is expected that these items will be migrated/converted into the new system as well.

3.7 Electronic Messaging System

Benton County currently uses Microsoft Exchange 2010 as our electronic messaging system.

3.8 Internet Connectivity and Use

Benton County provides Internet connectivity for all employees that have workstations on Benton County's network. Internet access speed is a 40Mb connection. Employees are authorized to utilize the Internet capabilities for Benton County business purposes. Employees are not authorized to download software directly to workstations.

If the system provides the capability of providing software enhancements through the Internet, it is the expectation that the Benton County Information Technology department will download such upgrades and package them as part of our network upgrade capabilities, unless software upgrades and installation is performed by the vendor as part of the maintenance/support costs. If this is the case, vendor will conform to Benton County Computer User Policies including executing a non-disclosure agreement.

All information residing on or originating from Benton County servers/network is the property of Benton County, and vendor has no authority to disclose or distribute any records or information about those records or their content in any format including verbally.

Benton County currently uses Microsoft Internet Explorer v9 as our Internet browser. Vendor will not create an application that will force Benton County to upgrade browsers without consent and testing by Benton County Information Technology.

Use of the Internet by the vendor to provide software upgrades or patches to Benton County Information Technology staff is highly desired.

3.9 Office Automation Environment

Benton County uses the Microsoft Office products as our primary office automation toolset.

3.10 Network Deployment of Software

The Benton County Information Technology department manually installs or pushes with the assistance of Microsoft System Center all client software installations, patches and upgrades. Vendor may load client software only with expressed consent of Benton County Information Technology

3.11 Backup and Disaster Recovery

Benton County currently uses a combination of SQL database Maintenance plans and Dell EqualLogic technology to perform daily snapshots and data replication as our disaster recovery and enterprise backup solution for all production data. Your proposal should indicate any issues with either solution.

3.12 Telecommuting

Benton County operates a remote access system for offices outside of Benton County's private network. It is highly desirable that the system, operate in a Cisco VPN or Citrix connection.

The vendor will agree to the following remote support requirements:

1) All employees of vendor shall be specifically identified. Benton County requires that each employee of the vendor who works on our system can be identified and that Benton County can identify the times and dates that individual accessed Benton County's network or the system. It is highly recommended that the vendor utilize service desk software that will track all activities performed on Benton County systems.

2) Remote support shall be done through a Cisco VPN or Citrix connection. Benton County reserves the right to change methodologies of access by vendor for remote support.

3) All configuration changes that are made to the system as part of remote support shall be logged in a mutually agreed location.

4) The Vendor shall be responsible to obtain any client licenses required to access Benton County's network that are required on the vendor owned workstations, personal computers, named licenses, or other computing devices.

5) Benton County shall provide a login account to vendor employees for login purposes. Each activity must be tracked on the vendor side. Benton County reserves the right to request the logs at any time and vendor agrees to provide them.

6) Benton County shall take responsibility to ensure there are adequate licenses for vendor support technicians to operate on Benton County's network. Note see item 4 in conjunction with this requirement.

3.13 System Support

As Benton County improves our security for remote access to our network, it becomes prudent from a security perspective to re-evaluate the support connections our vendors currently utilize to access our network to support their products. Benton County currently uses Cisco VPN or Citrix as our method to allow vendors/contractor access to the appropriate equipment. . Vendors/contractors/support staff must request access to our system

3.14 Technical Requirements

Technical Requirements are provided in the Microsoft Excel file Benton ATS RFP S4.2.xls. Please use this file to provide responses to our requirements and questions.

Section 5 Company Information

5. Company Information

This section asks specific information about the company and its financial standing. Our intent is to verify the viability of the company to support Benton County for the next several years.

1.1 Company Information

Company Name	
Address	
City, State, Zip	
Phone Number	
FAX Number	
Date Company was Incorporated	
How many employees does your company employ?	
Form of Business Organization (Public Corporation, Private	
Form of business organization (i.e., public corporation, private corporation, partnership)	
Number of Years the firm has been in business (indicate if the company previously operated under a different name).	
Annual revenue for last fiscal year	
Number of local government (County) customers	
Number of local government (City) customers	
Is there any pending litigation against the firm? Has there been any litigation against the firm in the last 3 years? If so, attach a statement indicating the caption, cause number, Court, Counsel, and general summary.	

Number of years providing Assessment and Appraisal software and services:
Number of years providing Taxation software and services:

1.2 Company Contact Information

Contact Name _____

Address _____

City, State, Zip _____

Phone Number _____

FAX Number _____

E-Mail Address _____

1.3 Technical Support Questions

Hours and methods of technical support:

Is there a user's group? Are users able to request system changes? If so, how?

What is the release/version number of the software that you are proposing?	
Provide the approximate release dates of the last three versions of your proposed software (if applicable).	
How frequently are you planning to issue new releases in the future?	
What is your policy in terms of supporting previous versions of your software?	
Do you provide a toll-free telephone number for customer support?	
What hours is telephone support provided (Pacific Standard/Daylight Time)?	
Do you guarantee callback response time as part of your standard support? If so, what is the guaranteed response time?	
Do you provide your customers with a list of features	

planned for upcoming releases?	
If so, attach a copy of the latest planned feature list with planned release dates.	
How do you track problems with your software?	
Do you inform customers of these problems as soon as they are identified?	
How do you track open issues and calls from customers?	
How could Benton County see the status of all our calls?	
When working on a customer problem, do you normally log into the customer's system to see the problem, or do you try to recreate the problem on your own system?	
Are new releases provided under the maintenance contract?	
Who installs the maintenance release, supplier, or user?	
Identify any future upgrades, releases, enhancements, patches, conversions, or any other maintenance items that Benton County may be required to purchase in the future in order to stay current with the latest release of the system.	

1.4 Development Plans

Please describe your company's development plans for the next 1-3 years for the product you are proposing.

(Use additional sheets if necessary)

1.5 Customer References

The vender shall provide three (3) customer references.

1.6 Customer Reference 1

Customer Name _____

Business Address _____

Contact Name _____

Title of Contact _____

Contact Phone Number _____

Description of Installation _____

_____

Date Installed _____

Relevance to Benton County _____

1.6 Customer Reference 2

Customer Name _____

Business Address _____

Contact Name _____

Title of Contact _____

Contact Phone Number _____

Description of Installation _____

_____

Date Installed _____

Relevance to Benton County _____

1.6 Customer Reference 3

Customer Name _____

Business Address _____

Contact Name _____

Title of Contact _____

Contact Phone Number _____

Description of Installation _____

_____

Date Installed _____

Relevance to Benton County _____

1.7 Discontinued Installations

Disclose any sites where proposed software was initially installed and subsequently discontinued from operation. Explain what happened and provide contact references.

1.8 Proposed changes to Personal Services Agreement (PSA)

Please indicate any proposed changes to the PSA your firm would like to recommend.

Vendor May Provide a Response

Section 6
Price Proposal

6. Price Proposal

Instructions: Provide itemized pricing details for each software product proposed. Include itemized pricing for all of the following: customization planning and process consulting; configuration/customization execution; database loading with historical data; training; installation and acceptance testing; post-installation operational support and system tuning; annual maintenance/upgrade subscription; and all other software and service costs necessary to meet the requirements specified. You may attach additional sheets if necessary.

1.1 Five Year Cost Analysis

Please provide an estimate of costs for the next 5 years. We specifically wish to understand all on-going support costs.

{Please use the spreadsheet "BENTON ATS RFP S6 - Cost Proposal.xls" to put in Cost proposal information}

1.2 Proposed Schedule

Please identify your proposed installation, data conversion, testing, training, and go live schedule.

Please base these dates on dates given in section 2.12 in this document. Include dates for deliveries or other reference date (such as Week 2, etc.). Schedules may be in the form of a table of dates or a Gantt chart at the discretion of the vendor.

1.3 Technical Configuration Requirements

Please list all hardware configuration requirements for the ATS. Please specify number and type of servers, operating system, and any other requirements for a successful implementation of the ATS system.

1.3.1 Server Requirements

Please specify number and type of servers required to support the ATS, include operating system, recommended DBMS, hardware configuration requirements (recommended network speed, size and type of disk arrays, CPU speed, and number of CPU's).

Vendor Response

Does the vendor recommend that BENTON County should allocate servers specifically for the ATS? Would an allocated Virtual Server Suffice? Please Explain:

Vendor Response

2.15.5 Workstation Requirements

Please specify minimum and recommended workstation requirements to operate the ATS.

Vendor Response

2.15.6 Checklist

Please ensure that the following items are included or have been previously sent to BENTON County

Letter of Intent	☐
RFP response (this document)	☐
Review of BENTON County Top Level Contract (Section 5.7)	☐
Review of BENTON County Additional Terms and Conditions (Section 5.8)	☐
Five year cost analysis (Section 6.1)	☐
Proposal Certification (Section 6.3)	☐
Copy of proposed software maintenance agreement	☐
Copy of proposed software licensing agreement	☐
Web Site Address for software support and information	☐

2.16 Proposal Certification

Do you certify that you are not on the Comptroller General's list of ineligible contractors nor the list of parties excluded from Federal procurement or non-procurement programs? Yes ☐ No ☐

Will you sell additional units to other government agencies within the State of Washington at the proposal price, terms and conditions until both parties accept a written change? The County of BENTON accepts no responsibility for the payment of the purchase price by other government agencies. Yes ☐ No ☐

THE UNDERSIGNED have hereunto set their hands or caused their duly authorized officers to submit this proposal, all as of the _____ day of _____, _____.

By signing below, you certify in writing that all vendor proposal terms, including prices, will remain in effect for a minimum of 90 days after the Proposal Due Date, that all proposed hardware and system software has been operational at a non-vendor owned customer site for a period of 90 days prior to the Proposal Due Date, and that all proposed capabilities can be demonstrated by the vendor.

Person authorized by company to certify this proposal

_____

Name Date

Vendor agrees that submission of this proposal to BENTON County, with a duly authorized officer named above constitutes a binding agreement by vendor to BENTON County to preserve the price submitted for 90 days. BENTON County will accept a named individual in lieu of a signature so that this document can be electronically submitted. Vendor agrees that changing the proposal cost within this 90 day period may void the proposal response by the vendor and BENTON County will have the right to eliminate the proposal from further evaluation.
